

Built to move faster.

Pre-built, validated clinical instruments. **See the exact participant and site experience** before a single configuration hour is spent.

OBVIOGO'S TEMPLATE LIBRARY

A growing catalog of validated instruments — pre-built, documented, and ready to evaluate.

ePRO, eCOA, standard forms, and site-administered ClinROs. Browse, preview, and request instruments during scoping — before a single configuration hour is spent.

- Standard forms
- ePRO
- eClinRO
- eObsRO
- ePerfO

THE PROBLEM

Sponsors lose **weeks — sometimes months** — in study setup waiting on eCOA configuration, screen design, and validation cycles. Most platforms build your instruments from scratch, every time. That cost shows up in your **timeline, your budget, and your amendments**.

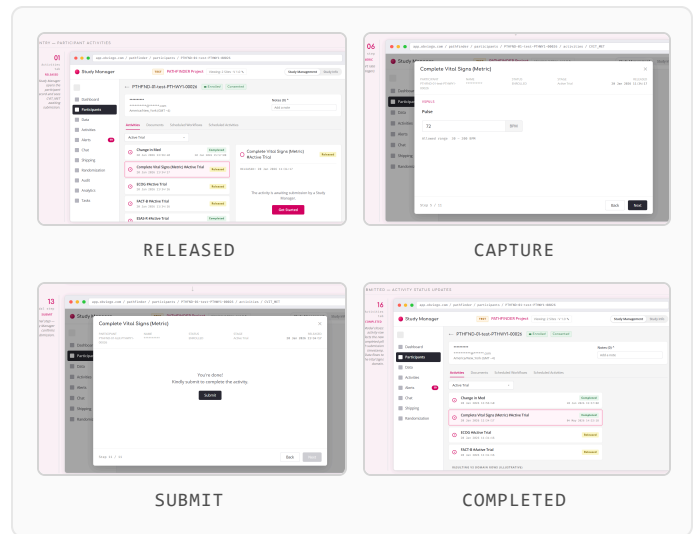

WHAT THE LIBRARY IS

A growing library of pre-built, validated clinical instruments available out of the box in ObvioGo — spanning **ePRO, eCOA, standard forms, and site-administered ClinROs**.

- Standard forms covering consent, safety, labs, vitals, PK, dosing, and more.
- Validated PRO instruments across CNS, respiratory, sleep, pain, pediatric, behavioral health.
- Clinician- and observer-rated scales — neurology, depression, movement disorders.
- Both audiences covered — participant-facing and site-facing workflows.
- Visual flow documentation for every instrument — screen by screen, exactly as it ships.

SEE IT BEFORE YOU CONTRACT

Before a study kicks off — or even before contracting — sponsors can preview the **exact** participant and site staff experience for their instruments.

Sample flow: Complete Vital Signs (Metric) — every step documented, from release through submission.

WHAT YOU GET FOR EVERY INSTRUMENT

- Source documentation
- Specification output
- Full screen-by-screen flow

WHAT THIS MEANS FOR SETUP

- Evaluate **instrument fit** before a single configuration hour is spent.
- Pre-validated templates mean **less configuration, fewer revisions, faster startup**.
- Fewer surprises post-kickoff = **fewer amendments and delays**.
- Full visibility into **every instrument** before your study is configured.

40%

Faster study startup

91%

ePRO compliance across studies

THE PROOF POINTS
Stronger evidence, delivered sooner.

THERAPEUTIC AREAS COVERED

- CNS
- Oncology
- Respiratory
- Dermatology
- Sleep
- Pain
- Pediatric / Infant Nutrition
- Behavioral Health
- Cardiology
- Urology
- Rheumatology
- Geriatrics
- General / Cross-TA
