

CAPABILITY OVERVIEW:

Hospital & Healthcare BOH Logistics

● WHY IS IT IMPORTANT?

Healthcare and hospital supply chains are *highly* interconnected systems.

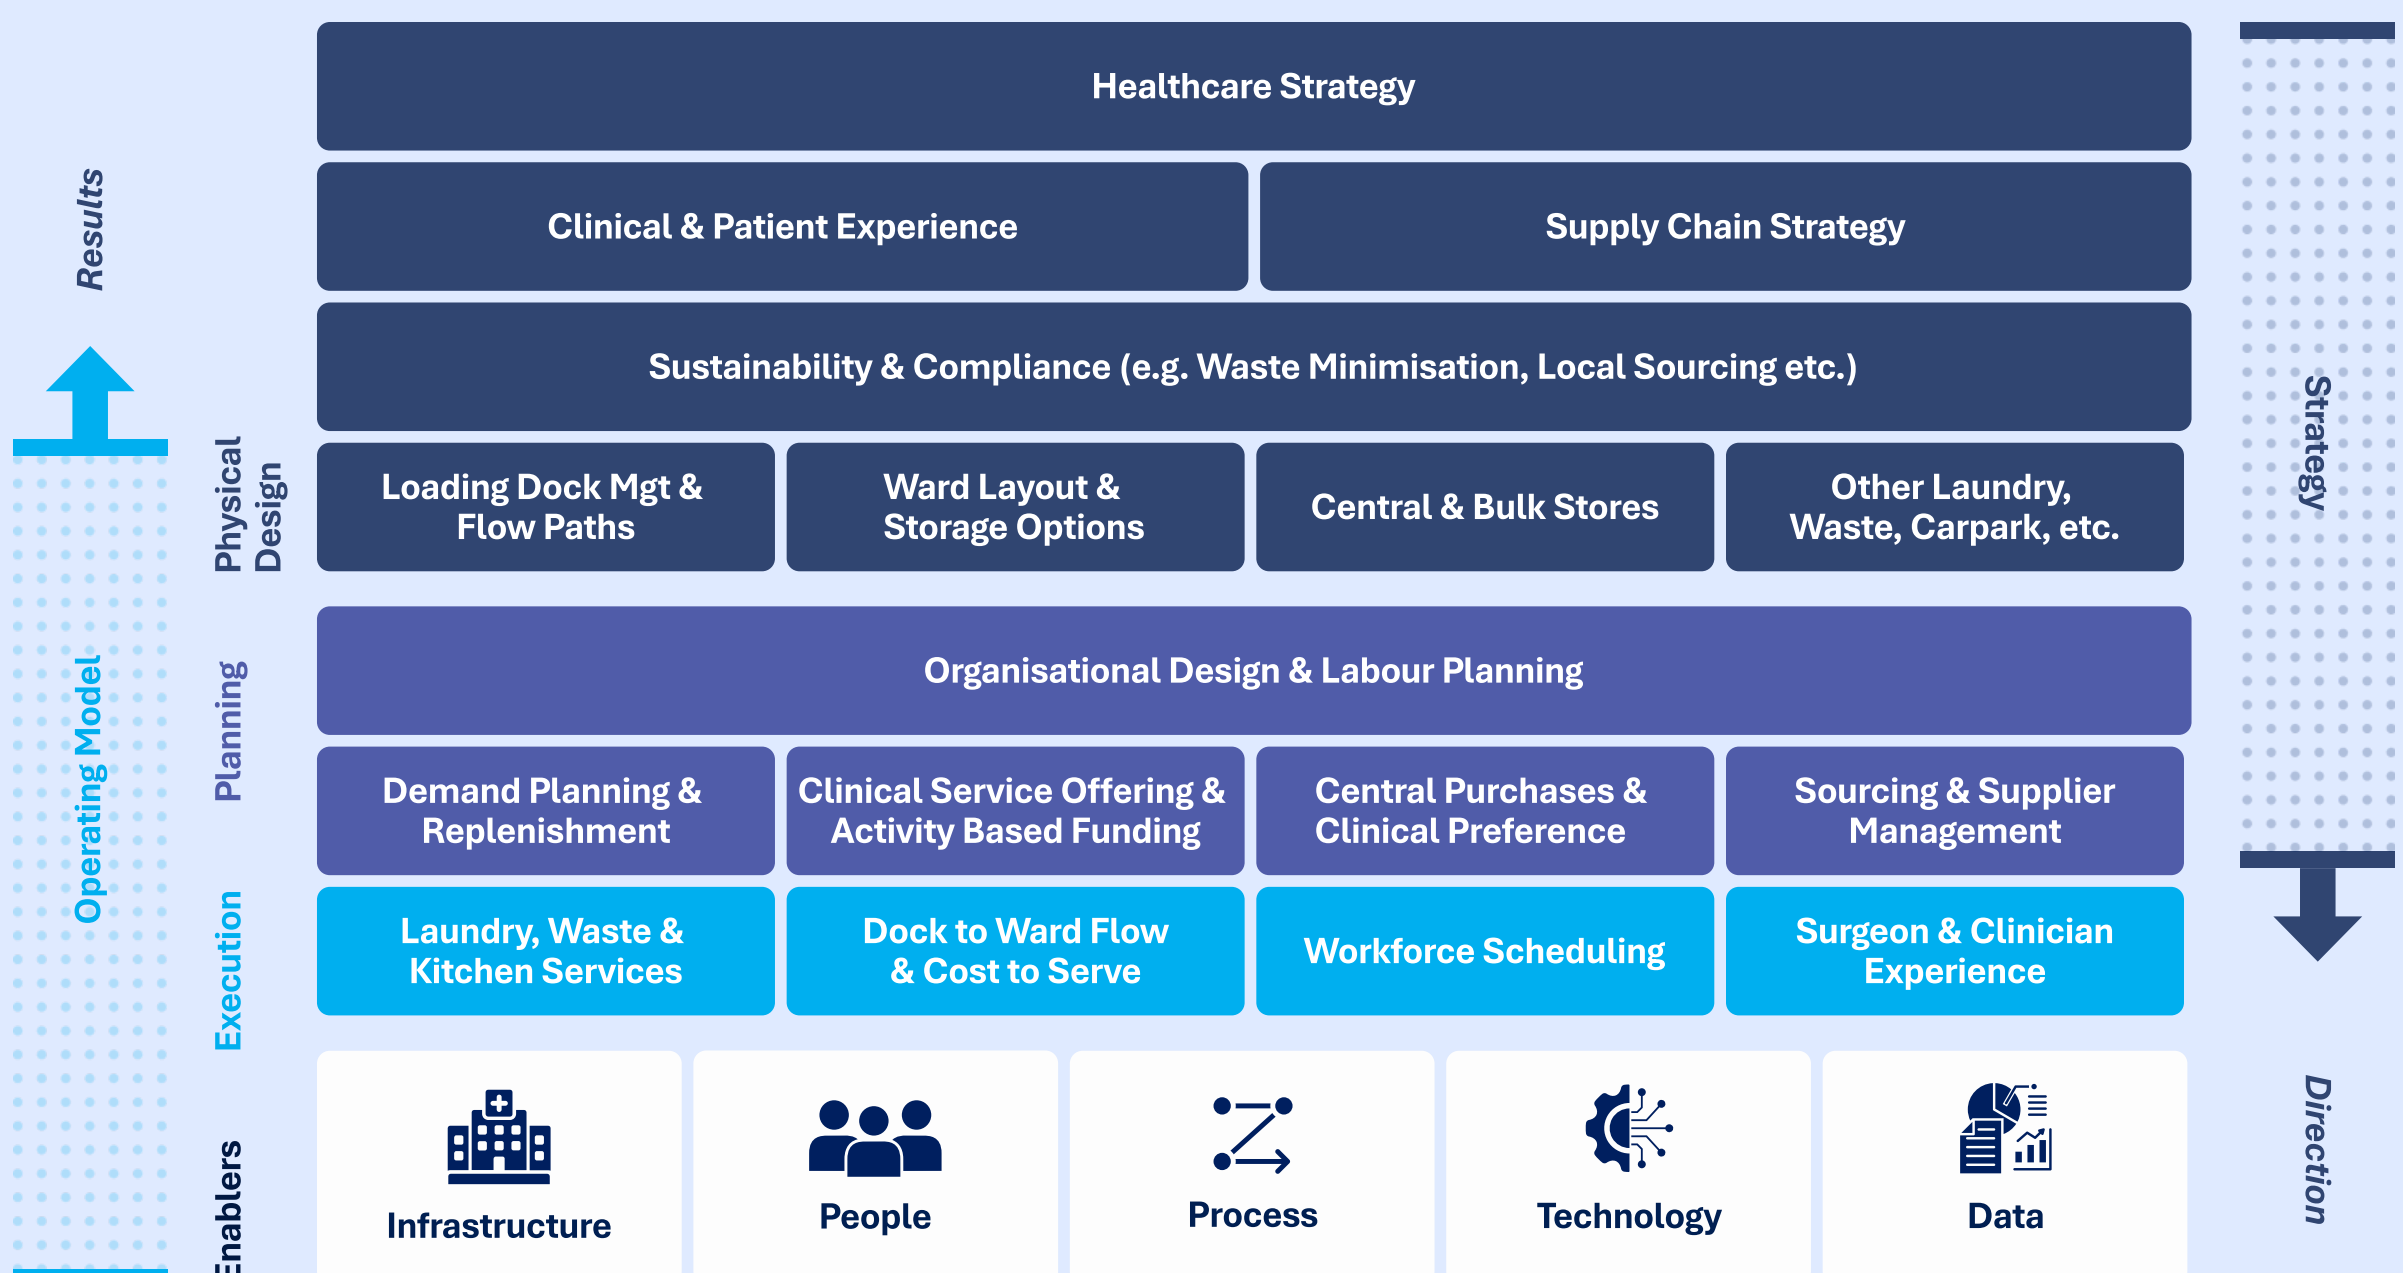

Overlooking BOH constraints in Master Plan designs can intensify existing operational challenges in an already fast-paced, dynamic & manual environment. Workarounds, inefficient processes and additional workforce can become unsustainable and costly in the medium to long term.

Unsustainable risks that may be encountered include:

- Storage areas breaching capacity
- Increased costs for temporary storage
- Waste food and medical items due to poor inventory management

● OUR APPROACH

Trace Healthcare BOH Excellence Framework

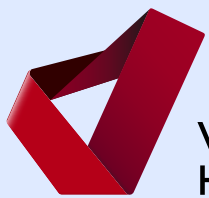

● SECTOR SPECIALIST INSIGHT

“When we don't get the physical design right, we end up compensating for shortfalls and mitigating risks through our operating model.”

Emma Woodberry
Senior Manager QLD

Pathology

Queensland Government
Queensland Health

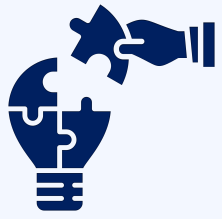

● HOW TRACE WORKS WITH YOU:

- Current state analysis
- Supply chain demand profile
- Time and motion studies and cost to serve modelling
- Capacity modelling for primary storage, staging & docks
- Future state options definition and scenario modelling

● WHY CHOOSE TRACE

Experience that delivers real-world change.

Tailored Solutions

- Designed around your business, not a template
- Flexible frameworks that fit your people and goals
- Tool-agnostic, we find what's best for you

True Partnership

- We work with you, not just for you
- Build your team's capability, not dependency
- Hands-on support through delivery and beyond

Real Experience

- Operational knowledge & Sector-specific expertise
- Major transformations across government, healthcare, manufacturing, defence, and more

Sustainable Approach

- We design supply chains that are not only efficient, but ethical, circular, and future-ready
- Sustainability embedded from day one

● START A CONVERSATION

Design for care, not compromise.

In healthcare, logistics and design aren't just operational, they're critical to patient care. We help hospitals and health networks design BOH systems that improve flow, reduce waste, and support staff to deliver better care.

Let's make your operations as effective as the care you provide.
