

Supporting opportunities for local businesses

Windlab is seeking early interest from local contractors, trades, and supply chain partners for its proposed 1.4GW Bungaban wind energy project.

Once approved, the project will create more than 1000 construction jobs, significantly enhancing the regional economy.

To ensure we attract investments to your local area, including opportunities to work on the project we will:

Collaborate with local councils and regional development organisations to strengthen business partnerships, promote economic growth, and increase local investment.

Ensure major tender contractors submit Local Content Plans that demonstrate a commitment to using local workforce, resources and supply chain where possible. This will inform Windlab's tender evaluation process.

Encourage partnerships with vocational training organisations to offer practical work experiences, boosting local employment and skill development.

Advertise subcontracting needs and communicate opportunities through business networks.

Host events at local community centres and online webinars, allowing businesses to meet with procurement teams, understand project requirements, and network with other suppliers.

Facilitate 'meet the buyer' events to connect main contractors with subcontractors, actively seeking local businesses for substantial employment and contracting opportunities.

Maintain a comprehensive database to engage local businesses effectively.

If you're interested in employment, trades or supplier opportunities, please register by emailing bungaban@windlab.com or calling **1800 846 980** and we'll add you to our database.
