

Main sizes 2

Lift height - standard 3

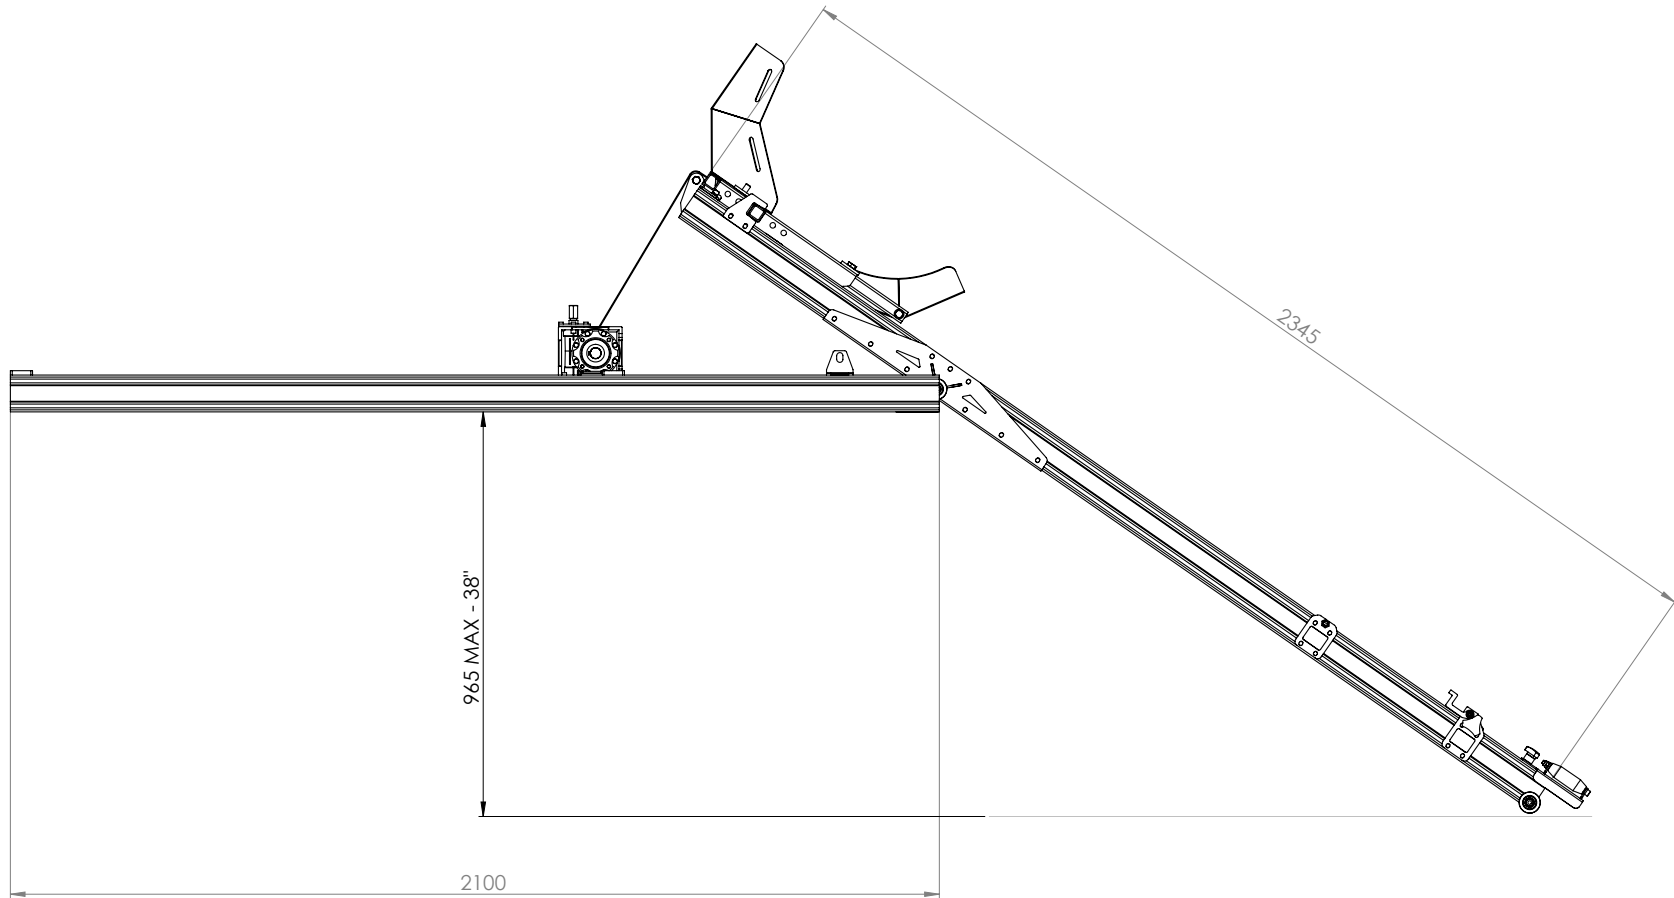

Lift height with AC 001 extender 4

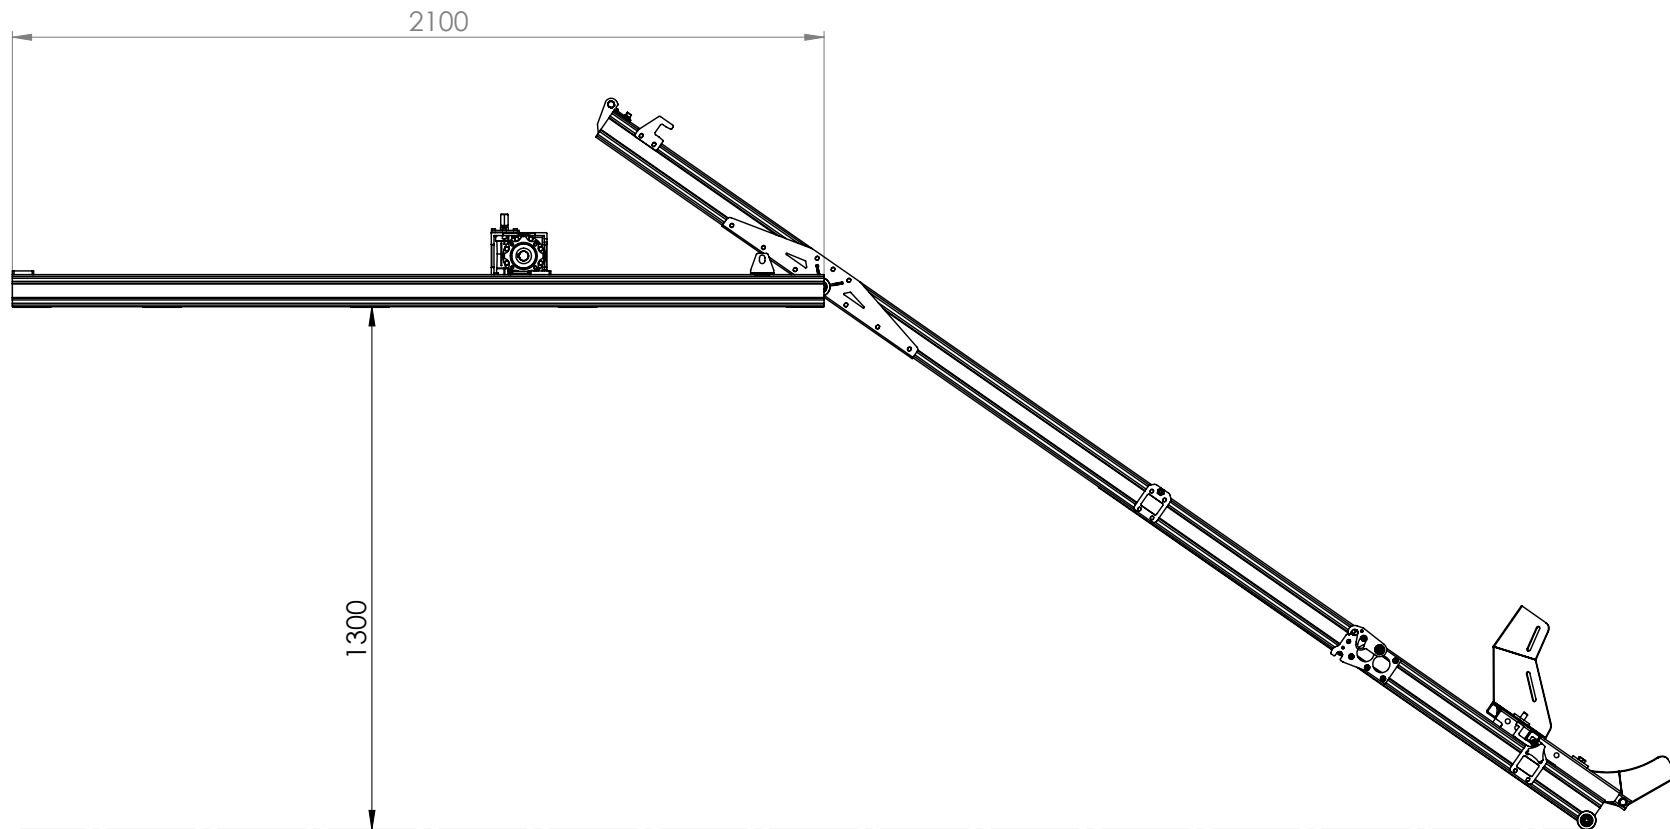

Empty weight - 82kg
 Max load 550 kg
 Ramp adds 85mm to the motorcycle height when loading. However if the front struts of the motorcycle are compressed 85mm, the ramp adds no height to the loaded motorcycle.

This type of ramp is great for short bed pick-up trucks. Your dealer can cut it to size, so that the bottom ramp fits your cargo bed length with the tailgate down.

Lift height is max 950mm in its standard version.

AUN 150 lift height using AC 001 extender

Lift height is max 1300mm using a standard AC 001 extender. Longer extenders are available upon request.
