
Summary:

This update contains the following enhancements and corrections. You can verify which release you are currently running as well as view all historical Release Notes by going to Help>Release Notes.

Enhancements:

Version 1.2.9.36 - 05/20/2026

- a) System settings altered to now allow for multiple Agency Logos and QR-Codes which will be selectable when producing billing Statements.
- b) A/R reporting Statements altered to allow selection of Logos and QR-Codes and various placement options for these.
- c) Entity Referral export now includes Email Address if available.
- d) PPS revenue report altered to fix a slowness issue when running the report in HIPPS sequence; also altered to show NY Medicaid Hipps when running the report for NY Caïd.
- e) Custom invoices altered to allow selection of Logos and QR-Codes to be displayed if required.
- f) Electronic billing for NOA/NOE altered to display warning if update fails; also for new 2nd Visit of Day Modifier option.

Version 1.2.9.35- 04/20/2026

- a) Electronic claims now displays a message if the NOA/NOE is not exported correctly; also NOTRs will be created when discharge status = 52.
- b) A/R notes now being displayed in Patient Load/Maintain on the Notes tab; note that A/R Notes may be read-only based on your system file choice.
- c) A/R activity report altered to display selections (patient/units/etc.) that have been excluded from the report.
- d) Billing Statements now include an option to display a QR (quick-response) Code at the top of the Statement.
- e) Entity License List altered to include the employee code on the report.
- f) Entity Insurance Listing altered to include Insurance Provider ID.
- g) System Load altered for new Logo-Type option to allow for QR-Codes to be stored and updated.
