Initial Records Checklist – Dentate Start
What the Hybridge Lab Needs

HYBRIDGE®
L A B O R A T O R Y

Intra-oral Scan Capture
❑ Upper and lower arches in their entirety (Include palate, tuberosity, retromolar pads and vestibules)
❑ Bite scan from both sides of arch*
❑ EZ Bow – scan of Index Wafer in mouth

OR

Analog Capture

❑ Upper and lower alginate impressions (Include palate, tuberosity, retromolar pads and vestibules)
❑ Facebow
❑ Bite registration*

* Bite scan and bite registration must be patient's repeatable CR position

Photo Series

| Full Face Smile | "Duh" Position | Open Retracted | Centric Retracted | Smile | Facebow |

Rx Filled Out Completely

❑ Visit HybridgeRx.com to access the portal
❑ Create your lab rx, including Smile Analysis or use the Hybridge Smile Design App
❑ Upload your rx, photos and all scans

   * Save IOS Scans as STL files

   * Save CBCT scan as a set of single DCM files to a folder that is then zipped

eXact Simply Guided Surgery

❑ Pre-op CT scan taken within previous 6 months
❑ Have patient bite on cotton roll to separate arches.
❑ Capture full maxilla, including sinuses. Capture full mandible.
❑ If any modifications to teeth have been made or if teeth have changed, take a new CT scan
