Chamois and red stag in the Austrian Alps together with fallow and roe deer in the eastern reaches of the former Habsburg Empire, offer the opportunity to hunt all major European game, including some of the most sought after trophies as the majestic Alpine Ibex and the unique capercaillie, amidst diverse and breathtaking landscapes.

Croatia

THE HUNT

Thanks to a terrain ranging from the Mediterranean coast to large inland forests and mountains, Croatia holds almost every European big game species. The coastal hunts are particularly interesting, offering the opportunity to hunt mouflons, kri kri ibexes, and more in their natural habitat. Moving north into the inland, we can organize one of the best brown bear hunts still available in Europe.

More rustic than other European countries, Croatia is mainly a hunting destination, but the amazing coast will also allow for some enjoyable time for non-hunters, especially during the warmer season.
