Company Overview

Founded in 2019, ArcheSys is a technology consulting and digital services company focused on helping federal, state, and local government organizations modernize operations, improve service delivery, and solve complex challenges through practical, mission-focused solutions.

Our Competencies

Digital Strategy & Modernization

Helping organizations modernize operations, improve service delivery, and achieve mission outcomes.

Cloud Optimization & FinOps

Securing, automating, and cost-effectively managing cloud operations and environments.

Product Management & Delivery

Delivering modern digital products through product strategy, agile delivery, and continuous improvement.

Data Interoperability

Rapidly delivering value and driving healthcare interoperability through FHIR expertise.

Human-Centered Design & Agile Delivery

Designing and delivering solutions that align user needs, business objectives, and mission priorities.

Scalable Platform Engineering

Building robust and secure platforms that support rapid innovation.

Site Reliability Engineering (SRE)

Building robust and secure platforms that support rapid innovation.

Artificial Intelligence (AI) & Automation

Applying practical AI solutions that enhance productivity, improve service delivery, and support informed decision-making through human-in-the-loop approaches.

Mission-Focused Technology. People-Centered Delivery.

We help government organizations modernize technology, improve service delivery, and deliver better outcomes for the people they serve.

Our Differentiators

Deep Government Expertise

Experience supporting some of the nation's most important federal and state programs.

Mission-Focused Delivery

Combining strategy, product management, engineering, cloud, and service design expertise to create lasting outcomes.

Modern Engineering Practices

Accelerating delivery through automation, DevSecOps, cloud-native development, and continuous improvement.

Cloud Governance & Operations

Helping organizations modernize, operate, secure, and optimize cloud environments.

End-to-End Delivery

Providing comprehensive support from strategy to execution.

Experienced Public Sector Practitioners

Teams with deep expertise in government modernization, technology delivery, and operational transformation.

Continuous Improvement

Embracing learning, innovation, and iterative delivery to create better outcomes over time.
