ABOUT THIS EPISODE

Chris Harmon, VP of Technology at Elzly, joins the Road to AMPP podcast to talk about the next generation of coating inspection tools — including what they're debuting in Columbus, why data integration is the real challenge, and what he wishes more inspectors understood about field conditions.

Chris Harmon

VP of Technology, Elzly Technology

Booth #3104

EPISODE HIGHLIGHTS

- 2:14** Why Elzly shifted focus from hardware to data integration in the last three years
- 11:40** The new tool they're debuting at Columbus — and what makes it different from anything on the market
- 19:55** What inspectors get wrong about field conditions, and how better data closes the gap
