

We Ponder

PRE-INSTALLATION REQUIREMENTS

- Light fitting must be installed by a licensed electrician.
- The wiring and installation of this light fitting must follow local and national wiring rules - eg. AS/NZS 3000.
- Unpack carefully to avoid damaging the ceramic or the light fitting
- Do not operate or install the light if it appears damaged in anyway.
- If the product has been damaged during delivery, notify We Ponder via email within 24 hours of receiving to rectify.
- Warranty will not cover damages caused by improper use or alterations to the product.
- Follow all steps carefully and neatly to prevent damage to the wires, mounting backplate and ceramic body.
- Isolate the power to the circuit before beginning installation.

INSTALLATION GUIDE

- 1** Use the backplate as a template to mark the screw positions and hole required for cables on the wall, and use a spirit level to ensure the backplate is level.
- 2** Allow for a 30DIA mm cable hole, hole sits centred to ceramic body.
- 3** Install the backplate onto the wall using flathead 6G screws and appropriate anchors to suit wall substrate. **IMPORTANT** You must use flathead screws to ensure ceramic sits flush against backplate.
- 4** Unscrew globe covers from fitting, the ceramic body won't fit onto the mounting arm unless these are removed first.
- 5** Carefully place ceramic body onto mounting arm.
- 6** Place hand inside ceramic body from top and tighten plastic blindhead screws found on mounting arm. Ensure ceramic is sitting flush against backplate and straight.
- 7** Push the G9 globes into sockets. You have the option to install both globes, or only one either up or down depending on the light disbursement you would like.
- 8** Screw into place plastic globe covers. **IMPORTANT**, these covers must be installed if your installation location is a wet zone and requires an IP-65 rating.
- 9** Enjoy your Tasmanian made ceramic wall light!
