

In one day, Referit builds an AI agent for the data in your business applications.

HOW IT WORKS

For the area you want to ask questions about, you provide a small dataset along with example questions. Think of an export from your ticketing system, ERP or CRM. Within one working day, Referit delivers a working AI agent that answers your questions.

1 STEP 1 · YOU You provide An export from one application, optionally with documents, plus 10–20 example questions.	2 STEP 2 · US We build it We turn it into a working AI agent. Everything runs securely in the Referit Azure environment.	3 STEP 3 · TOGETHER Reviewing results In a demo we explain how it works and share the results the AI agent delivers.
--	---	---

WHAT YOU PROVIDE

- ✓ Your data: an export from one application, optionally supplemented with documents
- ✓ 10–20 example questions with the expected answer
- ✓ A short explanation of your field, terminology and the meaning of your data fields

WHAT YOU COULD ASK

"Which quotes are still open for client X?"

"Has a client reported this before, and how was it resolved?"

"Which orders are delayed this week?"

Your data always stays yours. The demo runs entirely in the secure Referit environment. If you continue with us, you choose whether the AI agent, including your data, moves to your own Microsoft Azure environment or stays with Referit. No follow-up? Then we delete all of your data immediately.

AFTER THE DEMO: ONE CLEAR NEXT STEP

ENVIRONMENT

You choose the environment

The AI agent runs in your own Azure environment or in Referit's. We help you grant the right people access and give your employees a short introduction. Azure costs are always charged separately.

SUPPORT

Always available

The AI agent is available 24/7 for your employees. If anything goes wrong, we are reachable on working days from 8 am to 6 pm CET. Referit provides the SLA for a fixed monthly price.

CONNECTION

Always up to date

For now the agent works with an export. If you like, we connect it directly to your application, so your answers are always up to date. Other applications can be added later.

AI AGENT · DEMO · FIXED PRICE

Modest price · no surprises.

Extensions after the demo: fixed price based on an impact analysis.

Ready to start?

Provide your data and example questions; we handle the rest.
