

NOVELIO® Sustainable High Performance Paintable Wallcovering

REPAIR INSTRUCTIONS

Novelio is very durable, however a forceful or sharp impact might damage the wallcovering. But repair is fast and easy.

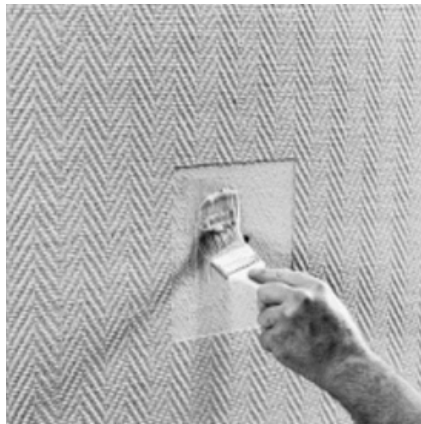

Cut a piece of Novelio larger than the damaged area, align the pattern with the original wallcovering, and tape it over the damage.

Double cut both the new piece of Novelio and the damaged piece to ensure a precise seam when the repair is finished.

Remove both the new piece of Novelio wallcovering and the damaged piece.

If the wall is not severely damaged, simply apply adhesive where the wallcovering was removed. For damaged walls, use spackling or drywall compound for repairs.

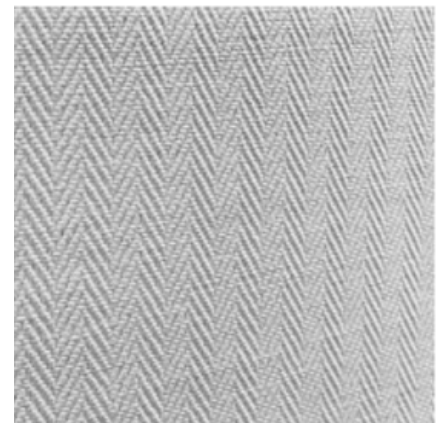

Place the Novelio wallcovering patch onto the repair area, and carefully line up the pattern or texture.

Firmly brush or use plastic application to smooth wallcovering. There is no need to roll edges or seams.

Paint the patch and adjacent areas with a roller using the same paint that was originally used on the wall.

The combination of paint and Novelio pattern result in a neat professional patch.
