

GRIMDARK FUTURE FIREFIGHT

GENERAL PRINCIPLES

The most important rule: Whenever the rules are unclear, use common sense and personal preference. Have fun!

Quality Tests: Roll one six-sided die, and if you score the model's quality value or higher, then it counts as a success.

Modifiers: Regardless of modifiers, rolls of 6 always succeed, and rolls of 1 always fail.

PREPARATION

The Armies: The players put together two armies of equal points before the game begins (we recommend 200pts to start, and 300pts for a full match).

Force Org. (optional): Players may only bring up to 1 hero per 150pts in their army, and only 1+X copies of the same unit, where X is 1 per 150pts in their army. No single unit may be worth over 35% of total points, and armies may only have max. 1 unit per 30pts, and max. 1 model per full 20pts.

The Battlefield: The game is played on a 4'x4' area, with 20+ pieces of terrain. The game can be also played on smaller areas, as long as armies deploy at least 24" apart.

Mission: Place D3+2 objectives. Players roll-off to go first, and then alternate in placing one marker each outside of deployment zones, and over 9" away from each other. At the end of each round, if a unit is within 3" of a marker while enemies aren't, then it's seized. Markers stay under the player's control even after leaving, but if units from both sides are contesting a marker, then it becomes neutral again. The game ends after 4 rounds, and the player that controls most markers wins.

Deployment: Players roll-off, and the winner picks a table edge as their deployment zone, with their opponent taking the opposite. Then the players alternate in placing one unit each within 12" of their table edge, starting with the player that won the deployment roll.

PLAYING THE GAME

Each round, players alternate in activating one unit each, starting with the player that won the deployment roll-off. Each new round, the player that finished activating first on the last round gets to go first.

ACTIVATION

The player picks one unit that hasn't activated yet, and it must take one action:

Action	Move	Notes
Hold	0"	Can shoot
Advance	6"	Can shoot after move
Rush	12"	Can't shoot
Charge	12"	Moves into melee

MOVEMENT

Unit members must stay within 1" of at least one other member, and within 6" of all other members. Units may only be within 1" of other units when charging, and may only charge if at least one charging model is within charge distance of the target unit.

SHOOTING

Models in range and line of sight may fire all ranged weapons, and may fire at up to two different targets with different weapon types. Shooting models take one quality test per attack, and each success is a hit. For each hit defending units roll one die trying to score their Defense value or higher to block, and each fail causes one wound. Then check the wound effects section to see what happens.

MELEE

Charging models must move into base contact with targets, or as close as possible, and then defenders must do the same by moving up to 3". Models must strike enemies within 2" horizontally and 4" vertically with all melee weapons, which works like shooting. Then defenders may choose to strike back, but don't have to. If one of the units is destroyed, the other may move by up to 3", else chargers must move back and separate by 1" (if possible).

Fatigue: After charging or striking back, units only hit on unmodified results of 6 in melee until the end of that round.

WOUND EFFECTS

Whenever a model takes one or more wounds, place one marker next to it for each. Then the defender rolls one die, adding the number of markers to the result:

Roll	Effect
1-5	Shaken - Gets +1 to wound effect rolls, must stay idle, but may strike back counting as fatigued, always fails morale tests, and can't contest or seize objectives. Shaken units must spend one full activation idle to stop being Shaken.
6+	Knocked Out - The model is removed from play.

Groups & Wounds: Whenever a unit with multiple models takes wounds, each wound kills one model, until only one last model remains. Only the last model then accumulates wounds and rolls to see if it's Shaken or Knocked Out.

MORALE

At the end of each round, if an army is down to half or less of its starting units, then all of its units must take a morale test. To take a morale test, take a quality test, and if failed the unit is Shaken, and if the unit was already Shaken, then it routs instead (remove from play as destroyed).

TERRAIN

Cover Terrain: Units with most models fully inside cover terrain or behind sight blockers, or that are mostly inside cover terrain or behind sight blockers (for single-model units), get +1 to Defense rolls when blocking hits from shooting.

Difficult Terrain: Units moving through difficult terrain at any point can't move more than 6" at a time in total.

Dangerous Terrain: Models moving across dangerous terrain, or that activate in it, must roll one die (or as many as their tough value), and for each roll of 1 the unit takes a wound.

SPECIAL RULES REFERENCE

Ambush: May be set aside before deployment. At the start of any round after the first, may be deployed anywhere over 9" away from enemy units. Players alternate in placing Ambush units, starting with the player that activates next. Units that deploy via Ambush can't seize or contest objectives on the round they deploy.

AP(X): Targets get -X to Defense rolls when blocking hits from this weapon.

Bane: Ignores Regeneration, and when attacking the target must re-roll unmodified Defense results of 6.

Blast(X): Ignores cover, and after resolving other special rules, each hit is multiplied by X, where X is up to as many hits as enemy models in the target unit and within 3" of it. Hits must be split evenly between all enemy units within 3" of any model from the target (defender picks how).

Caster(X): Gets X spell tokens at the start of each round, but can't hold more than 6 tokens at once. At any point before attacking, spend as many tokens as the spell's value to try casting one or more spells (only one try per spell). Roll one die, on 4+ resolve the effect on a target in line of sight. Models within 18" in line of sight of the caster's unit may spend any number of spell tokens at the same time before rolling, to give the caster +1/-1 to the roll per token.

Counter: Strikes first with this weapon when charged, and the charging unit gets -1 total Impact rolls per model with Counter.

Deadly(X): Assign each wound to one model, and multiply it by X. Hits from Deadly must be resolved first, and these wounds don't carry over to other models if the original target is killed.

Fast: Moves +2" when using Advance, and +4" when using Rush/Charge.

Fear(X): This model counts as having dealt +X wounds when checking wound effects in melee (must deal at least one wound to check).

Fearless: When a unit where all models have this rule fails a morale test, roll one die. On a 4+ it counts as passed instead.

Flying: May move through units and terrain, and ignores terrain effects whilst moving, and automatically passes jumping rolls.

Furious: When charging, unmodified results of 6 to hit in melee deal 1 extra hit (only the original hit counts as a 6 for special rules).

Hero: Friendly units within 12" may take morale tests using the hero's Quality, as long as the hero isn't Shaken.

Immobile: May only use Hold actions.

Impact(X): Roll X dice when attacking after charging, unless fatigued. For each 2+ the target takes one hit.

Indirect: Gets -1 to hit rolls when shooting after moving. May target enemies that are not in line of sight as if in line of sight, and ignores cover from sight obstructions.

Limited: May only be used once per game.

Regeneration: When a unit where all models have this rule takes wounds, roll one die for each. On a 5+ it is ignored.

Relentless: When this model shoots at enemies over 9" away, unmodified results of 6 to hit deal 1 extra hit (only the original hit counts as a 6 for special rules).

Reliable: Attacks at Quality 2+.

Rending: Ignores Regeneration, and on unmodified results of 6 to hit, those hits get AP(+4).

Scout: May be set aside before deployment. After all other units are deployed, may be deployed anywhere fully within 12" of their deployment zone. Players alternate in placing Scout units, starting with the player that activates next.

Slow: Moves -2" when using Advance, and -4" when using Rush/Charge.

Stealth: When units where all models have this rule are shot from over 9" away, enemy units get -1 to hit rolls.

Strider: May ignore the effects of difficult terrain when moving, and only needs 2+ to pass jumping rolls.

Surge: On unmodified results of 6 to hit, this weapon deals 1 extra hit (only the original hit counts as a 6 for special rules).

Thrust: When charging, gets +1 to hit rolls and AP(+1) in melee.

Tough(X): This model only rolls to check wound effects once it has taken X wounds or more, and is only Knocked Out on rolls of 5+X or more.

Example: A model with Tough(3) only rolls for wound effects once it has taken 3 wounds or more, and is Knocked Out on rolls of 8+.

Unstoppable: Ignores Regeneration, and ignores all negative modifiers to this weapon.

SPECIAL MOVES (optional)

Pushing: Whenever a model rolls a Shaken result, the attacker may try to push it. Roll one die, and on a 4+ the attacker may move the model by up to 2" in any direction.

Jumping: Models may cross 1" gaps or drop off 3" of elevation as regular movement, but they must jump to cross gaps or drop off elevation of up to 6". Roll X+1 dice, trying to score 3+, where X is one die for every full 3" the model wants to move. If all rolls are successes, then the model may cross the distance, without counting it towards its move. If any roll is failed, then the model falls instead.

Falling: If a model falls or is pushed off an elevated position at least 2" tall, it takes 1 hit with AP(X), where X is AP(1) for every full 3" it fell. Then place the model within 2" of the bottom, and its activation ends immediately. For units with multiple models, falling kills the model instead, until only one last model remains, which falls normally.
