

Sustainable noise fences

for a quiet and comfortable living environment

Noise pollution occurs when everyday sound exceeds acceptable comfort levels. Over time, unwanted noise can seriously affect health, both directly and indirectly. According to the European Environment Agency, around 20–25 million people in Europe are highly annoyed by environmental noise, mainly from road traffic, railways, aircraft and industrial activities.

Noistop fences are designed to reduce noise from traffic, residential, commercial and industrial sources. By blocking and absorbing sound, Noistop helps to limit noise pollution and create a more peaceful and comfortable living and working environment.

UNIQUE FEATURES

At the heart of every ROCKWOOL Noistop fence is a stone wool core. Our aim is to combine high-performance, noise-absorbing and noise-insulating ROCKWOOL solutions with durable, attractive designs. This is why our panels are finished with either wooden or steel frames.

ROCKWOOL Noistop products inherit all the key advantages of stone wool: They block and absorb noise, are highly durable, non-combustible and 100% recyclable. Specifically designed for outdoor use, our fences are resistant to both water and UV exposure.

EASY TO INSTALL AND MULTIFUNCTIONAL APPLICATION

The slimline modules are available in different sizes, making it easy to fit them in between trees and bushes already in your garden or property.

The modules should be installed between steel posts for a long lifetime of the fence. Noistop is suitable for many applications such as residential gardens, industrial facilities, commercial and public areas.

SLEEK DESIGN

At ROCKWOOL Noistop, we design acoustic fences that are both beautiful and functional. With Noistop Essential, Noistop Steel and Noistop Wood, there is always a variant to match the desired performance with your design preferences.

Noistop Steel works perfectly with climbing plants, allowing the fence blend into the surrounding greenery. Noistop Wood brings natural timber into a clean, Scandinavian-style design. Noistop Essential combines the best of both products, offering a slim steel fence with the option of wooden cladding on one or both sides.

NOISTOP ACOUSTIC FENCES

Noistop Steel

A robust, maintenance-free noise barrier supporting fence heights up to 6 m, designed to withstand heavy wind loads. Available in multiple surface colours and ideal as a support for climbing plants.

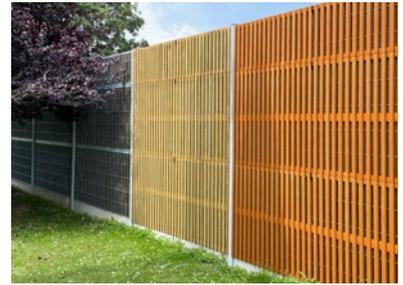

Noistop Wood

Nature's insulation at its finest: Stone wool and wood. The combination of natural wood and clean lines creates a striking look that is both beautiful and calming, bringing a sense of peace to your outdoor space.

Noistop Essential

Combining the best of Noistop Steel and Noistop Wood, Noistop Essential is a strong, slim steel fence with optional wooden cladding on one or both sides. It offers great design freedom and a choice of looks to suit any outdoor space.

BY NATURE.

At ROCKWOOL, we are dedicated to improving the quality of life for everyone who benefits from our products. Whether it's tackling noise pollution, increasing energy efficiency, or making environments safer and more resilient, our purpose is to create solutions that meet the challenges of modern living.

OUR APPROACH TO SUSTAINABILITY

The heart of every Noistop acoustic fence is its stone wool core, a material born from nature, engineered for performance.

We take our responsibility for the environment very seriously. We comply with the ROCKWOOL Group award-winning environmental responsibility policy. Our acoustic stone wool is 100% recyclable and non-flammable. The quality of our products and a responsible environmental policy are key elements in the way we work.
