

SQUID SIGHT

A Deeper Integration with SightLogix Devices

SquidSight is an On-Prem, Genetec Certified, Security Center SDK Plugin created to ingest the Metadata Stream generated by SightLogix devices. SquidSight enables you to monitor Device Status Metadata such as Temperature, Voltage, Air Pressure as well as Object Status Metadata such as Zone-specific Motion Events and SightLogix new Shock Alarm feature.

Features

Expand your Insight

SquidSight allows you to alert with specific Zone Alarm detail as opposed to basic MotionOn Events.

In-Depth Camera Health

Monitor a Cameras Internal Temperature, External Temperature, Air Pressure, and Voltage/Current and trigger pre-packaged Genetec Custom Events when set thresholds are exceeded.

Zone to Event Mapping

Map any SightLogix SightSensor Zone to any Custom Event in Genetec. This allows you to trigger a unique Custom Event for every unique Zone.

View Associations

SquidSight provides a nested view of the devices associated with a SightTracker. Whether it's a PTZ Camera or a SightSensor Thermal camera, this allows you to quickly identify the devices that are connected to each other.

Camera Tampering

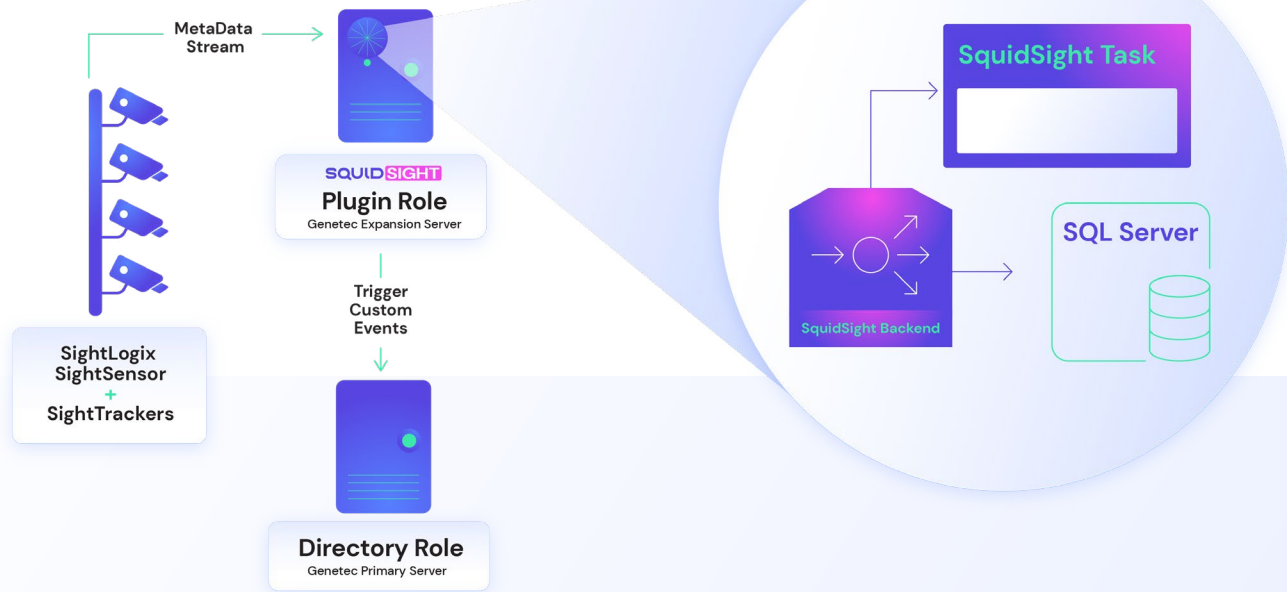

SightLogix has recently introduced Shock Alarms within the Metadata stream. SquidSight allows you to trigger this Alarm explicitly with a pre-packaged Genetec Custom Event.

Full Control

Once a camera is enrolled in SquidSight the end user has camera by camera control and can enable or disable the Metadata for each individual device.

Deployment

Requirements

LICENSE REQUIREMENT

- ✓ A Genetec License:
GSC-1SDK-SOLOSQUID-SQUIDSIGHT
- ✓ Two Plugin/Server Connections
- ✓ One Workspace connection for each consecutive client connection

SOFTWARE SPECIFICATION

- ✓ SQL Express 2019 or later
- ✓ Genetec Security Center 5.12 or later
- ✓ SquidSight Plugin v1.0.38175 or later

HARDWARE SPECIFICATION

- ✓ CPU : Intel Core i7 12900
- ✓ RAM: 32GB
- ✓ Storage: 20GB
- ✓ Database Storage:
To be calculated based on database retention requirements. Please contact SoloSquid support: support@solosquid.com
