

About Us

Our journey of making quality buttons was **started in 1984** from a small town in India. Starting from humble beginnings, Today, Our company supplies buttons to some of the biggest fashion houses around the world. We take pride in manufacturing high quality products and providing great customer service.

We operate out of two factories, Our first unit, Chetna International, specialises in export of luxury buttons made out of real horn, bone and corozo. Our second unit, Chetna Fashion Accessories, specialises in top quality polyester buttons and accessories, including beads, buckles and appliques.

All our R&D and processes are done in-house. Moreover, the products in our factories are subject to quality control at every production stage.

At Chetna, we have a strict commitment towards quality.
