

Enterprise Drone Autonomy Platform

FlytBase is an enterprise-grade, globally-proven software for automating drone operations using docking stations.

BVLOS Ready

Regulatory approval in 8+ countries

Apps & Integrations

Ready apps & APIs for workflow automation

Data Security & Compliance

Compliant with cybersecurity frameworks

On-Premise/Private Cloud

Flexible deployment options for enterprises

Hardware Agnostic

Supports wide range of drones, docks and payloads

Pampaenergía

"We employed FlytBase powered autonomous drone-in-a-box solution due to its superior unattended flight technology & affordable price."

Marcelo Lopez, Project Manager

CITYMESH

"FlytBase is the market-leading BVLOS control software for remotely controlling drones and docking stations. Highly recommended."

Mattis Persoons, Safety Drone Pilot

DJI DOCK

Powered by  flytbase

The DJI Dock is a reliable and robust drone charging station that is specifically designed for the Matrice 30 series enabling it to execute automated and scheduled missions seamlessly for your specific use case regardless of the location or weather. The dock is available for continuous use 24*7, with the drone capable of traveling up to 7 kilometers while remaining connected to the dock

Why DJI Dock?

Rugged and Reliable

-35°C to 50°C
Operating Temperature
