Hypatos AI Agents for end-to-end autonomy

Invoice Processing

Autonomously captures, validates, and posts invoices - reducing errors, accelerating approvals, and ensuring touchless processing from receipt to booking.

Order Acknowledgement

Extracts, compares, and confirms supplier order responses in real time flagging mismatches early and keeping your supply chain on track.

Order Management

Manages incoming orders end-to-end - automating capture, validation, and entry across systems to speed up fulfillment and reduce costly errors.

Expense Management

Reduces manual audits and approvals of employee expenses - catching policy violations, duplicates, and fraud before reimbursement.

Hypatos

Achieve operational excellence with adaptive solutions

Error-Free Processes

Prevent fraud, catch duplicates, eliminate bottlenecks and automate coding, predictions and any type of master data management - any channel, any file, 200+ languages.

Always-On Compliance

AI Agents get tasks done embedded with the latest ground-truth, public regulatory guidelines and relevant external databases, to reduce operational stress and legal risk.

Fostering Autonomy

Easily transfer expert knowledge to your agents making them domain specialists that independently evaluate, decide on and handle tasks within your context and policies.
