

New diagnostic imaging modalities and clinical decision support coming to eReferral

New DI modalities coming to Ocean

We are pleased to share that on **Monday, Dec. 8**, four additional Diagnostic Imaging (DI) modalities will be available in the Ocean electronic referral (eReferral) tool:

- Computed Tomography (CT): [Click here for tip sheet](#)
- Interventional Radiology (IR): [Click here for tip sheet](#)
- Nuclear Medicine: [Click here for tip sheet](#)
- Fluoroscopy: [Click here for tip sheet](#)

New Decision Support Aide for Referrers

Starting Nov. 18, specialists who are using Ocean for DI eReferrals will have access to the Canadian Association of Radiologists (CAR) Guidelines for Clinical Decision Support. This resource gives providers instant access to evidence-based guidance through a simple dropdown search.

It will appear directly within the DI forms of the eReferral tool and supports appropriate test selection and improved patient care.

Ocean onboarding requests can be placed [here](#).
