PRESS RELEASE November 18 2026

Paindrainer AB Renews SOC 2 Type 2 Attestation, Reinforcing Its Commitment to Data Security and Trust

LUND, SWEDEN – Paindrainer AB is proud to announce that the company now has successfully renewed its SOC 2 Type 2 attestation for its medical device, PD Care System, following a thorough external audit process. This milestone underscores Paindrainer's continued commitment to protecting partner and patient data by meeting the highest standards of data security in digital health.

The SOC2 attestation is a voluntary yet highly important compliance review set forth by the American Institute of Certified Public Accountants (AICPA), which include data security, availability, confidentiality, processing integrity and privacy. The audit, focusing on data security, availability, and confidentiality was performed by an independent third-party auditor who confirmed that the PD Care Systems reached all necessary criteria and upheld the industry-recognized high security standards that exists.

"When we received the SOC 2 type 2 attestation last year, we got a valid confirmation of our capabilities of showing continued operational control and their effectiveness over time. However, the work doesn't end with a first-year attestation and this renewed SOC 2 Type 2 attestation validates that our controls are not only well-designed but are also operating effectively over time, demonstrating robust data protection practices in the rapidly evolving field of digital health. Health care providers can feel safe that we will never compromise on patient confidentiality" says Erik Frick, CEO Paindrainer AB.

Paindrainer AB is a digital therapeutics (DTx) company developing digital platforms and applications contributing to health and well-being. PD Care System is the first evidence based digital tool demonstrating improved quality of life for patients suffering from chronic pain. The solution is powered by a proprietary Artificial Neural Network (ANN) and is fully adaptive to each chronic pain patient, demonstrating our unique and patented 360° patient-centricity concept.

About Paindrainer AB
Paindrainer AB is a company developing digital platforms and applications contributing to health and well-being. Paindrainer was founded in 2018 by Prof. Carl Borrebaeck, Dr. Maria Klement (chronic

pain patient herself), and Göran Barkfors (IT specialist). The idea was born when Maria, after participating in several pain rehabilitation programs, realized that the pain is affected by more factors than the human brain can keep track of, since all days are different. PD Care System which is completely patient-centric uses advanced calculations based on artificial intelligence to, based on each user's own data, coach the user in planning their day not to exceed a certain pain interference level, and to ensure that there is energy left for activities highly valued.

Paindrainer® has clinical evidence, is based on Acceptance and Commitment Therapy (ACT), self-management and artificial intelligence (AI). It is CE certified and an FDA Mobile Medical Device Class I with exemption. www.paindrainer.com
