Wollongong

Our Wollongong Vertical Village offers a mix of Specialist Disability Accommodation (SDA) and Supported Independent Living (SIL) apartments within a modern, purpose-built apartment setting. This Vertical Village model supports people with different needs to live independently, with support available in a well-located and thoughtfully designed environment.

SDA apartments are designed to High Physical Support (HPS) and Improved Liveability (IL) standards. SIL apartments are suited to people who do not require SDA-specific design features but benefit from living independently within a supported apartment environment.

All apartments are private and self-contained, including a kitchen, bathroom and living space. Shared areas within the building provide opportunities for connection and social time, while still supporting privacy and choice.

Support teams are available in the building and provide assistance based on individual needs, supporting daily routines, independence and community access.
