

Public Value Academy

The future of impact entrepreneurship begins here.

Empowering Entrepreneurs and Investors for a Better Tomorrow

The **Public Value Academy** is a newly developed support system designed to strengthen the ecosystem of impact-driven startups and mission-aligned investors.

Through our Academy, we equip entrepreneurs with the **tools, knowledge, and connections** needed to build scalable, sustainable business models that are not only investment-ready, but also capable of delivering **measurable social and environmental impact**.

At the same time, we offer investors access to **high-potential ventures** backed by rigorous impact data, reducing friction in the due diligence process and unlocking new opportunities for **purposeful capital deployment**.

Improving the World through Impact Entrepreneurship

INNOVATION

We develop effective and sustainable prototypes and business models to solve current and future social challenges.

ACCELERATION

We empower founders to successfully scale their community-oriented business models driving a positive impact on the environment, people and society.

EDUCATION

We develop and conduct tailor-made programs and workshops for social innovations and community-oriented businesses.

CO-CREATION

We scale our impact through collaboration with UnternehmerTUM, Europe's biggest startup ecosystem and PHINEO, Germany's most prominent impact consultancy.

Academy Outcomes

Through our Public Value Academy **we are offering:**

4 locations
across Germany

10,000+ hours
of training and support

Direct support
for 250+ impact startups

15 exclusive
matching events

Free access to IMM-tool
for 500+ startups

International program
by the end of 2027

Working Packages & Deliverables

Academic Program

3-month program for impact entrepreneurs. Can be used as a stand alone program or be combined with existing programs.

Deliverables

- 6 newly developed modules (five hours each)
 - Social Business Model Design
 - Impact Measurement & Management (IMM)
 - Sustainability Management & ESG Reporting
 - Public Value & Common Good Assessment
 - Diversity and Governance
 - Impact Fundraising
- Three half-day workshops (four hours each)
- Personal mentoring for selected startups

Impact Measurement

Software solutions for the collection and management of impact data from impact startups. Additional database solution for impact investors.

Deliverables

- An academically robust framework for Impact Measurement & Management (IMM)
- A Public Value assessment modul
- New impact reporting software for gathering impact data from startups
- New impact database for the analysis and processing of impact data for investors

Matching

Bringing together impact-driven founders and investors, increasing the likelihood of founders finding the right investors and securing the funding they need.

Deliverables

- Communication strategy for engaging diverse stakeholder groups
- Alignment strategy for startups and impact investors
- a variety of content about impact entrepreneurship (podcast, blog, newsletter)
- A series of public networking events and matchmaking days

Impact Education Program

Expert-led learning: written material + video interviews with course authors

Modular & Flexible: runs standalone or integrates with other programs

Blended Approach: self-paced study, workshops, and mentoring

Impact-focused: designed for entrepreneurs building social and sustainable businesses

Course Highlights:

- **Social Business Model Design** – build viable, impactful models
- **Impact Measurement & Management** – measure and report impact
- **Sustainability & ESG Reporting** – sustainability strategies and ESG guidance
- **Public Value Assessment** – evaluate societal contributions
- **Diversity & Governance** – inclusive teams and ethical practices
- **Impact Fundraising** – guidance on pathways to sustainable financial support

komor gGmbH
Empowering farmers to re-wet peatlands

Match us now!

Summary

Challenge

Agriculture and climate change lead to drainage, which releases carbon bound in the peat. Currently, ca. 97.5% of peatland soils in Germany are dry. The program leads to improved utilization of peatland biomass and reduced greenhouse gas emissions.

Mission

Help farmers apply agricultural and cooperative production methods which both A) economically secure sustainable livelihoods as agricultural businesses and B) reduce GHG emissions from agriculture, as well as improve soil water storage capacity with positive effects on landscape water balance

Vision

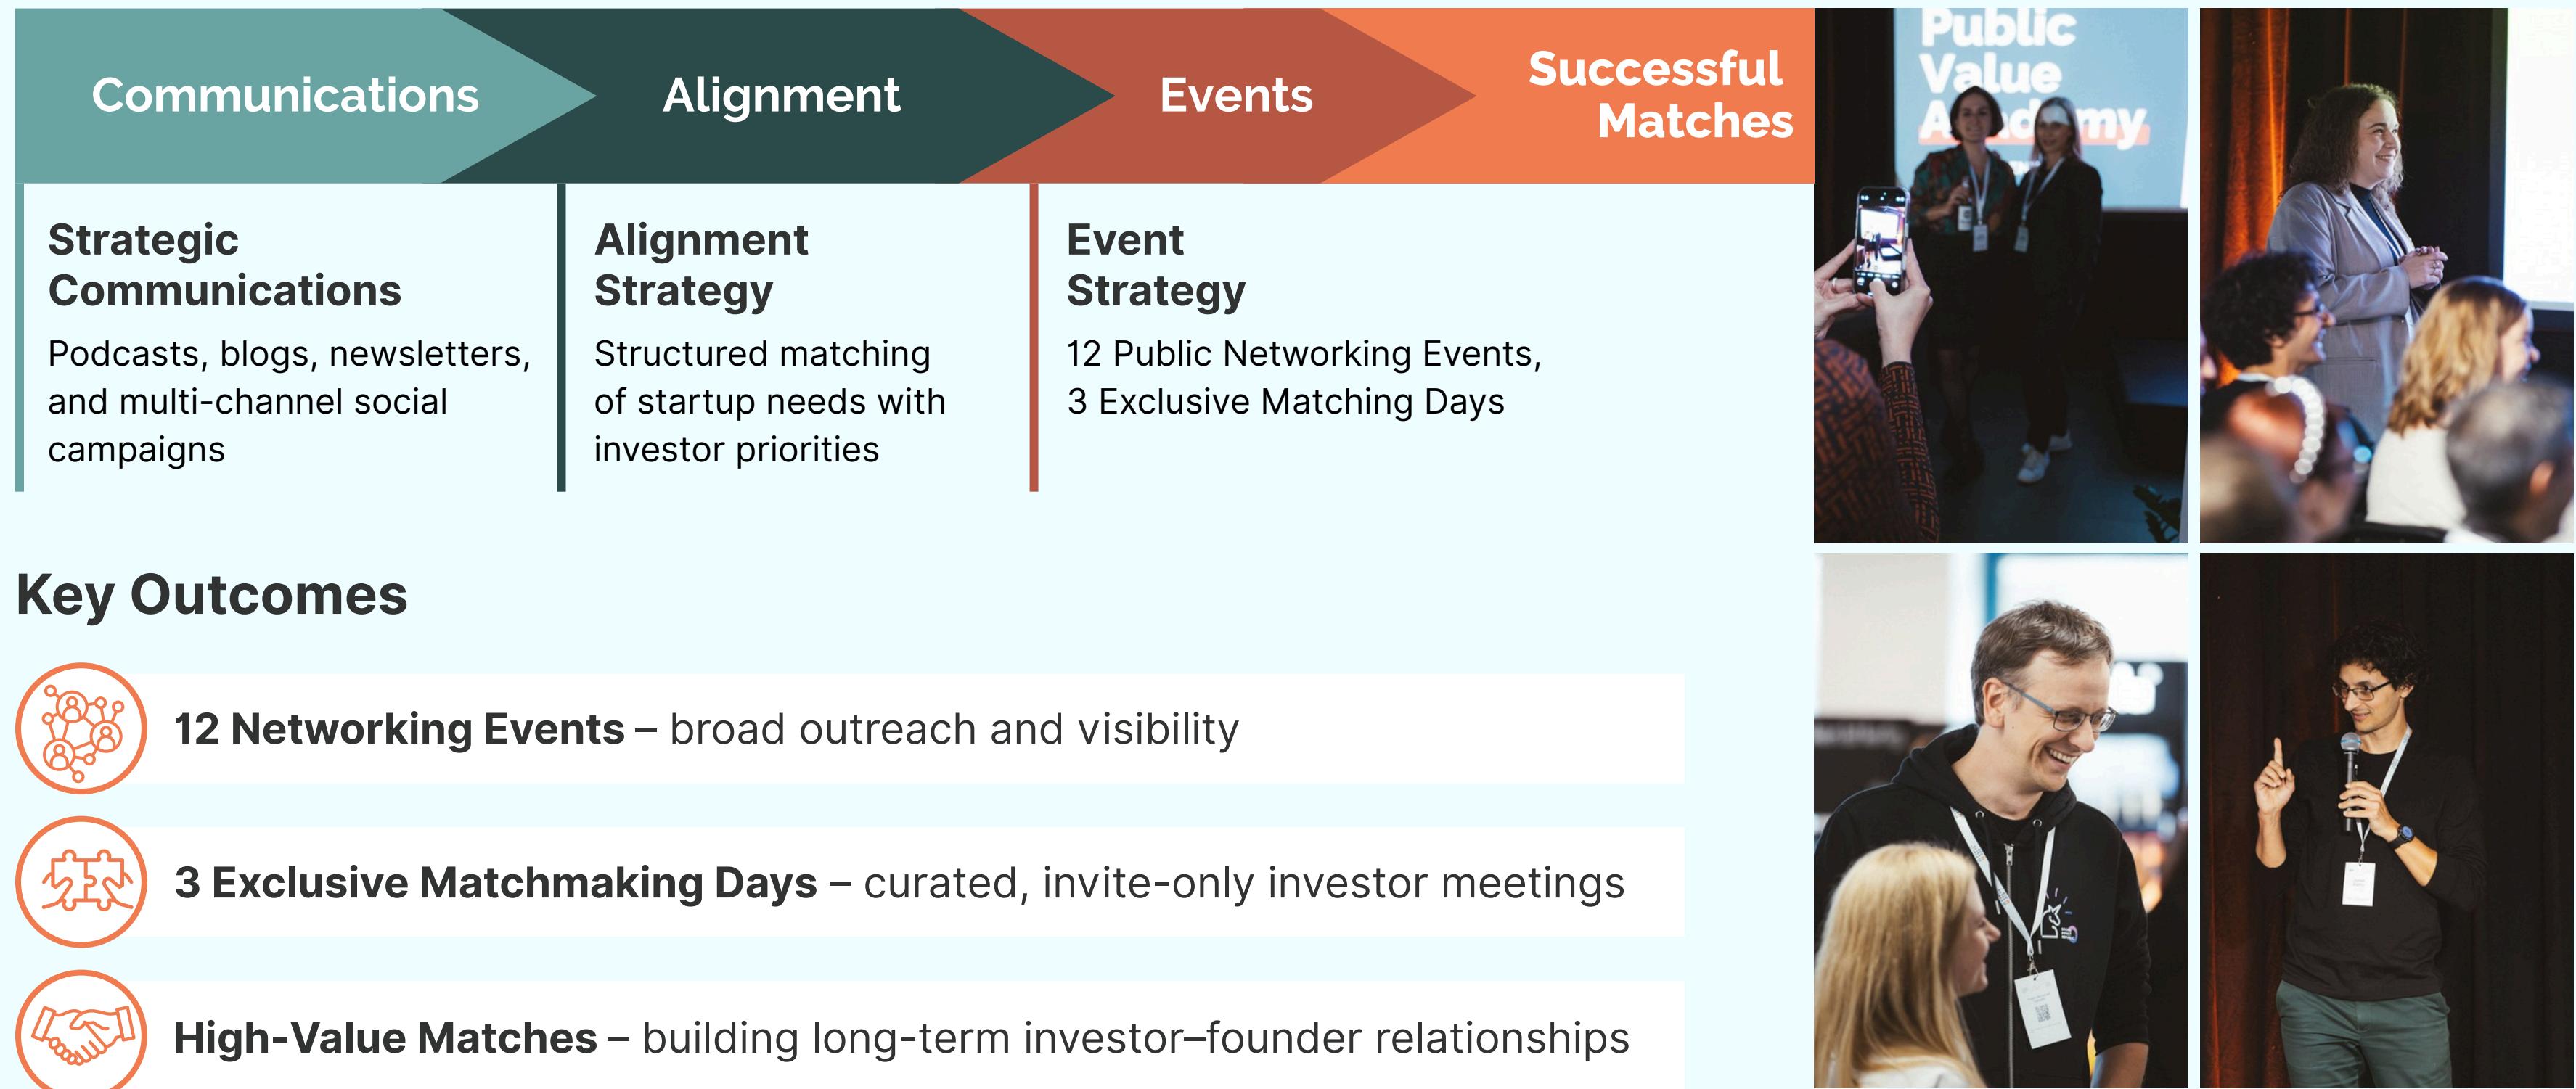

Agricultural farms will be hubs for climate protection and adaptation

Solution

Angestrebte Rendite pro Jahr	Angestrebte Gesamt-Rendite
54,14 %	464,46 %

Angestrebte Zeit zum Exit	4 Jahre
Finanzierungsziel	900.000 €
Mindestinvestition	250 €

Impact Investor Matching

Deliverables to Start-Ups & Entrepreneurs

This project offers startups in the pre-seed and seed phases a hybrid, modular educational program designed to help scale their business models and socio-ecological impact. Entrepreneurs will benefit from:

				
Enhanced Business Skills	Academic and Practical Support	Digital Tools for Impact Measurement	Scalability Support	Structured Matching with Impact Investors
Intensive training in six core areas—Social Business Model Design, Impact Measurement & Management, Sustainability Management & ESG Reporting, Public Value Measurement, Diversity & Governance, and Impact Fundraising, with up to 40 hours of digital learning content, workshops, and mentoring.	The involvement of academic institutions offers startups valuable insights through qualitative evaluations, including semi-structured interviews, testimonials, and ethnographic studies, helping them refine their strategies and increase impact.	Startups gain access to digital methods and tools that make it easier to efficiently, transparently, and academically track and report their social and ecological impact.	The program's design ensures that its benefits extend beyond immediate investment outcomes, contributing to lasting socio-ecological impact across Germany by expanding the support network and scaling the initiative over time.	The program facilitates direct connections between startups and investors through a tailored communication strategy to attract and inform both startups and investors, 12 public networking events to foster relationships and build community, and three dedicated Matching Days.

Deliverables to Investors

Investors focused on impact will find significant advantages in supporting this initiative by offering them unique opportunities to maximize their impact while supporting high-potential startups. Investors will benefit from:

Access to High-Impact Startups	
Data-Driven Investment Decisions	
Improved Portfolio Impact & Accountability	
Enhanced Matching Opportunities	
Strategic Leadership & Influence	

Investors gain access to early-stage, mission-driven startups with strong growth potential, enabling them to support businesses that align with their impact goals.

The initiative provides digital reporting tools and an impact database based on academically grounded frameworks, ensuring transparency and allowing investors to accurately measure and evaluate the social and ecological impact of their investments.

The use of impact measurement tools allows investors to demonstrate the effectiveness of their investments clearly, enhancing accountability and helping them meet their environmental, social, and governance goals.

Through targeted communication strategies, 12 public networking events, and three dedicated Matching Days, investors can connect directly with high-impact startups, increasing the likelihood of successful funding matches and fostering stronger relationships.

By participating in this initiative, investors can further enhance their reputation as leaders in the impact investing space, attracting like-minded partners and increasing their influence in shaping the future of sustainable and impact-driven investments.
