

SUMMER 2026

Anesthesiology at Outset

Outset

Explore medicine hands-on and see if a path to a career in **Anesthesiology is a good fit for you.**

Outset's Anesthesiology Program gives students a first look at a critical, fast-paced field in medicine. Participants explore what draws physicians to anesthesia: managing patient safety during procedures, administering medications with precision, and supporting surgical teams.

Students gain hands-on experience at medical school level simulation labs. All training is done by trained medical professionals. Anesthesiology students will gain experience with suturing, intubation, and injection techniques, and practice OR protocol through scrub-in demonstrations. Beyond learning what anesthesiologists do, discover why this path requires skill, focus, and a deep commitment to patient care.

Beyond specialty-specific learning sessions, students also attend lectures led by physicians from various specialties. During these lectures and Q&A, students learn about broader medical fields and have the opportunity to engage with doctors across specialties.

Combined with Outset's Path to Pre-Med curriculum, the program helps students gain clarity about the academic journey ahead and whether anesthesiology aligns with their interests and strengths. Participants leave with new confidence, deeper insight into medical careers, and a clearer sense of where they might want to go next.

What to expect in a week of Anesthesiology

Hands-On Anesthesiology Simulations

Students get a firsthand look at what anesthesiologists do, using medical-school-level tools and models under guided supervision. Examples of activities may include:

Intubation Practice:

Practice airway management techniques on manikins, focusing on proper procedure and patient safety.

Injection Techniques:

Learn safe and precise methods for administering medications.

Suturing Practice:

Develop fundamental surgical stitching skills used in anesthesia-related procedures.

Scrub-In Demonstrations:

Participate in proper OR protocol and team procedures to understand how anesthesiologists collaborate with surgical teams.

Lectures and Q&A with Physicians

Students attend sessions led by physicians - including anesthesiologists and specialists from other fields who share firsthand perspectives on medical careers. Example topics:

- What an anesthesiologist actually does day to day
- How physicians choose their specialties
- Training milestones, from college to residency and beyond
- Real stories from the OR and clinic
- Student-driven Q&A about careers, school, challenges, and lifestyle

These sessions help students better understand whether anesthesiology could be a good long-term fit.

Path to Pre-Med Course

All students participate in Outset's "Path to Pre-Med" curriculum. It is designed by pre-med advisors that demystifies the entire journey to becoming a doctor. Students learn:

- The full timeline from high school to college to medical school
- What pre-med classes to expect
- Strategies for succeeding in challenging courses
- How to choose the right college for their goals
- What the MCAT is, how, and when students prepare for it
- How to make smart choices about extracurriculars, gap years, etc
- What medical school applications look for

Note: Specific activities vary by campus and availability. Students receive final schedule closer to their program date.

Your Foundation for the Pre-Med Journey

Our **Path to Pre-Med** curriculum is designed by pre-med advisors to help students understand what it takes, before they start the path.

Map Your Medical Journey

See the full timeline and financial picture.

Pick the Perfect College

Find the school that sets you up for pre-med success.

Tackle Pre-Med Challenges

Learn how to handle the toughest college hurdles.

Plan Your Courses

Know what classes to take and in what order.

Ace Hard Classes

Master strategies for challenging pre-med courses.

Gap Year Options

Weigh pros and cons of a gap year before med school.

Conquer the MCAT

What it is, why it matters, and prep tips.

Master Med School Applications Learn the process and how to stand out.

Pre-Med curriculum at the video on our home page:

[Learn More](#)

What kind of student is a good fit for Anesthesiology?

Students who are focused, detail-oriented, and curious about patient care in high-stakes medical settings. We look for applicants who show strong problem-solving skills, precision, and enthusiasm for hands-on learning in dynamic, fast-paced clinical environments.

Will there be a waitlist for students who want to attend a specific campus or program?

When campuses and / or programs are full, students can request to be placed on the waiting list and are encouraged to enroll for a different program that is relevant to their interests or an alternative campus offering the same program.

Are there grade limitations for anesthesiology?

No, there are no specific grade limitations for Anesthesiology. The program is open to all high school students from 9th to 12th grade.

Can I switch program specialty later?

You can switch programs up to 2 months before your start date if there are still spots available in other programs on your campus. We cannot guarantee this, so please [contact our Admissions team](#) for more info.

Can I do back to back programs in different specialties?

Yes. Back to back programs are a great way to meet more peers, explore other specialties, and reinforce core learning. Note that if you stay on the same campus, activities may repeat and you will be participating in the “Path to Pre-Med” course again along with your new week’s student cohort.

What if I’m not sure this is the right program for me?

See our overview of other program specialties on the next page. You can also visit our [website](#) to explore other programs.

Anesthesiology Program: Video

Educational & Fun

Perfect balance of fun and education. My daughter made some great friends here, and it really solidified her passion for and decision to go into medicine.

All Programs

Not sure if **Anesthesiology** is the right program for you?
Check out some of our other MD path specialties:

Orthopedic Surgery Study musculoskeletal system care, bones, joints, and injuries.

General Medicine Explore the fundamentals of care, diagnosis, and treatment.

Cardiology Explore surgical care for the brain, spine, and nervous system.

Psychiatry Focus on mental health assessment and treatment.

Anesthesiology Learn how anesthesia supports surgeries and patient safety.

Pediatrics Focus on healthcare of children from infancy to adolescence.

Dentistry Study oral health, dental procedures, and patient care.

General Surgery Explore surgical principles and patient care for procedures.

Emergency Medicine Understand fast-paced care for urgent and acute conditions.

Dermatology Study skin health, conditions, and treatments.

Neurosurgery Explore surgical care for the brain, spine, and nervous system.
