

Annual Report

Celebrating 15 Years of
Leading with Love

TEACH **FOR** INDIA

For 15 years, we have been working towards an India free of poverty and filled with love.

This report brings together **the building blocks** that have carried us here.

- **Section One** traces our journey as a movement over 15 years.
- **Section Two** explores the impact we've had in 2024–2025.

Section 1: 2009–2024

traces our journey as a movement over 15 years

Section 2: 2024–2025

takes a deeper look at the impact of the past year

Whether you are reading this as a Fellow, Alum, Student, Parent, Donor, Partner, or Friend – **look for the block you have contributed to.**

Section 1

15 Years of Leading with Love

This is not the story of a single organisation. It is the story of a movement.

5,300+

Alumni driving change in education and social sectors

70%

of Alumni in education and impact roles

160+

Alumni-led organisations launched

16,000+

Students graduated from Grade 10 TFI classrooms

100,000+

Students and educators reached through Kids Education Revolution (KER)

340,000+

educators reached through Firki (lifetime users)

100,000

children from low-income communities directly impacted

50 million

children from low-income communities reached across India

Phase 1: Dream. Launch. Jump In.

(2009 - 2012)

What would it mean to reach every child?

"When Shaheen described how the Teach For India model would work – we knew it would have a far-reaching impact on our country's fabric. Teach For India would change the future of so many children and in effect, help redraw the future of the country. And that is what we tried to capture. Manifest in the design depiction are the diverse skeins of colour, one for every Fellow and their classroom."

Rabia Gupta, on designing Teach For India's first logo

What kind of organisation do we want to be?

"We were walking down a very crowded street. I remember passing an old man. His feet had open wounds; he was in great pain. I remember stopping to speak with him for a minute, asking if he had seen a doctor, and then walking away with a small part of his pain. Walking out of the school, Anu pulled me aside and said, **"I just realized that if I, who believes so deeply in the potential of this idea, don't fund TFI, then who will?"**

In that moment, on that same crowded road, she committed five crores. I remember what that meant to me – that only in a place of such inequity could there be such generosity. **Anu believed that this was an idea that must happen."**

Anu Aga,
Trustee, Teach For India

The First Cohort

Our first cohort continued to co-create a high vision of excellence within, and beyond, their classrooms. Sanaya's Explorers were not allowed to use 'baby' words. Vipul's Students learned meditation and compassion against a classroom wall painted with the silhouettes of leaders.

Some Niners travelled to NYC, where they saw The Lion King musical on Broadway. **Tarun Cherukuri, a 2009 Fellow, returned to stage his own version of the Lion King for hundreds of community members – with his Students, who a year before, spoke no English.**

Our 09'ers were the foundational block. As our movement grew from 87 to 140 Fellows in the next cohort, we welcomed the next set of leaders.

In the first 4 years, we grew from 87 Fellows to 700.

And we went from an organisation that was wondering if it could actually make an impact, to being one of the largest non-profit recruiters in India.

2011: Delhi site launches.

"It was a simple and fleeting exchange but one that we would not forget, for the mantle of leadership and responsibility had been passed onto us. It felt powerful. It felt real. It felt like a movement had begun."

- Arhan Bezbora, Cohort of 2010

Phase 2: Learning, Love, Impact

(2013–2016)

In the next few years, we started to define what really matters most to us. We questioned:
Are our kids learning, what does love have to do with leadership, and what would it take for us to actually transform the education landscape in India?

Teach For India turned 5, our first batch of Students graduated from school, and the picture of an India free of poverty and filled with love started to take shape.

To mark 5 years of Teach For India, we brought to life the Maya Musical – a celebration of the power of Student leadership.

Born from a unique partnership between our Students and Broadway artists, Maya was an original production with a fresh script and music composed on Broadway. It told the story of Princess Maya, who, with her friends, set out to bring light back to her kingdom by lifting three great curses through courage, compassion, and wisdom.

Performed before more than 10,000 people, every show ended with a standing ovation. For our Maya Students, the journey didn't end with the curtain call – they went on to join Avasara Academy, UWCs, and universities in India and abroad. Most importantly, **they carried forward a love for the arts and a bond with each other that continues to this day.**

Fellowship Impact

By comparing TFI Fellows with very similar candidates who did not join the Fellowship, they found that the Fellowship has a demonstrable impact on career pathways.

55%

more likely to be working in the field of education

50%

more likely to hold a job that focuses on addressing a social cause

38%

less likely to work in a private, for profit sector

26%

more likely to work in a socially – inclined service-oriented sector later in life

32%

more likely to be engaged in an activity related to serving low-income communities

**According to a study conducted by International Researchers – Cecilia Mo and Katherine Conn.

Our Students made it to college abroad!

Our first set of children made it into United World Colleges across the globe. We saw our children, their parents, their school ecosystem, and their Fellows invest deeply in opportunities that would set them on a fundamentally transformed life path.

In 2016, InnovatED and Firki launched

2016 marked the start of two key initiatives at Teach For India. InnovatED launched to help entrepreneurs move their ideas from prototype to sustainable organisations – building a movement of leaders and organisations driving collective action. Since then, InnovatED has incubated 68 social entrepreneurs working toward equitable and excellent solutions in education.

That same year, Firki launched as our online platform to provide accessible, contextual teacher training across India, with the vision to make teaching aspirational. The pilot was rolled out with schools in Pune and tested blended learning long before it became mainstream.

This period marked a turning point. Our Alumni movement had begun to influence all levels of the education systems – from classrooms to policy.

Delhi

Alumni like Richa Gupta and Mainak Roy stepped into reform spaces within SCERT and the Schools of Specialized Excellence – shaping curriculum, teacher training, and leadership development with empathy and innovation.

Andhra Pradesh

Alumni began working with district officers, SCERT teams, and nonprofits like Leadership For Equity, laying the groundwork for large-scale reforms like the SALT Project in later years.

Haryana

Through a collaboration with Samagra, Alumni such as Shifali Thakur co-created the Learning Enhancement Programme (LEP), a statewide initiative that strengthened foundational literacy and numeracy across 8,000 government schools.

Pune

Fellows and Alumni entered the municipal school system to support teacher development and English instruction, marking one of our earliest city-level system partnerships.

Phase 3 : Partnership, Advocacy, Reinvention

(2017–2022)

2017: TFIx launched

TFIx was set up to reach the last child in India. TFIx finds and nurtures educational entrepreneurs to design and sustain high-impact teaching Fellowships in their regions. Through a structured 3-stage incubation program, TFIx equips social entrepreneurs with the skills, resources, and support needed to adapt the Fellowship model to suit their unique local contexts across India's high-need, remote, and rural regions.

"TFIx has made me go to the length and breadth of India to see what is happening there. And more importantly the talent that exists there, and what the power of simplicity, power of passion, power of being the change, power of resilience is."

– Rajshree Doshi

2018: The Kids Education Revolution (KER) launched

KER is a global platform that spreads the idea of a 'Reimagined Education'. KER is founded on the belief that the purpose of education cannot be limited to just academics, and all kids should unleash their full potential for a better world. KER programs operate on the premise that to reshape education for an uncertain and constantly evolving future, the most effective approach is to collaborate closely with children.

**Over the past 10 years, KER has impacted 100,000 Students and educators
across 15 regions in India and 10+ countries directly and indirectly.**

When Teach For India turned 10, we wrote Grey Sunshine.

Grey Sunshine chronicles the journeys of Teach For India Alumni, tracing how classrooms became building blocks for long-term system change.

“This book is about opening our eyes to witness examples of change and transformation that, today, are proving that a rewritten contract is entirely possible.”

- Sandeep Rai, Author, Grey Sunshine

The Greatest Show on Earth brought to life the Circus that is education. Created to be the “Greatest Show”, the education system fails to deliver on its promise of unleashing each child’s potential.

7 Students from the Greatest Show on Earth, who went along with us on a journey through India’s education system, have gone on to become Teach For India Fellows, leading real change in our classrooms.

Adapting to the new normal overnight

The COVID-19 pandemic significantly disrupted schooling and children's daily lives. School closures led to a rapid shift to remote learning, which highlighted and deepened existing the digital divide. Many Students lacked access to devices, reliable internet, or appropriate spaces for learning at home. At the same time, economic pressures increased as families experienced job losses, leading some children to take on additional household responsibilities or discontinue schooling. We saw severe learning losses, and reinvented the idea of school so that our children could continue learning.

Shifting our approach across cities

Ahmedabad

A bridge program helped Students recover from learning loss.

Pune

Fellows in Pune set up Panaah, a community centre that offered safety and learning, with oxygen levels checked at the door and children learning in socially distanced classrooms.

Bangalore

Fellows mobilised their networks through social media to crowdfund for colleagues.

Delhi

Alumni collaborated with SCERT to strengthen blended learning and curriculum alignment.

Chennai

Fellows led trauma-informed facilitation, weaving social-emotional learning into lessons, and trained parents on the importance of attendance in virtual classrooms.

New beginnings

When the pandemic shut down schools and separated us from our classrooms, the need to come together felt more urgent than ever. InspirED 2020 moved online, and our pause became a moment of connection. Students, educators, parents, policymakers, and funders gathered virtually to listen, share, and learn from one another. The conference led to **twelve white papers** created for schools, organisations, and government bodies – and over **75,000 people** tuned in to hear the voices of educators, Students, and thought leaders.

As we adjusted to a new way of learning, and contended with the challenges of learning losses, we found a different kind of resilience, one that was rooted in **collective action and new beginnings**. We launched Kolkata, our 8th site, and planned for our next decade of impact.

Kolkata site
launches

Phase 4 :Collective. Change. India.

(2022–2032)

As we entered Phase 4, we thought about our bold vision and the path that would get us there. We started to think about **the collective of leaders** that was building a brave new India with us.

Building India in our Classrooms

In 2022, KER launched the India & I Studies, a classroom programme for Grades 3 to 10 that brings the Constitutional Values and the 8Cs (Courage, Compassion, Creativity, Critical Thinking, Consciousness, Curiosity, Communication, Collaboration) into everyday learning. The programme uses 350+ lesson plans designed for experiential and theme-based instruction.

The 8Cs

India & I Studies supports Students in exploring questions of self, community, nation, and the world, while building skills such as critical thinking, collaboration, and citizenship in practice. The programme has reached over 14,000 children, supported by 300 teachers, across 9 states in India.

The Constitutional Values

The Conference of the Birds

The Conference of the Birds began as an 18-month project with 23 Students in Pune, exploring one central question: What is India? The project developed into a full-scale musical grounded in constitutional values and the 8Cs.

The production was performed nine times across Mumbai, Bangalore, and Delhi, reaching over 6,500 audience members.

In the following year, schools in Guwahati, Navi Mumbai, and Mumbai created their own versions using KER's open-source materials, with 200+ Students participating in each adaptation.

Alumni Innovation and Social Entrepreneurship

Teach For India Alumni have founded **160+ organisations**, and **190+ Alumni hold leadership roles in social impact ventures**.

InnovatED, our in-house incubator for early-stage entrepreneurs, has supported **~70 Alumni-led organisations** to date.

One example is Inqui-Lab Foundation, co-founded by Alumni from the 2014 cohort, which works to strengthen creativity and agency in Students. In the last academic year, Inqui-Lab's programmes reached 3.5 lakh adolescents and youth across multiple Indian states, the Maldives, and Bhutan.

Building a movement for The Last Child

Since 2017, TFIx has incubated **71 education entrepreneurs**, who together run **49 Fellowships** supporting **6,800+ leaders**. Today, their work reaches **6,00,000+ children** across **17 states**.

64% of teachers and community leaders who complete the TFIx Fellowship **continue working in the education sector**.

Alumni and entrepreneurs are building locally rooted solutions. For example, Vivek Kumar, a TFIx 2017 entrepreneur in rural Udaipur supports local teachers to reach 1,800 Students in tribal schools, and uses sport to build leadership and confidence among girls in the district, through the iDiscover Fellowship.

The Spinning Firki

Firki continues to evolve, providing better technology and a suite of services to empower and celebrate educators.

93%

of HMs believe Teach For India Fellows have a lifetime impact on Students.

Based on an HM Feedback in schools where we run our Firki Programs

Our North Star

To build 50,000 leaders, who will work collectively, with love, to transform the lives of 1 in 10 low-income children in our regions (and beyond), through an education that unleashes the potential of self, others and India.

Over the past 15 years, we have seen our collective of leaders take many small steps towards an India free of poverty and filled with love. Even as we see the movement grow, we know we have a long way to go.

Section 2: 2024-25

Teach For India's 15th Year

The Ed Crisis Today

India continues to face a crisis of unprecedented proportions.

32M

children in India do not attend school

73%

Students do not make it to college

50%

Students dropout of school before Grade 10

73%

Students in Grade 3 are behind grade level

Embedded in the Indian Constitution is a social contract founded on the promise of justice, liberty, equality and fraternity for all Indian citizens. This promise is the bedrock of our nation's ideals, and still, our systems fail to deliver on this promise for millions of children from low-income communities.

With an estimated 236 million people living in slums, making up 49% of India's urban population (World Bank, 2020), our most financially vulnerable children face the harshest disadvantages, with their access to quality education — and therefore their life choices, being severely affected.

We must do more, faster, to change the system.

What drives us

Our Vision

One day, all children will attain an excellent education.

Our Mission

To build a movement of leaders who will eliminate educational inequity in India.

Our North Star

To build 50,000 leaders, who will work collectively, and with love, to transform the lives of 1 in 10 low-income children in our regions (and beyond), through an education that unleashes the potential of self, others and India.

What we stand for

Transformational Leadership

We deeply believe that systems need leadership that is transformational.

Student Partnership, Voice, and Agency

We believe that our children are our partners in this work.

Child Safety

We believe that our children must be physically, emotionally, and mentally safe, in order to thrive.

Holistic Education

We believe that the purpose of education must expand to unleash the potential of Self, Other, and India.

Celebrating 15 Years: The *With Love* Musical

To celebrate 15 years of Teach For India, *With Love* was created as an original musical exploring the question: **What does leadership have to do with love?**

The production brought together **100 Students and educators** from **11+ regions** and was performed twice at Mumbai's Jamshed Bhabha Theatre, reaching **2,000+ audience members**. The musical reflected collaboration and collective leadership across the movement.

What Love Looked Like This Year

We turned 15

A 15-year movement powered by 5,000+ Alumni, 1,000+ Fellows, and 33,500+ Students—united by a promise to build an India of love and equity.

The Lead With Love Challenge.

Thousands of Students joined the Lead With Love Challenge, turning daily acts of kindness into a powerful expression of courage and compassion.

100,000 voices joined the movement online.

We reached 100K Instagram followers, amplifying Student and Fellow voices across the country.

New faces, new ideas, same mission.

670 new Fellows brought fresh energy and a renewed commitment to transforming classrooms into spaces of hope and excellence.

We invested in leaders of tomorrow.

KER added 330 Student and Educator Leaders, and Firki empowered 211 educators—each sparking ripples of change nationwide.

We hosted our largest-ever institute

New Fellows began their journey at our biggest Institute yet, grounded in training, reflection, and possibility.

Our Progress On the Path

So far, we have built ~16,000 leaders (32%) against our goal of 50,000 leaders by the end of Phase 4 (2032).

Our 2024 Cohort of Fellows is selective, diverse, and deeply driven by purpose

We received a record ~20,600 applications this year, pushing the total past 200,000+ since 2009. With a selection rate of just around 6% for the 2024 cohort, the Teach For India Fellowship draws some of the nation's most driven and purpose-led young leaders. Our rigorous selection process seeks out individuals who bring resilience, adaptability, and a deep commitment to educational equity.

Professional status of Fellows

Matriculated Fellows: City-wise Split

We saw our Student **vision** come to life

Leading Self

In this Grade 7 classroom in Bangalore, each Student understands their current reading level and what they need to do to progress, taking ownership of their learning journey. They are also aware of their peers' reading levels, fostering a sense of collective responsibility. During English lessons, Students independently form buddy groups where they leverage each other in practicing skills to advance to the next reading level.

Leading Others

This moment captures Grade 2 Hyderabad Students, Furqaan and Uzair, during an extra session led by their Fellow. The session was arranged to help Uzair, who had missed a week of classes due to illness, catch up on the reading fluency routine his peers had already mastered. Recognizing that Uzair needed additional support, Furqaan took it upon himself to stay back voluntarily and guide and encourage his classmates, embodying the spirit of teamwork and a commitment to helping others succeed.

Leading India

Grade 9 Students at a Mumbai school recently completed a community project addressing local environmental issues. They identified key concerns, researched solutions, and organised clean-up drives, awareness campaigns, and educational posters. Their efforts empowered them as change-makers, strengthened their connection to the community, and deepened their commitment to a greener future.

We saw bright spots across our cities

Powerful End-of-Year Showcases

End-of-Year Showcases in each city set the bar for what excellence looks like in the classroom every day—featuring Student-led demonstrations that combined academic mastery with holistic learning, brought the 8Cs to life, and amplified the idea of ‘leading with love’.

Rigorous Summer Camps

Across our cities, Fellows leverage community centers, volunteers, and ecosystem support to deliver targeted and differentiated bridge programs for high-support Students, addressing learning gaps and ensuring continuity in learning, even during breaks in the academic year. Summer camps are rigorous, consistent, and rooted in holistic learning.

A Thriving Student Alumni Community

Sumit Jaiswal, a 2023 TFI Fellow, has joined Akanksha as a Lead Teacher. He now teaches alongside Banupriya Mohanan, a 2016 TFI Fellow, who taught Sumit in Grade 10. Our Student Alumni Wing (SAW) continues to drive the update of our Student alumni database, with over 7,000 (48%) registered Student alumni. Through the SAW and beyond, we prioritize access to support, mentorship, and opportunities to our growing Student alumni community.

Pehel 2025: Bold Dreams, Brave Voices

Pehel 2025 was a collaborative initiative of Teach For India Pune, and the Panaah Communities, an after-school program founded by Teach For India Alumni, Mohammad Shoeb Sayed and Saeed Purnapatre. The event brought together 300 young adults seeking learning opportunities, 12 companies offering insights into diverse career paths, and 5 skill partners running workshops to sample new areas of interest – towards the mission of providing ongoing mentorship and resources to help young people achieve their full potential.

Piloting a Master's in Transformational Leadership

Teach For India is piloting an M.A. in **Transformational Leadership**, integrated with the two-year Fellowship, in partnership with **St. Xavier's College, Mumbai**. The programme will begin with 60 Fellows from the 2025 cohort.

Through this pilot, Fellows will combine classroom teaching experience with structured academic coursework, aligned with UGC guidelines and the Fellowship curriculum.

The programme is designed to strengthen Fellows' leadership and practical skills to address educational inequity, and is a first-of-its-kind Master's in Transformational Leadership – championing a new, more relevant advanced degree for India's best and brightest young leaders.

We saw the seeds of our **movement building** programs spread further, and deepen our roots of collective action

While our Fellowship program is built to recruit a pipeline of extraordinary talent, and foster commitment to the shared purpose of transforming education; our Alumni movement is designed to nurture a network of leaders who serve at every level of the system, not only in visible positions of influence, but also in roles where they quietly plant the seeds of change.

Beyond the Fellowship, our Alumni continue to further the cause of educational equity as leaders in our prioritised pathways:

➤ **Transformational Schools:**

They choose to be teachers, teacher trainers and leaders in schools or community centres.

➤ **Enablers of Transformational Schools:**

They support schools through curriculum, assessment reform, large-scale teacher training, and ed tech.

➤ **Policy and Governance:**

They work on policy and governance issues, supporting governments directly on large-scale systemic reforms in education.

Our InnovatED Entrepreneurs boldly reimaged India's most pressing challenges

Launched in 2017, Teach For India's incubation platform has steadily evolved into a powerful catalyst for educational innovation. What began as a support system for early-stage ideas is now shaping bold, scalable solutions rooted in real classroom experience — tackling some of the nation's most pressing educational challenges.

Across the past financial year, the cohort's work has spanned critical focus areas — from school safety and foundational literacy to social-emotional learning, 21st-century skills, and the arts. Each organisation contributes to a shared vision: an India where every child has access to education that is excellent, equitable, and rooted in love.

Our TFIx Entrepreneurs continued to build a movement to reach **the last child**

In 8 years since it started in 2017, TFIx has incubated 62 education Entrepreneurs, with 55 continuing to be a part of the network, running 45 Fellowships with 6,585 leaders (Fellows and Alumni), reaching 372,481 children across 18 states.

This year, TFIx worked closely with 10 Entrepreneurs over nine months to build capacity within them and their teams.

These Entrepreneurs are gearing up to launch their Teaching Fellowships by May. Collectively, they will impact 5,800 children, 138 leaders, and extend their work across 5 states, further strengthening the movement for educational equity across India.

For the 2025 cohort, TFIx received a record-breaking 63 applications, the highest ever, bringing them closer to reaching all children. From this diverse pool, 8 Entrepreneurs were onboarded across 6 states, each committed to transforming education in their communities.

TFIx Cohort of 2025-26

Eight bold visionaries. One unwavering mission—to reimagine education and transform communities. Together, they embody the spirit of innovation, resilience, and the relentless pursuit of educational equity.

Kids Education Revolution (KER) partnered with our Student leaders

Launched in 2017, Kids Education Revolution (KER) works to reimagine education by placing **Students and educators as partners in learning**. Grounded in love-led leadership, KER creates spaces where Students actively shape classroom practices, collaborate with organisations, and lead change within their communities. KER has grown into a global Student-led movement that strengthens voice, agency, and collaboration in education systems.

The community also comes together through the **Revolutionary Retreat**. The 7th retreat, themed Lead with Love, brought together over **100 Students** and **50 educators** from countries including *Malaysia, Romania, and Argentina* to collaborate, exchange ideas, and deepen Student-led change across contexts.

KER's Impact So Far

91%

Students have created safe spaces for others owing to the KER programs.

100%

Students Collaborated with organizations and innovations like Teach for All, HundrED, Design for Change, Roots of Empathy, etc.

63%

Students building classroom practices and content with their educators after being part of KER programs.

69%

Students have initiated or participated in community development and change making projects and embody and practice our 8Cs.

Firki continued to invest in the leadership of teachers

At its heart, Firki believes that when we invest in teachers, we invest in the future. Built by educators, for educators, Firki is a digital platform offering practical, relevant, and high-quality learning. In 2024–25, 18 new courses were launched, and over 12,000 resources were hosted with 16 partner organizations. Eight learning paths and two advanced Alumni tracks were launched. Firki also hosted its first Alumni mixer and a Career Fair with 24 organizations and 57 Alumni participants.

Our work with the Government put our belief in collective action into practice

Public Sector Track (PST)

Through the Public Sector Track, 80+ Fellows engaged in structured exposure to governance and public policy through short-term projects across data systems, teacher support, and curriculum design. The programme recorded a Net Promoter Score of 81, reinforcing its role as a leadership pipeline into the public sector.

A Partnership for Teacher Training

In partnership with the Gujarat Centre for Education & Training (GCERT), the Ahmedabad team, alongside the Government Relations and Firki teams, implemented Firki programmes for pre-service teachers and school leaders. The initiative reached over 100 teachers across Gujarat, strengthening leadership capacity in the system.

Kolkata Initiative for Transforming Education

The Kolkata Initiative for Transforming Education (KITE) brought together over 100 participants from 20+ organisations to share Teach For India Kolkata's impact and vision. Representation from the Kolkata Municipal Corporation, school inspectors, and head teachers strengthened alignment across the city's public education ecosystem.

Education Systems Leadership Track

In parallel, the Education Systems Leadership Track placed experienced Alumni in roles working with senior officials across Telangana, Delhi, and Mumbai. These leaders acted as strategic thought partners, contributing to reforms in Student data management, applied learning, and leadership development.
