

Growing Cash Flow from Precious Metals and Decarbonization Royalties

Precious Metals and Green Royalties in North America

- \$4,500/oz gold price environment significantly improves economics and outlook for Star Royalties' precious metals royalty portfolio:
 - Copperstone project update expects production and cash flow generation to commence in early 2027, with multiple interim milestones to act as catalysts
 - Re-rating potential of Minera Alamos shares presents additional source of value creation and exposure to producing assets in US and Mexico
 - Keysbrook continues to provide ongoing royalty revenue; Life-of-mine extended through 2028, with additional upside into early 2030's
- All inventoried US IFM carbon credits from NativState have been monetized, with additional issuances expected in coming months. Green Star Royalties is expected to have positive free cashflow in 2026

North American Focus with Near-Term Cash Flow

Star Royalties

1. Copperstone – Gold
Gold Stream¹ | Construction-ready
2. Keysbrook – Titanium Sands
2% GR Royalty | Production
3. Elk Gold – Gold/Silver
2% NSR Royalty² | Paused
