About Climate First Bancorp

Dear Reader,

I'm thrilled to share Climate First Bancorp's fifth annual Impact Report. 2025 was a vibrant year marked by meaningful milestones: we surpassed \$1.62B in assets, hit \$12.07M in net-income, originated over \$500M in mission-aligned loans, and welcomed over 16,000 new customers into our community, to name a few!

Our success is never achieved in isolation. Amid economic uncertainty and weakened social and environmental protections, we relied on partnership more than ever to expand our ethical, climate finance nationwide. Collaboration across the Climate First Bank and OneEthos teams kept us grounded and aligned, while engagement from our community of customers and strategic partners continued to accelerate our impact. This reaffirmed what I love most about this Company: Climate First Bancorp is a vehicle for collective action. We pool together our community's capital and redirect it towards climate solutions and community resilience, creating far greater impact than any one of us could alone. As the Global Alliance for Banking on Values puts it, values-based banks like ours are not "simply intermediaries of money, but critical agents of change" (*Finance for War. Finance for Peace.*, 2024).

This report highlights the innovation and collective effort that's made our impact possible. I hope you enjoy exploring it and leave inspired by the power of aligning your finances with your values. As always, bank like tomorrow depends on it!

Our Structure

CLIMATE FIRST BANCORP

Climate First Bancorp is the holding company for Climate First Bank and OneEthos. While the Bancorp legally binds them, the two companies share history, a common culture, and a unified mission: leveraging finance for positive environmental and social impact. Maintaining distinct operations, they collaborate closely in a symbiotic relationship: Climate First Bank is powered by OneEthos, and OneEthos is powered by Climate First Bank. Together, they merge traditional community banking with technology to help people and heal the planet.

Founded in 2021, Climate First Bank is the world's first FDIC-insured, full-service, digital community bank founded to combat the climate crisis. Headquartered in St. Petersburg, Florida, the Bank operates nationally, delivering ethical climate finance elevated with technology. The Bank is operationally carbon neutral, members of the Global Alliance for Banking on Values, a registered Public Benefit Corporation, and remains the only FDIC-insured bank in the U.S. that's both a Certified B Corporation and a 1% for the Planet member.

Founded in 2022, OneEthos is a financial technology (fintech) company dedicated to accelerating the delivery of sustainable, inclusive financial services across all communities. With proprietary technology and cutting-edge digital tools, OneEthos has fueled Climate First Bank's national expansion, transformed its operational efficiency, and now equips other community financial institutions to also become both high growth and high impact. OneEthos is a Certified B Corporation and a registered Public Benefit Corporation.

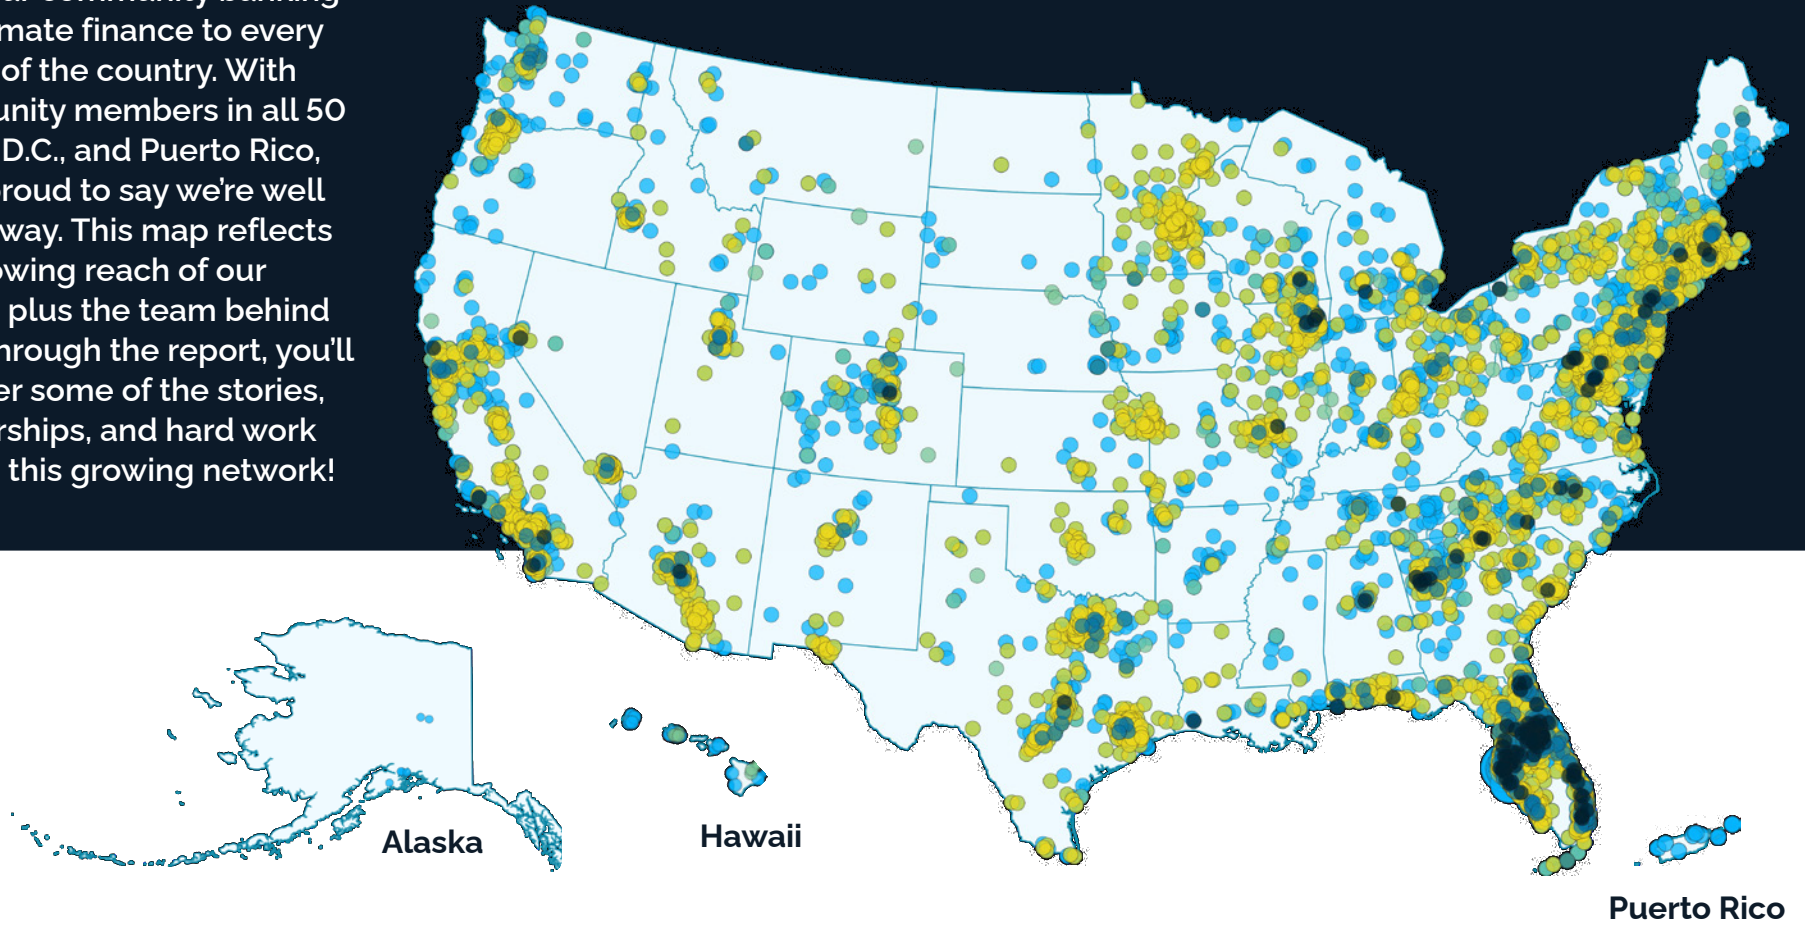

Our History & Growth Timeline

Since our doors opened in 2021, our growth has been incredible, consistently fueled by our mission, dedicated shareholders, experienced team, and fintech OneEthos. This year's growth was propelled by our specialty finance divisions, including Small Business Administration (SBA), Employee Stock Ownership Plan (ESOP) banking, and Solar lending, among others. The milestones below reflect meaningful progress in our continued evolution.

Our Nationwide Community

Our goal has always been to bring our community banking and climate finance to every corner of the country. With community members in all 50 states, D.C., and Puerto Rico, we're proud to say we're well on our way. This map reflects the growing reach of our impact plus the team behind it all. Through the report, you'll discover some of the stories, partnerships, and hard work behind this growing network!

Section 2:

Who We Are

At Climate First Bancorp, 'Who We Are' is defined by three pillars:

Our Commitments: We hold ourselves to the highest standards of sustainability and ethics. Our commitments and certifications aren't just badges; they're the frameworks that ensure transparency, accountability, and measurable impact. We're proud to be the only FDIC-insured bank in the U.S. that's both a Certified B Corporation and 1% for the Planet member.

Our People: Our team, leaders, and shareholders are the heartbeat of our company, executing our mission and driving positive change. Our people bring our purpose to life.

How We Drive Impact: Our work is to drive positive impact, and it's entirely central to who we are. We've got a lot to say about this, so see Section 3 to learn more.

Together, these pillars reflect our dedication to a banking model rooted in integrity, sustainability, and community trust. Explore this section to get to know us better.

Our Commitments: Certified B Corporation

2025 marked another proud year as a Certified B Corporation (B Corp). Administered by the global nonprofit B Lab, the certification recognizes companies that uphold high standards of social and environmental responsibility and continually improve through regular recertification. As part of the global B Corp community, we participate in events that bring mission-driven businesses together to share ideas and tackle challenges from climate action to social equity. In 2025, we joined the planning committee for the BLD Southeast conference and attended additional B Corp gatherings along the east coast, strengthening our connections, community, and impact.

Our Commitments:

1% For the Planet

1% for the Planet is a global network of businesses committed to donating 1% of their annual sales to environmental nonprofit partners. As a member since we opened in 2021, Climate First Bank donates 1% of our solar revenue to vetted environmental nonprofits like:

Ocean Rescue Alliance International, leading marine conservation and restoration.

EcoRise, empowering and teaching youth to design healthy, just, and thriving communities.

Sunraising Foundation, funding clean water access, food security, and sustainable community programs.

Our Commitments:

Global Alliance for Banking on Values

History and Evolution:

The values-based banking movement began fifteen years ago with ten banks forming the Global Alliance for Banking on Values (GABV). Today, the GABV spans globally with over 70 members, making waves in the financial world by proving that banking can – and should – be used for good. This year, alongside many milestones, the GABV became the first financial network to endorse the Fossil Fuel Non-Proliferation Treaty, with Climate First Bank as a proud signatory.

Membership Requirements:

2025 marks another year as a member of the Global Alliance for Banking on Values for Climate First Bank. To qualify, each year banks must complete an annual scorecard that uses impact metrics to track the bank's alignment with the six core principles of values-based banking:

- 1 Triple Bottom Line**
Social empowerment, environmental regeneration, and/or economic resiliency are at the heart of the business model.
34%* of our loans are Triple Bottom Line!
- 2 Real Economy**
Serving communities and supporting businesses within the Real Economy rather than buying and selling in capital markets.
100%* of our loans are Real Economy!
- 3 Client Centered**
Long-term client relationships that enable a direct understanding of their economic activities and associated risks.
- 4 Long-Term Resiliency**
Operate with a long-term perspective to increase resilience to external disruptions.
- 5 Transparency**
Actively engage with their stakeholders and maintain a high degree of transparency in governance and reporting.
- 6 Values-Based Culture**
These principles are entirely embedded in the culture of the bank from leadership practices and corporate culture to governance structure.

*Estimates for 2025 based on internal review.

Our Commitments:

Global Alliance for Banking on Values

Hosting the North American Chapter Annual Meeting:

Climate First Bank is part of the GABV North American Chapter, which our own founder, Ken LaRoe, helped establish! In 2025, Climate First Bank hosted the chapter's annual meeting at the Bank's new headquarters in St. Petersburg, FL. CEOs from member banks across the continent came together to drive systemic change with values-based banking. As the largest U.S. banks continue to lead financing for fossil fuels, the arms trade, and other harmful industries, the consensus was clear: values-based banking must become the global norm, and our chapter is committed to doing its part.

We've got the size and credibility that we can start engaging far beyond our movement, and that's what we really need to do, we need to change mainstream finance."

Martin Rohner | Executive Director |
Global Alliance for Banking on Values

Our Commitments: Our Emissions

Achieving carbon neutrality is central to our mission and aligns us with global climate goals. Carbon emissions for financial institutions/banks fall into two categories: operational and financed. Companies often only report on operational emissions, if at all, but compared to financed emissions, these represent just a small fraction of a company's total footprint. We measure all our operational emissions and work hard to capture more and more of our financed emissions each year.

Operational:

Operational emissions stem from operational business activities like travel and electricity usage. We minimize this aspect of our footprint with sustainable practices like our LEED-certified* branches. As we've grown, our footprint has grown, but we continue to be operationally net-zero via high quality carbon offsets from our trusted partner, We are Neutral.

392tCO₂e[‡]
Operational Emissions Offset

Winter Park
Platinum certified

St. Petersburg
on track for Platinum

Downtown Orlando

Financed:

Using the trusted Partnership for Carbon Accounting Framework (PCAF), we've assessed emissions stemming from our investments and loans across the Real Economy. We've captured the financed emissions of our commercial real estate and residential mortgages through 2025 and the avoided emissions from our solar financing through 2024.

19,485tCO₂e[‡]
2025 Financed Emissions**

32,864tCO₂e[‡]
Cumulative Avoided Emissions through 2024***

Our People: Our Team

Bryce Blecher | BSA Analyst (left), Maham Asif | AVP | Director of Data Strategy & Innovation (center), Jared Smith | VP | Lending Compliance Officer (right) at The Dali Museum in St. Petersburg, FL.

In nature, the more diverse an ecosystem, the more resilient it is. We believe businesses follow the same principle: the more diverse we are, the stronger we become. At Climate First Bancorp, we're always working towards fair representation and systemic change. As a values-based bank blending traditional community banking with digital solutions to address today's most complex challenges, we rely on all forms of diversity to advance our mission. We rely on seasoned bankers with decades of expertise as much as younger generations for technological fluency and fresh ideas for climate solutions. We depend on cautious, analytical thinkers for risk management as much as creative, intuitive minds to design solutions that inspire change. No matter the dimension of identity, diversity makes us stronger and better equipped to enact meaningful change.

For us, work means making the world better. What if every job created positive social and environmental impact? Imagine the progress and well-being that could follow. In addition, we believe people should only need one job at a time to support themselves and their families. That's why we pay competitive wages and provide extensive benefits to support our team's overall health. It's not only the right thing to do, it creates a stronger, healthier workplace culture so we can keep doing what we do best, even better.

“ Mission Specialist Champion

Because of the program, practices like waste reduction, supporting local, and volunteering have become second nature, reminding me that impact doesn't need to feel daunting, it can be consistent, small actions that create ripple effects. My actions have inspired friends and family to become more intentional about their own habits, which has been so cool! The program has made sustainability feel actionable and personal, and that's made the biggest difference."

Our People:

Our Shareholders

The word “shareholder” can carry a stigma, understandably so. For decades, the shareholder model has been used to maximize profit, despite costs to people and planet. But at Climate First, we’ve embraced a new kind of shareholder: one who values our mission, sees our potential, and wants to invest in real change.

Our shareholders recognize three truths:

- 1) Financial returns can (and increasingly do) align with social and environmental investments.
- 2) Ethically run businesses, like B Corps and GABV member banks, are often more resilient in economic downturns.
- 3) Addressing the climate crisis at scale and speed requires significant capital and investment.

With that, we’ve built a profitable business model to attract the resources needed to drive impact nationally, align with global climate goals, and finance a future that’s prosperous for all. Our shareholders have been instrumental in executing our mission and remain essential to our progress.

“ Partner Spotlight: Radicle Impact

At Radicle Impact, our philosophy is to invest in the companies that are meaningfully reshaping their communities for the better and charting the path towards a greener, more equitable future for our kids and grandkids. These kinds of businesses endure, deliver strong returns, and drive real solutions to today’s challenges. Climate First Bank is a standout example, and we’re proud to back their mission.”

Dan Skaff | Co-Founder & Managing Partner

Section 3:

How We Drive Impact

At Climate First Bancorp, 'How We Drive Impact' is by transforming impactful deposits into impactful loans.

Banks were originally meant to connect those with excess funds to those in need of capital, fueling investments that strengthen local economies, but over time, profit overshadowed people. We're bringing banking back to its original community-oriented roots, but with a new focus on sustainable, ethical lending powered by modern technology. When you bank with us, you can trust your money is managed responsibly and with a commitment to community resilience and environmental solutions.

Impactful Deposits: Overview

We believe in ethical banking built on transparency, accessibility, and exceptional service.

We offer a full range of deposit products for you, your business, or your nonprofit. Here's what you can expect when you bank with us:

Transparency: No hidden tricks – just low minimums, minimal fees, and some of the best returns in the nation. Our products are designed to put more money in your pocket.

Safety: We protect customer deposits through FDIC insurance (up to applicable limits) and ongoing investment in fraud monitoring and cybersecurity controls.

Simplicity: Enjoy a nationwide network of ATMs, a user-friendly mobile banking app, and top-tier customer service; we make ethical banking accessible for everyone, everywhere.

Values-Based Banking: Accessible, Impactful Activism

When people think of climate or social activism, they picture actions like volunteering, going vegan, buying an EV, or shopping sustainably. These actions matter greatly, but they can also be costly and time consuming in a fast-paced, expensive, and chaotic world.

That's why we believe values-based banking is revolutionary. Studies from TOPO finance, a climate finance nonprofit, show us that it's one of the most effective ways to take action without demanding a lifestyle overhaul.

With some of the highest deposit rates in the country, banking with Climate First can even grow your wealth faster. Take action and open a checking, savings, or CD account today at climatefirstbank.com!

Business Banking

For-profit companies can be powerful agents of change, and we're proud to welcome so many of them to Climate First Bank. We define mission-aligned businesses as those making impact through their products and services, ownership structure, business practices, or the demographics of their owners and leaders. We're proud to support our business customers with strong financial products, cash-management services, and exceptional customer care. By the end of 2025, each of our mission-aligned business customers met at least one of the core impact categories below.

\$321M*

Partner Spotlight: UnTours

"UnTours is a mission-driven travel company and Certified B Corporation that creates culturally immersive experiences designed to benefit both travelers and the communities they visit. Banking with Climate First is a no-brainer for us because it aligns our banking with our values and supports our mission to craft experiences that connect people to each other while benefiting communities and the earth."

Jonathan Coleman
CEO | UnTours

Impactful Loans: Overview

With transparent fees, fair rates, and clear terms, Climate First Bank provides ethical financing for the full range of needs across people, nonprofits, and businesses. Our lending is designed to strengthen local economies and invest in climate and social solutions.

All our loans support the Real Economy, supporting the production of goods and services, rather than profit-maximizing activity in financial markets.

Our mission-aligned loans deliver explicit and measurable social and/or environmental benefits. These span from residential solar and green building projects, to small business lending that supports innovation and local communities, to financing alternative ownership models that empower workers!

Impactful Loans:

Residential Solar

Residential rooftop solar is a powerful, triple-threat against climate change and social inequality. It cuts carbon emissions, protects homeowners from rising energy costs, and when paired with battery storage adds resilience during storms and outages. Thanks to OneEthos' trusted network of vetted installers, our solar products remain competitive and accessible despite shifting clean energy policies.

Solar Installers in
Our Network

*As of 12/31/2025

Our cumulative solar financed is equivalent to 135MW of solar financed, or:

151,065,000 pounds of coal burned

28,350 homes' electricity use for one year

32,400 gas-powered vehicles driven for one year

Source: EPA Greenhouse Gas Equivalencies Calculator

Accelerating Clean Energy Adoption

Across the U.S., an estimated 100 billion square feet of commercial rooftop space is suitable for solar panels. Yet less than 3.5% of it is used even though maximizing this area could meet 60% of national electricity demand. Climate First Bank is working hard to unlock this opportunity, partnering with organizations like Sunwealth to transform unused roof space into valuable clean energy assets.

Battery Storage

\$32M
Construction to
Term Loan

80MWh
Total Storage

The Benefits of Battery

Battery Energy Storage Systems (BESS) remain an underfinanced yet essential technology for a clean, affordable, and resilient modern electric grid.

Maximizing Renewable Energy:

Since wind and solar vary with the weather and time of day, storage ensures clean power is available exactly when needed.

Lower Energy Costs:

Batteries charge when electricity is cheapest and discharge when prices rise. This helps lower bills, reduce demand charges, and avoid costly grid upgrades. As prices fall, storage has become one of the most cost-effective energy tools.

Strengthening Resilience:

During outages and extreme weather, batteries provide reliable backup power. They keep essential services running and reduce reliance on diesel generators, improving community resilience.

Impactful Loans:

Green Buildings

Through Sustainable Credit Partners, the Bank's joint venture with GreenGen and Conduit Capital, we're financing green buildings to help decarbonize the built environment, provide long term value for owners, and increase resilience in the face of climate change. Here's a couple of loans from 2025 that show how buildings can work in harmony with people and nature while delivering lasting value.

The Gwendolyn, Chapel Hill, NC.

Partner Spotlight:

Sustainable Credit Partners

\$13.3M for Efficient Self-Storage Facility

Our loan supported the stabilization of an Extra Space storage facility in Scottsdale, AZ. The building has sustainability upgrades including high efficient heat pump and HVAC systems, motion-sensing controls, LED lighting upgrades, and low flow plumbing fixtures.

\$17.4M for LEED-Certified Office Building

Our loan supported the stabilization of The Gwendolyn office building in Chapel Hill, NC. It honors the legacy of Gwendolyn Smith, the first Black woman to enroll in UNC Chapel Hill. The LEED-certified building features high-efficiency HVAC systems, demand-control ventilation, and enhanced building envelope insulation. Its design also maximizes natural lighting, reducing electricity demand and aligning occupants' circadian rhythms with daily and seasonal changes.

**Sustainable
Credit
Partners**

Impactful Loans:

Green Bank Partnerships

Through partnerships with green banks, Climate First Bancorp is working to keep clean energy investments accessible and affordable for homeowners nationwide, particularly in low to moderate income (LMI) communities. By using green bank funds as “credit enhancements,” we can reduce credit risk and provide borrowers lower interest rates.

In 2025, we continued our partnership with Montgomery County Green Bank (MCGB) and formed a new partnership with the **Collective Clean Energy Fund (CCEF)**. CCEF worked with OneEthos to build and manage its RENEW lending platform which will provide low cost, long-term financing for energy efficiency and renewable energy improvements to Colorado homeowners with credit scores lower than our standard.

We are proud to bank the US Green Bank 50, a nonprofit with green bank members across the country!

Working Capital

When It Matters Most

Behind every successful small and mid-sized business is the essential work of sustaining and scaling operations. Yet even thriving companies can face cash flow challenges that make it difficult to pay employees and maintain momentum, particularly during periods of growth or restructuring. Limited access to traditional financing often leaves these businesses underserved, constraining their ability to grow and adapt.

To address this gap, we launched our Structured Finance department in 2024. We provide Structured Finance in two forms:

- 1) Factoring: We'll purchase a business's accounts receivables and provide immediate cash.
- 2) Asset-Based Lending: We leverage inventory or equipment to offer a secure, flexible credit line.

These resources help clients grow, retain their teams, and stay competitive.

Partner Spotlight:

Falcon Ambulance

Falcon Ambulance, a leading ambulance provider in Northern California, is guided by CEO Tyler Coats' commitment to a people-first model. To strengthen the company's culture and attract top clinical talent, Coats pursued a transition to an Employee Ownership Trust, giving employees a meaningful stake in the business they power every day. In 2025, Climate First provided a senior loan to support Falcon Ambulance's conversion to employee ownership, helping ensure the team delivering critical life-support services is empowered, invested, and equipped to excel.

FALCON
AMBULANCE

Impactful Lending: Worker Advocacy

By financing alternative ownership structures like ESOPs (Employee Stock Ownership Plans) and EOTs (Employee Ownership Trust) we're supporting workers in becoming collective owners of their companies. By democratizing ownership, these structures keep wealth local, create pathways to generational wealth building, and fight against longstanding racial and gender wealth gaps perpetuated by disproportionate white and male ownership among executives.

Section 4:

Financials & Accolades

We see our strong financial performance and the national and community awards we've earned as direct outcomes of Our Commitments, Our People, and the Impactful Deposits and Loans that define our work. Our mission isn't a trade-off with profitability; it's the engine behind it.

In a world where "good business" is often shorthand for maximizing profit at any cost, we're proud to demonstrate a different truth: **when a bank is built to do good for people and the planet, good business follows.** Our growth, resilience, and success show that values-based banking doesn't just work – it leads.

We aim to set an example for businesses and financial institutions everywhere: doing good is good business.

Financials: Climate First Bancorp

Our 2025 financial performance reflects disciplined growth and focused execution, demonstrating that mission and margin can advance together. Strong asset growth, healthy margins, and sustained profitability highlight the resilience of our business model and our ability to navigate economic shifts with intention. These results enable us to keep reinvesting in our people, our communities, and our climate mission, reinforcing a simple truth: values-based banking can deliver lasting financial strength.

Financials: Climate First Bank & OneEthos

Our subsidiaries convert growth into long-term value by uniting disciplined, profitable banking with a scalable fintech platform that broadens access to mission-aligned finance.

Recognition for Our Mission & Impact

Our mission-driven model continues to translate into meaningful, measurable impact that's earning national recognition across finance, climate, innovation, and leadership. As we scale beyond our early growth stage, these honors reflect more than momentum; they validate a disciplined strategy rooted in values, resilience, and execution. From industry awards to peer-recognized leadership, this acknowledgment underscores our belief that values-based banking can deliver both strong performance and real-world climate and community outcomes.
