monthly average fuel prices (€ incl. VAT) - Europe

formula⁴

$$\text{fuel floater (\%)} = \frac{(\text{current index}^3 - \text{base index}^4)}{\text{base index}} \times \text{ratio}^5$$

notes

- CH: for transportation from Switzerland we refer to ASTAG: <http://www.astag.ch>
- ¹ratio = share of diesel costs (road transport = 25%, combined transport = 10%)
--> above fuel floater figures only applicable for road shipments
--> for fuel floater of combined transports the ROAD fuel floater figure has to be multiplied with 0,4 (10%/25%)
- ²also negatively applicable
- ³current index = average fuel price from previous month
- ⁴base index = average fuel price of 2021
- ⁵HR base rate from July 2013
- ⁶for the calculation the whole EU data is used, which means that the numbers used include more decimal positions than shown
