inugo.

Apartment Security
with LPR and Bluetooth

Comprehensive access tracking.

Know exactly who opens the gate, every time.
Inugo tracks every access event, creating secure and transparent records. Residents can enjoy hands-free access as the system recognizes registered license plates.

Remote gate management.

Tenants can conveniently open the gate remotely for visitors and contractors, with access tracked in real-time in the cloud-based Customer Management Portal. Images are recorded of every vehicle that enters and exits the car park and can be viewed on demand by security.

- **24/7 Parking Security** with CCTV

  Our LPR cameras have CCTV capability to ensure security of your car park.

- **No Fobs or Cards -** just seamless access

  Unlock gates remotely with License Plate Recognition (LPR) and Bluetooth.

- **Empowered** Parkers

  Parkers manage bookings, guests and vehicle plates themselves, reducing admin time.

- **Stay Informed** in real time

  Access logs provide instant security and operational insights.

- **No upfront** costs

  Choose hardware as a service for a simple, cost-friendly digitization.

- **Work** with what you have

  Integrate with existing gates for a smarter system.
