

Summary:

This update contains the following enhancements and corrections. You can verify which release you are currently running as well as view all historical Release Notes by going to Help>Release Notes.

Enhancements:***Version 1.2.9.33 - 02/28/2026 -***

- Entity Unit load/maintain altered to make entry of VBP percentages easier. A new button was added to convert Medicare VBP percentages to decimal values that are required for billing.
- Authorization report altered for new Summary-Only option which will summarize all authorizations by patient/insurance/etc.
- Electronic claims altered to ensure death date is not greater than the statement-to date; also added a new Unit-Name option to 2310.26 rendering provider output.

Version 1.2.9.32 - 01/21/2026 -

- Entity load Insurance Rate Tab altered to allow for a new Active-Only checkbox which will hide expired rates to make entry and maintenance easier to navigate.
- Billing exceptions report layout altered for better readability; fixed no authorized charges within available cert period failure.
- Entity lists altered for additional columns to be exported when using the XLS options.
- Billing statements added a new option to the Remit-To section which will allow for unlimited name/address choices.
- Patient entry/update altered to correct document storage when the file name specified is greater than 50 characters.
- Agency Overview report altered to optionally display Average-Billed; Average-Paid; and Average-Cost amounts.
