

LICENCE PLATE RECOGNITION.

Give your customers the ultimate experience in parking with the Inugo Licence Plate Recognition (LPR) camera. Our LPR solution gives your customers touchless access, payment on autopilot and self-management of plates within your white labelled app.

PLATE MANAGEMENT

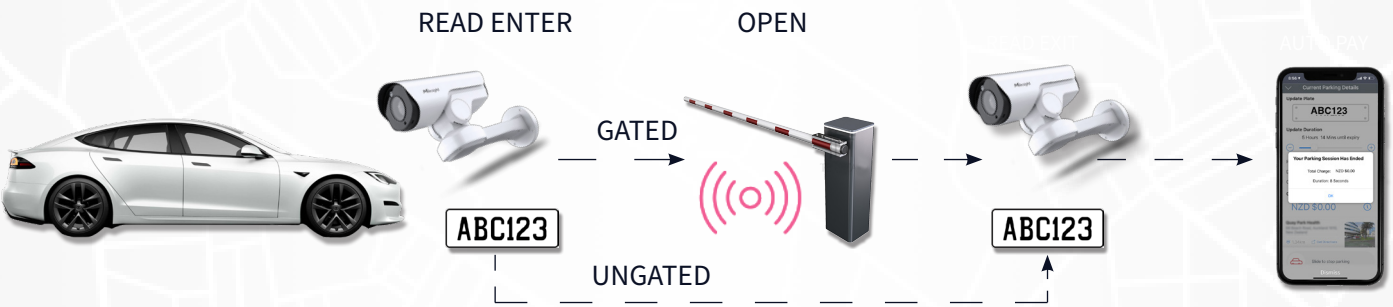

Manage access and groups within the management platform. Corporate and monthly users can manage their own plates. Transient parkers can opt into automatic plate vending.

PLATE RECOGNITION

Our LPR solution recognises plates in New Zealand, Australia, Europe and the USA, with the option of Bluetooth gate control backup if a plate cannot be read.

NO INTERNET REQUIRED

Parking facilities aren't known for their great signal strength - this isn't an issue with Inugo as all of our solutions can run offline with local storage.

CONTACTLESS PAYMENTS
