

Hypatos

Agents and people. *One workforce.*

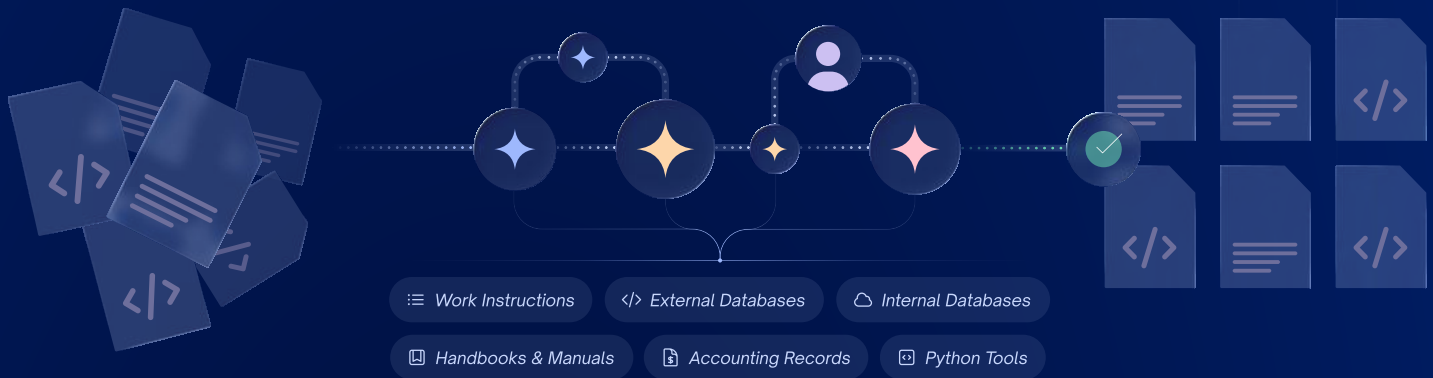

The Platform

Every task becomes a work item.
The platform routes it to an agent
or a person, supervises the
decision and measures the result.

Orchestrate Supervise Measure

How work is orchestrated

1

Work arrives

Documents, emails, requests,
exceptions, bank files, portal events.

3

Routed by policy

To an out-of-the-box (OOTB),
custom or partner agent.

2

Becomes a work item

Context, policy and evidence
attached. One queue for the operation.

4

Supervised, measured

Human-on-the-Loop where policy
requires. One scorecard.

Hy

17 yrs

of work saved annually
(avg. customer).

3 mo

from kick-off to first process
live, with OOTB agents.

150+

countries of tax, e-invoicing
and language rules.

Why Hypatos

The workforce platform for business services: prebuilt, custom and partner agents alongside people, on one queue, with one scorecard.

Enterprise ready

Human-on-the-Loop governance and audit-ready decisions. SOC 2, ISO 27001, C5, HIPAA, GDPR. Visionary, 2026 Gartner® Magic Quadrant™ for IDP.

Agentic native

Agents that read, reason, decide, converse and learn.
Not capture or RPA with AI added. Every decision explained.

No-code integration

One hub, a library of connectors for hundreds of ERPs and business systems. SAP: clean core, SAP certified. API and MCP for the rest.

Fully managed, outcome priced

Pay for completed work, not tokens. We select, optimize and update the models and carry the token cost, so your spend stays predictable.

How an agent completes work

Receive

Any channel: email, EDI, portals, scans, bank files.

Understand

Extract information, retrieve context and policy per transaction.

Reconcile

Against PO, receipt, contract, master data, open items.

Act

Posted without touch, or a work item with evidence.

One integration hub. Hundreds of systems.
