Platform Comparison Map

Horizontal Enterprise AI

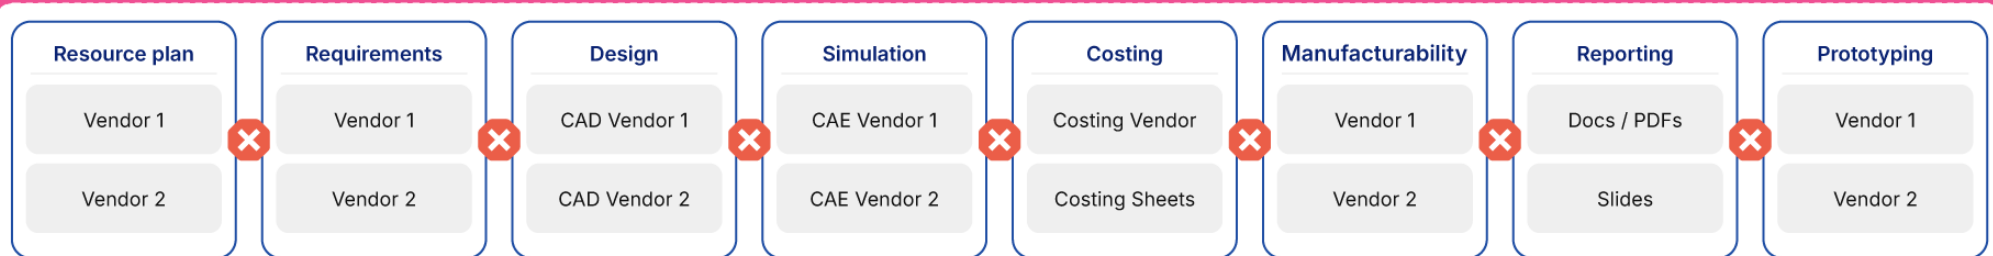

Infrastructure Layer (AWS, Foundry, Databricks, Snowflake)

AI / LLM Layer (Claude, Gemini, GPT, Llama, Mistral)

↑ Connects via REST API · MCP · A2A ↓

THE SOLUTION: Open agentic layer

Executes end-to-end, across vendors, on native engineering data, secure on-premises

↑ Connects via REST API · MCP · A2A ↓

PDM/PLM/SPDM (Teamcenter, Windchill, Vault)

ERP (Infor, Microsoft, Oracle, SAP)

Software engineering

→ AI-accelerated and compounding

Hardware / mechanical

→ Still fragmented, no 3D spatial reasoning in foundation models, agents don't run across tools

The disciplines
are pulling apart
