UNLEASHING POTENTIAL
THROUGH LIFE-CHANGING
OUTDOOR LEARNING EXPERIENCES

At Camp Beaumont, we believe that learning should be more than just gaining knowledge. It should be a holistic experience that imparts real-world transferable skills.

Our experiential learning programmes focus on teamwork, adaptability, and professional growth, helping people thrive in an increasingly dynamic world.

Are you ready to take the next step?

Experience a programme that inspires, challenges, and transforms.

What we offer

Tailor-Made Programme

At Camp Beaumont, we specialise in creating tailor-made programmes designed in close collaboration with you to align with your goals and objectives, ensuring every experience is meaningful and impactful.

Global Expertise

We operate across Hong Kong, Southeast Asia, and the United Kingdom, making us a trusted name in delivering world-class experiential learning journeys on an international scale.

Holistic Development

Our activities focus on growing emotional well-being, confidence, leadership and social skills to help learners thrive not just in their professional lives but in their everyday experiences.

How we do it

At the heart of our programmes is a commitment to learner-centred growth, where participants are encouraged to explore and develop skills at their own pace. Whether it's navigating teamwork through outdoor challenges, improving self-confidence through problem-solving initiatives, or building resilience through exciting adventures, every activity is designed to leave a lasting impact.

By stepping into our experiential learning environment, learners unlock tools to become more engaged, motivated, and capable individuals, ready to take on the challenges of today's evolving world.

our team

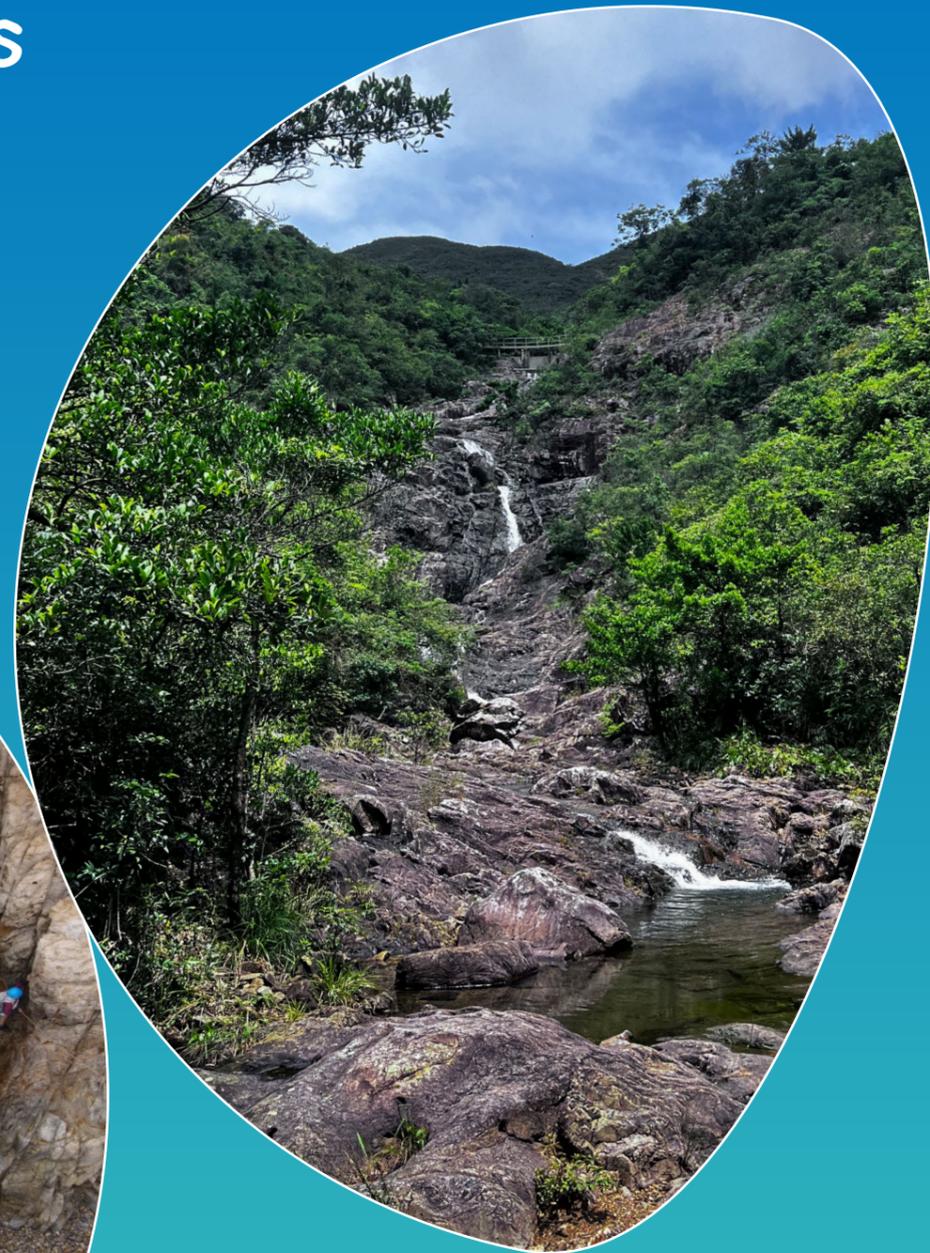

Our facilitators bring enthusiasm and expertise to every activity. Each team member is carefully selected and undergoes thorough training, including safeguarding procedures and detailed background checks. We maintain a consistent minimum staff-to-child ratio in-line with government and industry standards, to ensure the highest standards of safety.

We're equally focused on providing a seamless experience for organisers. Our approachable and friendly team is here to make the booking process straightforward from beginning to end. We know how important it is to ensure the safety and well-being of students, and we are committed to giving educators and parents complete peace of mind.

Example Programme Locations

Hong Kong Island

Including Aberdeen, Stanley, Shek O

Islands

Cheung Chau Island

Sai Kung

Including Pak Tam Chung, Hoi Ha, Sai Wan

Tailored for Professionals

Our bespoke experiential learning programmes cater to a wide range of professional needs, from enhancing leadership capacity to fostering team cohesion and improving decision-making. By integrating with existing frameworks, including those modelled after structured systems like the International Baccalaureate, we ensure a seamless fit with your organisation's goals.

Set the Stage for Transformation

Here's what to expect from our experiential learning opportunities:

- Engaging Activities that are purposeful and strategy driven.
- Real-Life Scenarios to translate learning directly into the real-world.
- Supportive Environment where every learner contributes and grows.

Core Learning Principles of our Experiences

1. Leadership Development

Immerse yourself in activities designed to strengthen your leadership skills. Navigate dynamic challenges that encourage ingenuity, adaptability, and a team-focused mindset. Each participant will have the chance to take the lead, learning to inspire and energise others while driving towards common goals.

2. Collaborative Decision-Making

Work together in dynamic environments where communication, creativity, and critical thinking are key. You'll analyse situations, discuss options, and collaborate to arrive at effective decisions. These lessons in teamwork help foster a culture of inclusion, respect, and openness.

3. Resilience and Growth

Step out of your comfort zone and take on challenges that push your boundaries. Reflect on both successes and failures in structured group discussions in order to build a growth mindset built to succeed.

4. Environmental Stewardship

We offer unique outdoor adventures run by a team of highly trained staff who are passionate about both education and the environment. With our commitment to the internationally recognised Leave No Trace ethos and principles, and alignment with the United Nations Sustainable Development Goals, every experience teaches students how to connect with nature while learning environmental stewardship, in order to preserve it for generations to come.

At the heart of every programme is our commitment to ensuring that each experience leaves a lasting impact by encouraging growth, self-discovery, and stronger connections within your team.

Design your own Learning Journey

Crafted with your needs in mind, our programmes offer a variety of elements to choose from, including:

Team Building Initiatives

Through these activities, students will start to explore and understand each other's unique traits and behaviours. Working collaboratively, they'll focus on utilising one another's strengths to tackle challenges together, building stronger connections and fostering teamwork along the way.

STEAM

Our STEAM-centred programme fosters a space where creativity and curiosity collide, inspiring a love for Science, Technology, Engineering, Arts, and Mathematics. Through hands-on activities and innovative exploration, we empower educators to spark enthusiasm and discovery in every student.

Outdoor Adventures

Take the opportunity to step outdoors and grow beyond the classroom. Through hands-on experiences in the natural environment, participants will develop vital skills like self-sufficiency and decision-making under pressure. It's more than an adventure – it's a chance to learn, connect, and thrive in a team-oriented setting.

Land Adventures

Embark on an unforgettable canyon adventure with your students! They'll collaborate to scramble over rocks, wade through streams, trek along dirt trails, and immerse themselves in the natural environment. This experience goes beyond exploration; it fosters problem-solving, teamwork, and the creation of shared memories. It's the perfect way to build confidence and curiosity outside the classroom.

Help your students build essential life skills through navigation! They'll develop critical thinking and planning abilities as they master map reading, orienting maps, and using a compass. It's all about supporting their growth while making learning hands-on and exciting.

Water Adventures

Are you seeking an engaging, hands-on activity to challenge your students? Raft-building is the perfect way to develop problem-solving, teamwork, and creative thinking skills—with an added splash of adventure!

Students will begin by designing their rafts using various materials, giving them the opportunity to flex their engineering muscles. They will then collaborate to bring their designs to life, constructing a sturdy, float-worthy creation together.

Kayaking in a two-person team demands collaboration, communication, and coordination to navigate swiftly and efficiently.

Beyond paddling, the larger group collaborates to map out the route, assign roles, and execute their plan. As with any adventure, unexpected changes may arise, providing invaluable opportunities for students to adjust, problem-solve, and redefine success. This activity is a fantastic exercise in collaboration and adaptability!

“Camp Beaumont provided an outstanding 3D2N experience for our students. The instructors were enthusiastic and skilled, creating an engaging and supportive environment. Their ability to connect with campers fostered a strong sense of community. Overall, it was a memorable and enjoyable camp that I highly recommend!”
