

Clinical Billing Solution

Overview

Our new Clinical Billing solution combines the features of three typically separate functions for pharmacy: Patient appointment scheduling, Clinical service data collection, and automated coded medical billing. Our Customers get paid on a fee-for-service model with payers.

Getting started with us is easy, start your enrollment on a 15 minute call and get your staff trained on our automated system over another 30 minute call. Once you start submitting claims, we'll be calling you and the payer to ensure they get paid. The best part? You'll pay less for a higher level of service than you're used to - a lot less.

Platform

Price: Free

Features

Patient data collection	Patient Scheduling Portal	Clinical services workflows
Electronic document storage	Vaccine registry submission	Automated medical claims coding

Medical Billing Service

Price: 4% of successful claims*

*(half the rate of comparable software)

Features
