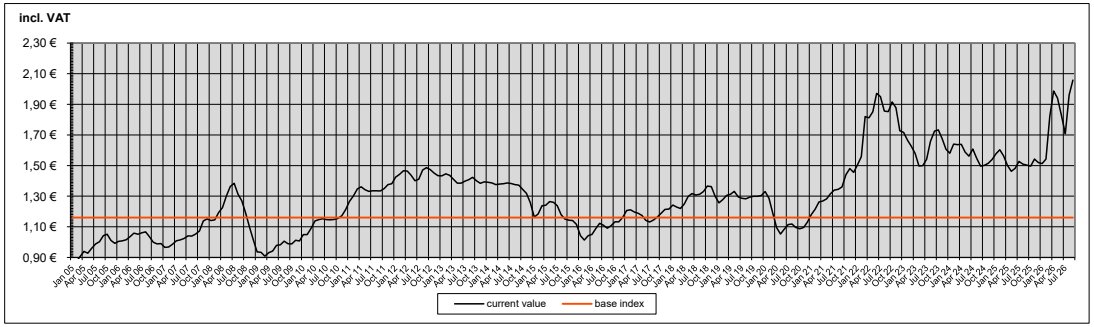
monthly average fuel prices (€ incl. VAT) - Europe



formula'

$$\text{fuel floater (\%)} = \frac{(\text{current index}^3 - \text{base index}^4)}{\text{base index}} \times \text{ratio}^5$$

notes

CH: for transportation from Switzerland we refer to ASTAG: http://www.astag.ch

[1]source: http://ec.europa.eu/energy/observatory/oil/bulletin_en.htm - "history from 2005 onwards" Sheet: "Prices with taxes, per CTRY"

[2]also negatively applicable

[3]current index = average fuel price from previous week

[4]base index = average fuel price year 2021

[5]ratio = share of diesel costs (road transport = 25%, combined transport = 10%)
--> above fuel floater figures only applicable for road shipments
--> for fuel floater of combined transports the ROAD fuel floater figure has to be multiplied with 0,4 (10%/25%)

[6]HR base rate from July 2013

[7]for the calculation the whole EU data is used, which means that the numbers used include more decimal positions than shown
