Already have vehicles in Simply Fleet?

If you've already got vehicles added in Simply Fleet, and you only want to connect them to the same ones added in Motive, then you need to make sure that either the name, license or VIN match in both the systems. This will ensure that the assets are connected.

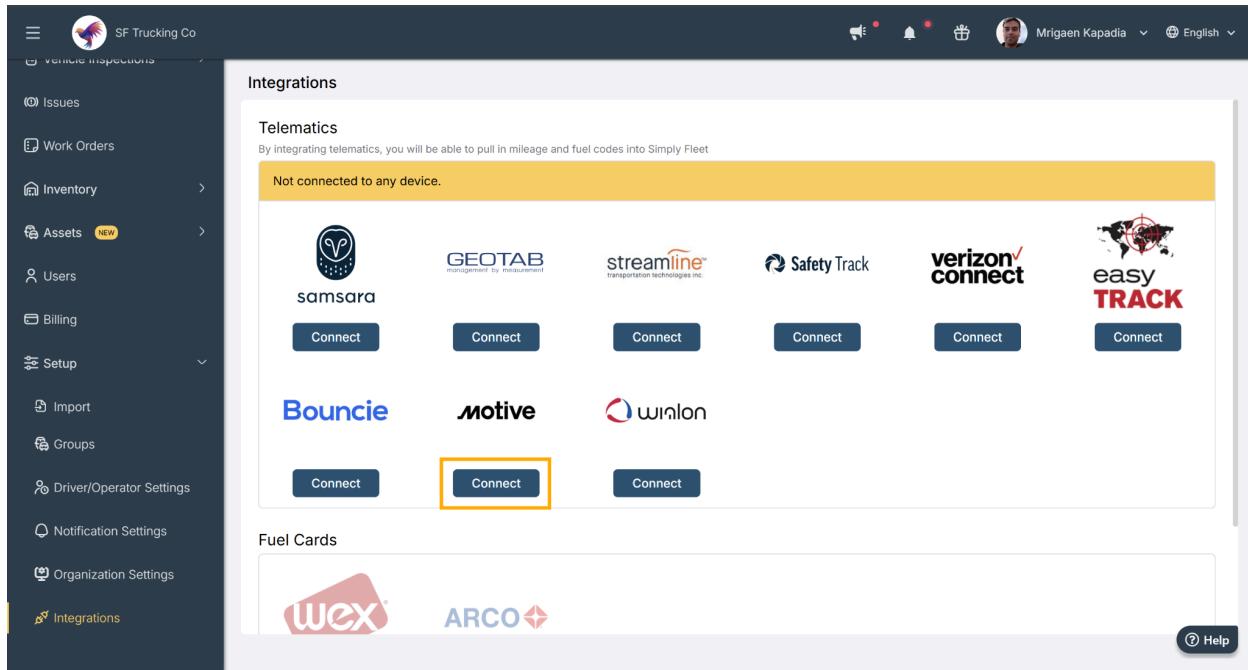

The screenshot shows the 'Edit Vehicle' page in the Simply Fleet web application. The left sidebar includes 'Reminders', 'Vehicle Inspections', 'Issues', 'Work Orders', 'Inventory', 'Assets' (selected), 'Vehicles' (sub-menu), 'Small Equipment', 'Users', 'Billing', 'Setup', 'Import', 'Groups', and 'Driver/Operator Settings'. The main content area is titled 'Edit Vehicle' with tabs for 'Vehicle Details' (selected), 'Vehicle Specifications', '3 Documents Added', and 'User Assignment'. The 'Vehicle Details' tab shows the following fields:

- Vehicle Name:** Maroon Mack SFTC-51 (highlighted with an orange box)
- Vehicle Type:** Truck
- Make:** Mack
- Model:** Pinnacle
- Year:** 2015
- Current Odometer:** 913130.00 Mi (with a gear icon)
- Fuel Type:** Diesel
- Primary Meter:** Kilometers
- License #:** 218586
- VIN / Serial #:** 1M1AW07Y5FM046570 (highlighted with an orange box)
- Group:** Select or Create a Group
- Status:** Active (with a toggle switch)
- Vehicle out of service:** Unchecked checkbox
- Purchase Price:** (empty field)
- Starting Odo:** (empty field)

At the bottom right of the page is a 'Help' button.

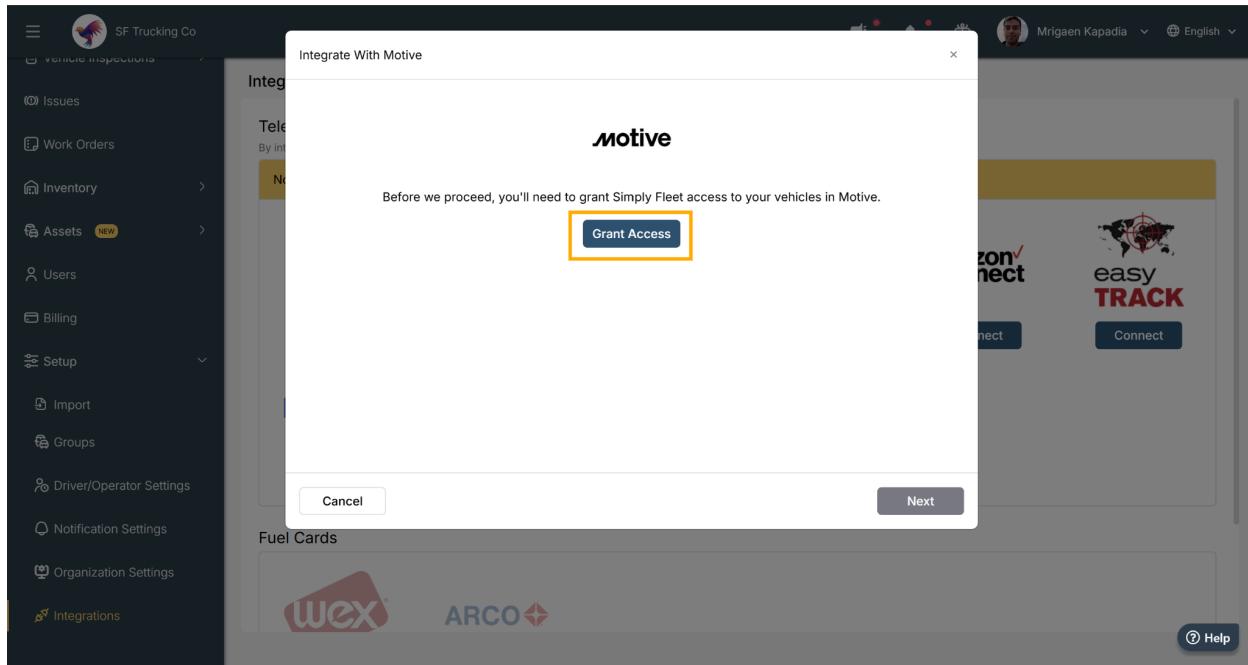

Steps to integration

1. Navigate to Setup > Integrations and click on 'Connect' under Motive.

The screenshot shows the 'Integrations' page in the Simply Fleet application. On the left is a dark sidebar with various menu items like 'Issues', 'Work Orders', 'Inventory', 'Assets', 'Users', 'Billing', 'Setup', 'Import', 'Groups', 'Driver/Operator Settings', 'Notification Settings', 'Organization Settings', and 'Integrations'. The 'Integrations' item is currently selected and highlighted with an orange border. The main content area is titled 'Integrations' and has a sub-section titled 'Telematics'. It displays a message: 'By integrating telematics, you will be able to pull in mileage and fuel codes into Simply Fleet' and 'Not connected to any device.' Below this, there are several integration partners with 'Connect' buttons: Samsara, Geotab, Streamline, Safety Track, Verizon Connect, easy TRACK, Bounce, Motive (with a yellow box around its 'Connect' button), and Winlon. The Motive 'Connect' button is specifically highlighted with an orange box. Below these, there is a 'Fuel Cards' section with logos for WEX and ARCO.

2. Click the 'Grant Access' button.

The screenshot shows a modal window titled 'Integrate With Motive' over the Simply Fleet 'Integrations' page. The modal has a dark background and contains the Motive logo at the top. It displays a message: 'Before we proceed, you'll need to grant Simply Fleet access to your vehicles in Motive.' Below this message is a 'Grant Access' button, which is highlighted with an orange box. At the bottom of the modal are 'Cancel' and 'Next' buttons. The background of the modal shows the same 'Integrations' page as the previous screenshot, with the Motive 'Connect' button also highlighted with an orange box.

3. This will take you to the Motive login page. Enter your Motive credentials here.

Welcome to Motive.

Build a safer, more productive, and more profitable organizations with the industry-leading Integrated Operations Platform.

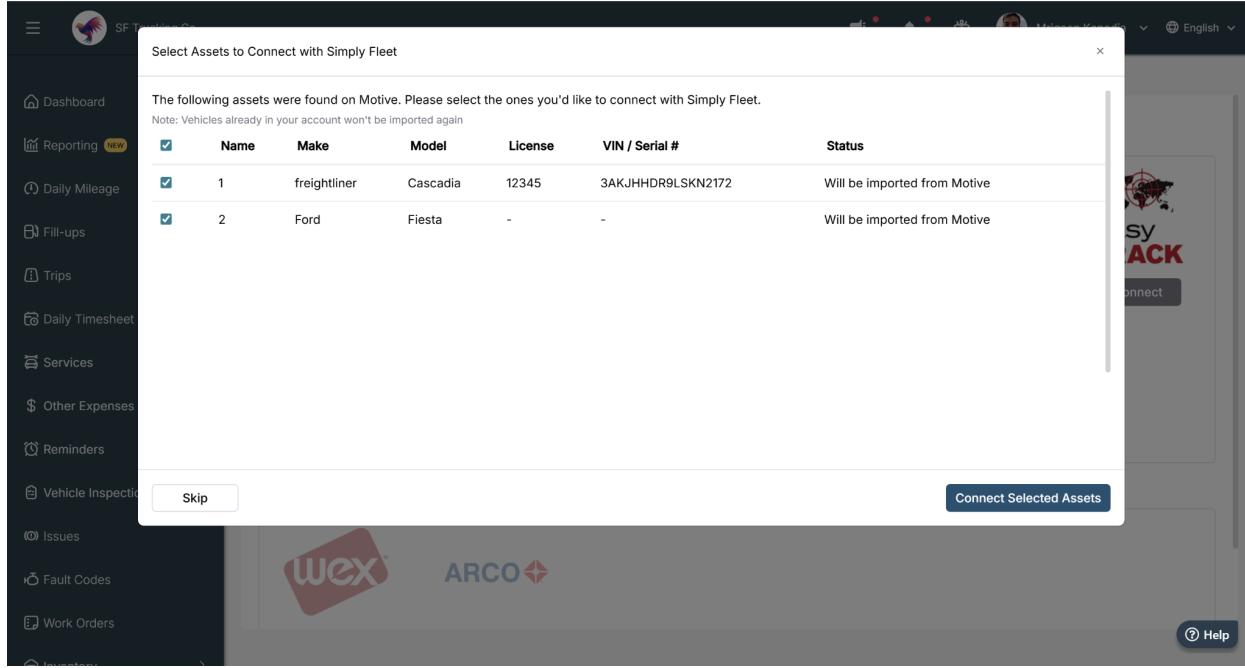

- Reduce collisions with accurate AI, automated event detection, and personalized AI coaching.
- Get unmatched visibility into your fleet, track vehicles, optimize routes, and reduce downtime.
- Assign jobs, digitize workflows, track tasks, and more.
- Lower costs, reduce equipment downtime, and prevent theft with AI.

Contact your Account Manager to unlock more products and features.

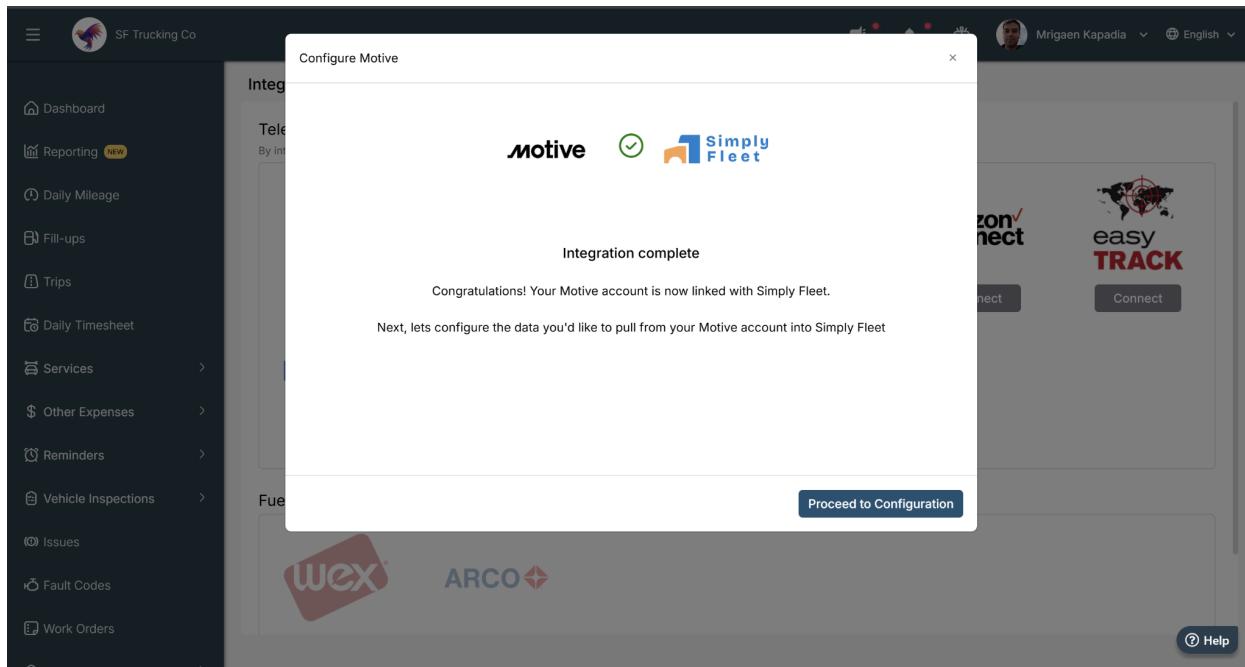

4. After you've entered your credentials, Motive grants access to Simply Fleet to connect to your account. Click 'Next' to continue.

5. If Simply Fleet finds fresh assets that do not exist in the Simply Fleet, then they will be highlighted with the status 'Will be imported from Motive'. If you've already added these assets into Simply Fleet (matched on name, license or VIN), then they won't be imported into Simply Fleet, but you have the option to still make a connection so that mileage and fault codes can be pulled from Motive.

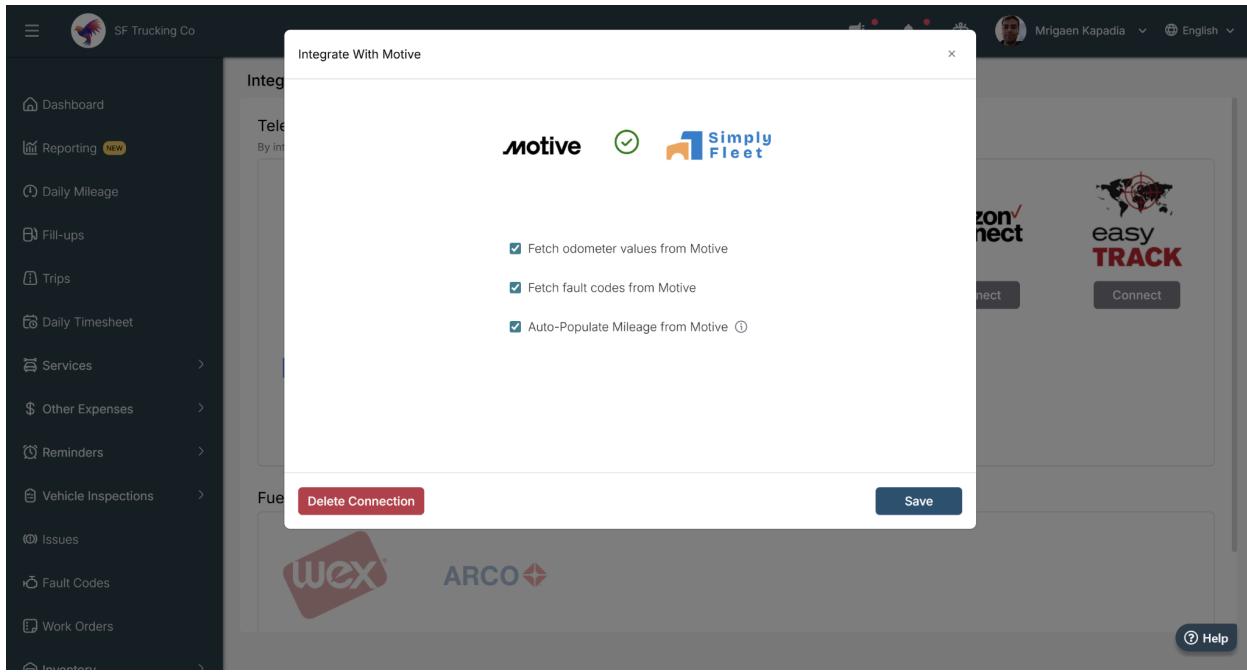

6. The next step is to proceed to configure the integration

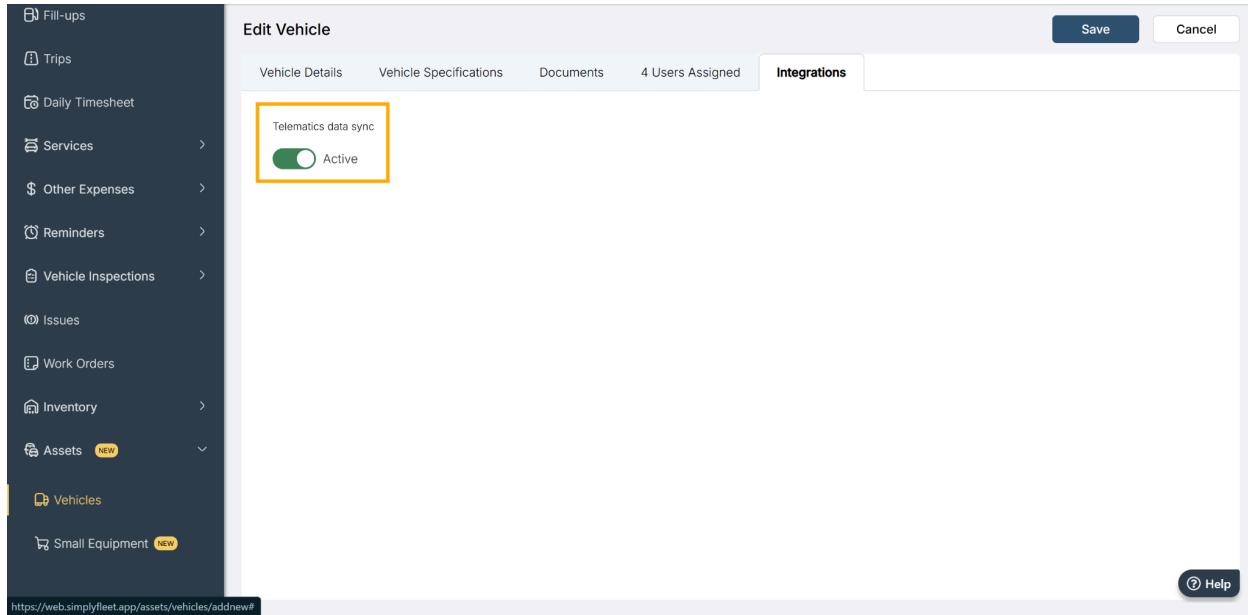

7. Here you can decide the data you'd like to pull from Motive.

- Fetching odometer values pulls the odometer in real time on every form that requires the odometer to be fetched. Ex. during inspections, fill-ups, etc. This works on the mobile as well as the web app.
- Fetching fault codes, pull all the fault codes into Simply Fleet which can then be turned into Issues. Fault Codes appear as a separate menu item in the web as well as the mobile app.
- Auto-populate mileage automatically pulls in the mileage every day at midnight. This can be viewed on the Daily Mileage screen.

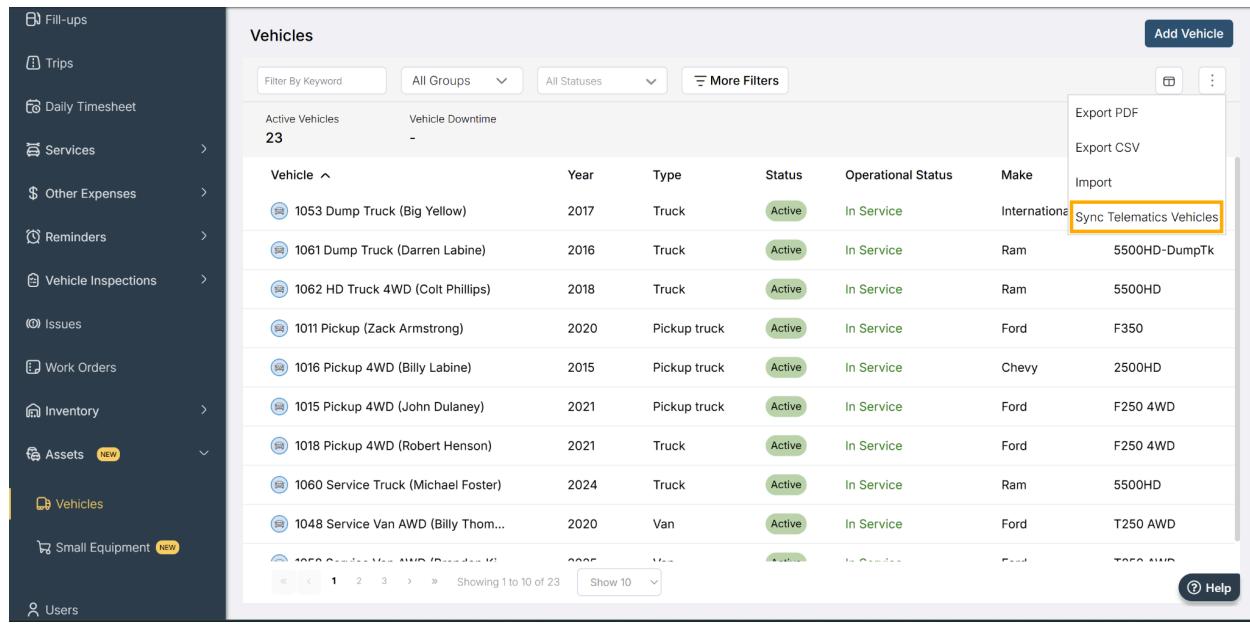

Switching of telematics for individual vehicles

You can switch off telematics integrations for individual vehicles by editing the vehicle and switching of telematics in the Integrations tab. Remember to hit 'Save' after you've disabled the option.

Importing a fresh set of vehicles from Motive

If you need to import new vehicles from Motive after a connection has been made, you can do so by clicking the overflow menu icon under 'Add Vehicle' and clicking 'Sync Telematics Vehicles'. This will bring up all the vehicles that exist in Motive without a connection in Simply Fleet.

The screenshot shows the Simply Fleet software interface. On the left is a dark sidebar with various menu items: Fill-ups, Trips, Daily Timesheet, Services, Other Expenses, Reminders, Vehicle Inspections, Issues, Work Orders, Inventory, Assets (with a 'NEW' badge), Vehicles (which is selected and highlighted in orange), Small Equipment (with a 'NEW' badge), and Users. The main area is titled 'Vehicles' and shows a list of 23 active vehicles. The columns include Vehicle (with a dropdown arrow), Year, Type, Status, Operational Status, Make, and Model. The 'Sync Telematics Vehicles' option is highlighted with an orange box in the overflow menu on the right, which also includes 'Export PDF', 'Export CSV', 'Import', and 'Sync Telematics Vehicles'.

Vehicle	Year	Type	Status	Operational Status	Make	Model
1053 Dump Truck (Big Yellow)	2017	Truck	Active	In Service	Ram	5500HD-DumpTk
