

PRESS RELEASE July 23, 2025

Paindrainer AB joins forces with Libertas Medical Services to strengthen their patient offering within Pain

Paindrainer AB is pleased to announce a commercial partnership agreement with Libertas Medical Services, a premier care provider located in Clifton Park, focusing on treating patient with Chronic pain. This collaboration marks a significant milestone in Paindrainer's mission to revolutionize chronic pain management and expand its presence in the U.S. healthcare market.

Paindrainer AB persistently focus to achieve an increased presence in the US, now resulting in a new partnership with great potential. Paindrainer's innovative Remote Therapeutic Monitoring (RTM) solution, designed to transform chronic pain management, is already making waves in private pain clinics. Eligible for reimbursement, the Paindrainer platform enables personalized, patient-centred care with real-time insights, and this partnership will further accelerate its impact within orthopaedic care.

"We are incredibly excited about this partnership and the tremendous value it will bring to Paindrainer, Libertas Medical Services, and most importantly to patients. We're eager to collaborate with Dr. Steindler and his team to implement real improvements into patient outcomes.", says Erik Frick, CEO Paindrainer AB.

Libertas Medical Services are dedicated to delivering exceptional care through advanced and evidence-based treatments with a mission to improve the overall quality of life for patients in the Capital district including Albany, Schenectady, Clifton Park and Saratoga County. Their focus on providing excellent care and improving the quality of life for people with chronic pain in the communities they serve is second to none.

"As a doctor, I see firsthand the challenges patients face in their recovery when clinical support between visits is limited. With the PD Care system, we can now monitor patients more closely, track their progress, and intervene when necessary, giving them the support they need in real time. This innovative digital solution will greatly enhance the care we provide.", said Dr. Jason Steindler of Libertas Medical Services.

PD Care System is the first evidence based digital tool demonstrating improved quality of life in patients suffering from chronic pain. The solution is powered by leveraging advanced algorithms and is fully adaptive to each individual patient, a unique feature called the 360° patient-centricity®. Paindrainer PD Care System is an FDA registered Class I Medical Device.

About Paindrainer AB

Paindrainer AB is a company developing digital platforms and applications contributing to health and well-being. Paindrainer was founded in 2018 by Prof. Carl Borrebaeck, Dr. Maria Rosén Klement, and Göran Barkfors. The idea was born when Maria, after participating in several pain rehabilitation programs, realized that pain is affected by many more factors than the human brain can comprehend.

Paindrainer® is the first evidence-based AI powered digital tool demonstrating improved quality of life in patients suffering from chronic pain.

Paindrainer® coaches the users in managing their pain and planning their day not to exceed a certain pain level, and to ensure that there is enough energy left for highly valued activities. The solution is powered by leveraging advanced algorithms and is fully adaptive to each patient, a feature called 360° patient-centricity®.

Paindrainer® (PD Care System) is an FDA registered Medical Device Class 1 (510k exemption), MDR compliant and CE certified.
