HERITAGE INSIGHT

Launched in 2000 by founding Director, David Rhodes, Heritage Insight is one of the most established heritage consultancies in Victoria.

Today Heritage Insight is helmed by directors Bianca Di Fazio and Andrew Morris, who work closely with the large group of highly skilled and motivated heritage professionals that make up the Heritage Insight team.

HERITAGE INSIGHT IS COMMITTED TO:

- Maintaining a clear and open dialogue with clients and stakeholder groups.
- Providing clear information to our clients about the cultural heritage assessment process.
- Being open, ethical and accountable in our heritage management practices.
- Providing well-presented technical reports and products, which are easily comprehended.
- Keeping abreast of new developments and practices in cultural heritage management.
- Developing systems and resources which allow cost-effective and timely delivery of projects.

All heritage personnel are qualified and experienced archaeologists and heritage advisors, with considerable experience in the conduct of fieldwork and assessment for Aboriginal and historic heritage.

The Heritage Insight team are also able to bring inter-disciplinary expertise to their projects, in fields which include materials conservation, GIS, faunal analysis, archival photography and remote sensing.

Our approach to heritage management projects is team-based, with staff working together to produce constructive outcomes for heritage sites and places. All Heritage Insight projects comply with best practice in heritage management and are compliant with relevant legislation and are based on a position of respect for the values of the Aboriginal and wider Australian communities and the practical needs of our clients.

HERITAGE INSIGHT

We have a proven record in the delivery of innovative and cost-effective solutions for heritage projects that meet the highest expectations of our clients.

Our team is experienced in working with a wide range of stakeholders to achieve these, including state and local government, developers, architects, planners, conservators and other professionals involved with the management of heritage places and objects. We also have considerable experience in consultation and negotiation with Aboriginal communities and strive to achieve an equitable balance between matters of cultural concern to Aboriginal Traditional Owners and positive outcomes for both heritage and development.

We recognise that many different groups in the community may attach heritage significance to a place for many different reasons and we seek to incorporate these values into our work.

Heritage Insight's high level skill-set has led to our appointment to a number of national and state expert panels for the provision of cultural heritage services (both Aboriginal and historic). These include:

- Victorian Planning Authority Technical Services Panel (Victoria)
- Department of Environment, Land, Water, & Planning (DELWP) Technical Services Panel (Victoria)
- Department of Environment, Land, Water, & Planning (DELWP) Coastal Professional Advisory & Services Panel (Victoria) – Consortium with Arcadis
- VicRoads Technical Services Panel (Victoria)
- Parks Victoria Technical Services Panel (Victoria)
- Parks Victoria, Victorian Great Outdoors & Urban Parks Program Panel (Victoria) – Consortium with Spiire
- Emergency Services Infrastructure Authority (Department of Justice) Panel (Victoria)
- Infrastructure Building & Construction Panel (Queensland)
- Alpine Shire Council Technical Services Panel (Victoria)
- City of Ballarat Technical Services Panel (Victoria)
- Bayside City Council Technical Services Panel (Victoria)
- City of Casey Technical Services Panel (Victoria)
- Moreland City Council Technical Services Panel (Victoria)
- Mornington Peninsula Shire Council Technical Services Panel (Victoria)
- Moyne Shire Council (Victoria)
- Mandingalbay Yidinji Aboriginal Corporation (Queensland)
- Manningham City Council Technical Services Panel (Victoria)
- City of Monash Technical Services Panel (Victoria)

HERITAGE INSIGHT
