EXPERIENCE

Amazon | UX Designer II

Jul 2025 – Apr 2026 | Seattle, USA

- Led the end-to-end UX for AI powered workforce planning, used by Director+ leaders for planning finance & org across **320,000+** Amazon employees, replacing manual spreadsheet + ticket workflows. Synthesized 12 leader interviews into 3 end-to-end flows **cutting workforce plan creation time by 23%**
- Owned UX for a role-based permissions experience replacing ticket-based approvals for workforce plans. Shipped 2 detailed prototypes covering delegation, audit trails, and edge cases, reducing access-request time from 3 days to **under 10 mins**.
- Shipped the MVP for a **generative-AI** experience that surfaces cross-platform org insights on demand, enabling managers to query org structure & visuals in natural language; **78% of pilot** users completed their first task without support & the experience was approved for broader rollout.

Autodesk | UX Designer

Aug 2024 – July 2025 | Remote, USA

- Led the design of View Member Projects experience for Autodesk Construction Cloud (ACC), enterprise SaaS with 1m+ B2B customers, **improving member project visibility and access by 65%**.
- Spearheaded the design of custom integration experience and introduced service account concepts, allowing developers to securely integrate third-party apps in ACC with granular access control.
- Redesigned the auto-assign subscription experience using Pendo AI, **boosting feature adoption by 40%** and enabling account admins to automate subscription assignments to project members.

Johnson Controls | Product Designer

Sep 2023 – May 2024 | Fishers, IN

- Led redesign of the configuration module for Exacq, a B2B enterprise security product, **increasing user satisfaction by 54% and 3x faster workflows** using a user-centered design process.
- Conducted in-depth user research using **interviews, market analysis, and heuristic evaluation** to understand security integrators' needs and analyze user feedback to inform design decisions.
- Conceptualized and designed 3 MVP features with detailed user flows, interaction, and visual designs, streamlining device hardware configuration experience for customers.

Comet Lab | Product Designer Lead

Aug 2022 – Apr 2023 | Indianapolis, IN

- Headed the design of an AR mobile app from concept to launch, providing an immersive tourist experience and contributing to a **30% growth in user exploration** of local Indy tourist spots.
- Guided the development of spatial design mockups and interactions in Unity while iteratively refining design elements based on user feedback.

LTIMindtree | Senior Product Design Engineer

Jul 2021 – Jul 2022 | India

- Oversaw design of data visualizations within the data discovery module of Fosfor Decision Cloud (B2B SaaS), resulting in a **60% increase in client engagement** within 6 months.
- Spearheaded **UI rebranding of data management module** within 6 weeks by collaborating with a multidisciplinary team of engineers, technical directors, and UX designers using agile methodologies.

EDUCATION

Master's in Human-Computer Interaction

Indiana University, Indianapolis

Bachelor's in Computer Science

Indian Institute of Information Technology, Manipur

SKILLS
