

# Merit

## Productivity Incentives

Recognition and rewards for hard work.

# Merit

On Demand Services

## Empower operatives by offering financial rewards based on clear productivity metrics.

Merit creates simple user-friendly incentives to boost the productivity of operatives, based on individual performance metrics.

When part of a worker's pay is tied to clear performance goals, they tend to produce substantially more, making Merit a win-win: Higher service standards at lower costs, whilst creating game changing social impact by lifting the real wages of hard working operatives.

# Merit

Task based rewards for operatives

## How it works

1. The Pego app automatically tracks operative task completion rates.
2. Reward levels and criteria for allocation can be configured by the service provider.
3. Operatives can track the rewards earned on their Pego app, at any time.
4. Pego can integrate with the service provider's payroll and HR platforms, enabling the seamless delivery of rewards to operatives.

 Empowering Productivity

 Higher Standards

 Happier Employees

 Social Impact

Empowering people with the tools to do better, with less.
