

Accessible Interactive Plans

A BETTER WAY TO DELIVER ACCESSIBLE, ENGAGING FINAL PLANS

Producing the final plan is only part of the job. Consulting teams also need to address accessibility, manage remediation costs, and deliver a final product that clients and communities can actually navigate and use.

Konveio's Accessible Interactive Plans make that handoff easier to budget, easier to deliver, and more valuable to the client.

Each package combines AI-assisted accessibility remediation for up to 1,000 PDF pages with an interactive, web-based plan experience. Instead of handing off a static PDF alone, you can provide clients with a searchable, map-enabled digital plan that is easier to explore, understand, and share.

Why include it in your project?

Plan for accessibility up front.

Build a predictable remediation cost into your proposal rather than treating accessibility as an unknown expense at the end of the project.

Streamline final delivery.

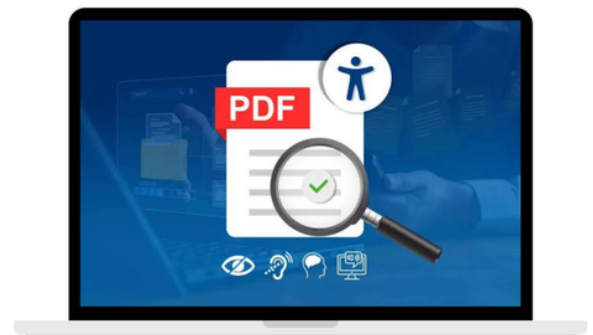

Konveio handles accessibility remediation and digital publishing together, reducing the need to coordinate separate vendors or workflows.

Deliver more than a compliant PDF.

Readers can search plans using natural-language questions, explore related ArcGIS maps, and navigate complex information more easily.

Create lasting value for your client.

Clients can embed the plan directly on their website—or use the handoff as a starting point for a broader, searchable digital Plan Library.

Choose the right delivery option

Co-hosted Accessible Interactive Plan — \$595

A simple, cost-effective option for Consulting Partners using a Konveio Flex plan.

The final plan is hosted as a Completed Project within your existing Konveio environment and can be embedded directly into your client's website.

Includes:

- AI-assisted accessibility remediation for up to 1,000 pages
- Additional pages at \$0.75/page
- Interactive plan hosted on your Flex site
- AI Document Search
- Live Interpreter
- ArcGIS map integration
- Embedding on the client's website

Best for: Projects where you want to deliver an accessible, interactive final plan without requiring the client to maintain a separate Konveio site.

Standalone Accessible Interactive Plan+ Plan Hub — \$1,275

Give your client their own Konveio site plus one year of Plan Hub functionality.

This option includes the same remediation and interactive-plan capabilities as the Co-hosted package, while giving the client a dedicated environment where the final plan can become the foundation for a broader digital plan library.

Includes:

- Standalone Konveio site for the client
- AI-assisted accessibility remediation for up to 1,000 pages
- Additional pages at \$0.75/page
- AI Document Search
- Live Interpreter
- ArcGIS map integration
- Embedding on the client's website
- AI Plan Search across multiple plans
- Map View
- Plan Library infographic functionality
- One year of Plan Hub

Build it into your next project

Accessible Interactive Plans are designed to work as a clear, predefined line item in your project proposal or scope of work.

Instead of figuring out remediation costs and final-plan hosting at the end of a project, you can establish the approach and budget from the beginning—then simply provide Konveio with the finished PDFs.

- **For your team:** predictable pricing and a repeatable final-deliverable workflow.
- **For your client:** an accessible, searchable, engaging plan that remains useful after adoption.
- **For the community:** a better way to find, understand, and interact with important planning information.
