

Igor Soroka

Senior AWS Certified Cloud Engineer

I'm a **Cloud Engineer** with a strong focus on **event-driven architectures**, **serverless technologies**, and **microservices**, backed by **7 AWS certifications**, including **Solutions Architect Professional** and **DevOps Engineer Professional**.

I've worked with companies across **e-commerce**, **fintech**, and **SaaS**, designing and optimizing scalable, secure cloud environments using **AWS** tools like **Lambda**, **S3**, **DynamoDB**, and **CDK**. Active in the AWS community, I also speak at industry events and provide training to teams.

Recent projects

DevSecOps

USA Remote, 2024

Managed Terraform/CloudFormation code and **automated AWS disaster recovery**, enhancing security with AWS WAF. Supported seamless app deployment on AWS services (EKS, Serverless Lambda) and designed CI/CD pipelines using GitHub Actions. Setup of Playwright tests.

Senior Software Engineer,
Technical Lead

UK Remote, 2022-2023

Major UK/Global digital **re-platforming project leading the cloud integrations team** (AWS, Kafka, event-driven architectures). Focused on uniting the backend and frontend using GraphQL. Deployment and setup of Cloudflare Workers as part of CDN solution. **Coaching and establishing practices** combined with hands-on work. Client-facing role.

Senior Software Engineer

Finland, 2022-2023

Integrations to reporting APIs of various providers. Created new integrations and data transformations to put them into SQL storage like Redshift and Postgres RDS. Lead the DevOps and IaC. Set up VPCs and networking for databases and Lambda functions. Involved in the setup of the Sagemaker.

Senior Software Engineer

NL Remote, 2022

Worked with the small team working on internal software architecture tool. Improved the practices of API development. Trained team to migrate one AWS Lambda Function to the AWS AppSync GraphQL. I helped with refactoring the application code and infrastructure to decoupled microservices. Terraform as IaC. Training, coaching, and mentoring of the team.

Senior Software Engineer

NL Remote, 2022

Migrated from CloudFormation to CDK. I wrote both infrastructure and serverless implementation using NodeJS/Typescript. Tech: API Gateway, Lambda, S3, CodePipeline, Codebuild, Dynamo DB, REST API. Setup CI/CD.

Tech Stack

Serverless, AWS, Lambda, SNS, SQS, VPC, S3, Cloudflare Workers, Kafka

NodeJS, JavaScript, TypeScript, Python, REST, GraphQL, AppSync, Jest, Playwright

NoSQL, Dynamo DB, MySQL, PostgreSQL

CDK, SAM, CloudFormation, Terraform

Git, GitHub Actions, CodePipeline

Education

LUT University (Finland) 2014 - 2016

M.Sc. Technology, Design and Manufacturing

- Research Assistant working with LabView (OpenCV C++ libraries)
- Raised funding for the research spin-off (hearing aid mobile application)

Previous experience
