**AUTHORIZED TRADING PARTNERS**

# ATP Module

**Know your partners and their license status.**

## Easy Global License Management & Maintenance

LSPedia's Authorized Trading Partner (ATP) module is a comprehensive solution that empowers pharmaceutical companies to fully adhere to the requirements of the Drug Supply Chain Security Act (DSCSA). To ensure that businesses engage exclusively with authorized trading partners, this module offers a wide range of features dedicated to license management, authentication, and validation.

## Risk Mitigation

Doing business with authorized trading partners is a Federal and state regulatory requirement. ATP ensures that you trade with suppliers and customers with valid regulatory standing, and you are not penalized for their license laps.

## Velocity Acceleration

You can now focus on taking orders instead of checking license. Switch to ATP for real-time validation through NABP Pulse and/or MedPro. It reduces time, labor, and risk associated with verifying the trading partner for every order.

## Automated Workflow

Don't limit your business speed to someone checking data in multiple websites. ATP eliminates these manual tasks with a single platform, saving time and reducing clerical workload for buyers.

## Streamlined Compliance

Compliance does not need to be complicated. ATP simplifies the process of managing, authenticating, and validating licenses.

## Key Features

- **License Management**
- **Communication Tools**
- **File Attachment**
- **Real-Time License Validation available via NABP Pulse & Medpro**
- **OCI Integration**
- **GLN Cross Reference**

## Complementary Modules

- **SOM** Suspect Order Monitoring
- **INVESTIGATOR** Exceptions Management
- **Policies and SOPs**
