

Hypatos

Your next team includes agents. *Lead one workforce.*

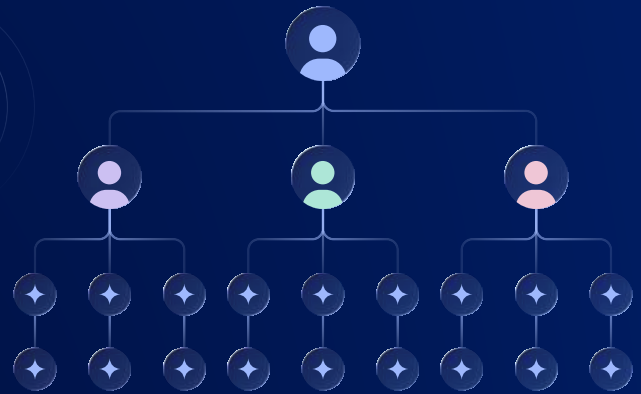

Yesterday

A team of people doing the work.

Tomorrow

People leading agents that do the work.

The Agentic Workforce for Business Services

Agents take your routine work. People lead, decide, and improve.

Four shifts for every organization

1

**From where
to who**

Agents take on routine work, wherever it sits.

2

**From doing
to deciding**

People weigh the evidence and decide.

3

**From tools
to teammates**

Agents are hired, instructed, supervised.

4

**From headcount
to outcomes**

Agents and people on one scorecard.

Hy

“The next generation of leaders will be judged on how well they *manage their agents*.”

Uli Erxleben

Founder & CEO, Hypatos

We bring the *operating model*.

Together with your team, we define who does what, how much autonomy each agent gets, and which policies they follow. Then we measure everyone on one scorecard.

Organize your team

We define new roles with you: supervisors, owners and specialists. Your people shift from processing to judgment.

Set your controls

We help you set agent autonomy and approval limits, just like for a new hire. Every decision is explainable.

Own your knowledge

We turn your manuals and policies into agent instructions, and keep them current as your business changes.

Measure one workforce

We track quality, speed and cost for agents and people side by side. One team, one scorecard.

Ask yourself:

- ? Who owns and supervises your agents today?
- ? Could you explain an agent's decision to your auditor?
- ? Are your policies ready to be followed exactly?
- ? Do agents and people share one scorecard?

Not sure of every answer?
Start with an Agent Readiness Assessment.

A working session with our team on your roles, controls and knowledge.
