

a.li.ás

another time. another place. another way.

Our mission.

We are a family-driven Portuguese brand, led by a father-son duo with decades of expertise in the footwear industry. At **a.li.ás**, we craft desirable, durable shoes with a deep commitment to environmental responsibility.

Our materials—biodegradable leathers, BCI-certified cotton, Burel wool from Serra da Estrela, recyclable rubber, and cork—are all locally sourced in Portugal, reflecting our dedication to quality and sustainability.

As part of our mission for mindful comfort, we proudly introduce *Aura*, our first barefoot collection. Designed with a zero-drop sole and a Nordic-inspired shape, *Aura* mirrors the natural form of the foot, enabling free movement and breathability. Its lightweight design and ultra-flexible sole deliver a truly ground-connected experience, blending eco-friendly innovation with unparalleled comfort.

Our collections are timeless, versatile, and made to last—designed for year-round appeal while respecting both our customers and the planet.

This is the essence of **a.li.ás**: a sustainable vision of shoemaking, driven by passion, innovation and the pursuit of a better future.

The anatomy of an **a.li.ás** barefoot shoe

At **a.li.ás**, we believe in reconnecting with nature through mindful movement. Our barefoot shoes are designed to let your feet breathe, move and feel freely, just as nature intended.

With zero-drop soles, Nordic-inspired shapes and ultra-flexible materials, we deliver a ground-connected experience that blends sustainability with exceptional comfort.

Wherever possible, we prioritise biodegradable, recycled, and recyclable materials in our designs, striving to make choices that align with a more sustainable future.

Each pair of shoes is road-tested and meticulously refined over months to guarantee exceptional quality and comfort.

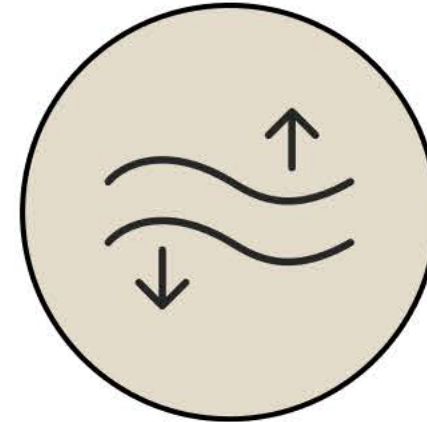

At **a.li.ás**, our passion for craftsmanship is matched only by our commitment to creating a better world, one step at a time.

Barefoot, explained in 3 simple traits..

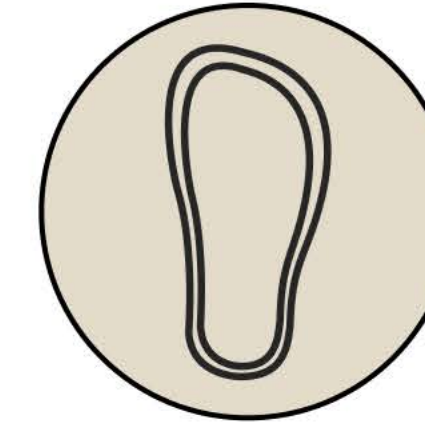

Zero drop.

The heel and toe have no height difference. Unlike traditional shoes with a raised heel, zero-drop shoes support a natural foot position, which aligns with barefoot principles.

Thin & flexible sole.

The shoe has a flexible sole that allows the foot to move naturally, with a thin design for better ground feel and increased awareness of how you're walking.

Wide toe box.

The shoe offers extra room for your toes to spread naturally, especially when moving, allowing for better comfort and foot health.

• sole

Super-flexible two tone sole made from rubber and recycled cork. We add the cork offcuts from production to minimise waste and promote a circular economy

• insole

Zero-drop design and anatomical shape provide natural foot alignment and ample breathing space. Made with cork - a hero material that is breathable, biodegradable, recyclable and renewable.

• upper

Made from recycled or consciously sourced materials such as chrome free leather or burel wool, our shoes take concerns with the well-being of the planet seriously.
