

DISABLED ZONE PRO-STOP

Northpac's Pro-Stop Wheel Stops are 100% recyclable and are built for heavy-duty use.

Our Pro-Stops do not 'bend' like competitor models, which prevents damage from breaking at the fixing points.

Designed with strength and longevity in mind, the Pro-Stop Wheel Stops are ideal for a variety of surfaces.

Northpac's Disabled Zone Pro-Stops clearly define parking spaces available for people with disabilities, ensuring that they can get parking spaces close to their destinations, especially those that would usually require people to walk long distances.

Features:

- Manufactured from 100% HD recycled plastic
- Features 8 x highly reflective blue chevrons, fixed in place with heavy-duty epoxy adhesive
- Flexible enough to contour to the ground level, unlike hard extrusion-moulded wheel stops
- Clean pre-drilled 16mm fixing holes for quick and easy installation
- 3-year warranty

Fixings:

- Compatible Fixings: B, C, G, I
- 3x fixings required
- Northpac's Pro-Stop Wheel Stop can be easily installed on concrete surfaces with concrete fastenings, or on asphalt/bitumen surfaces with road spike fixings.
