# THE MORE YOU UNDERSTAND, THE MORE YOU WILL BE MISUNDERSTOOD

Our mission is to bridge the gaps hindering your success by offering customized solutions tailored to your needs. We are committed to driving measurable outcomes and sustainable growth for our clients.

Understood LLC is a leading consulting firm offering consulting services, coaching, professional development training, and motivational speaking. We serve federal, state, and local governments, corporations, and educational institutions. Our expertise includes humanity training and social & emotional learning workshops, empowering organizations with practical strategies for professional development and fostering an inclusive culture.

“Misunderstanding the various perspectives our society possesses continues to create gaps that contribute to the complexity of accomplishing our goals.”

Establishing a positive environmental culture is critical to building a successful organization. One key to maintaining that culture is the willingness to invest in continued education. Our training workshops provide organizations with a strategy for maintaining that positive environmental culture.

“Mr. Glen Gatling has been a phenomenal guest speaker to over a dozen 14T/14E graduations. He is extremely welcoming and the Soldiers love talking and hearing from him. HQ/A 3-6 ADA chooses Mr. Gatling to be our guest speaker, because his main purpose is to educate, mentor, and motivate the Soldiers to become the best version of themselves. His speeches are about helping the Soldiers to improve on their social and emotional growth, while in A.I.T. and how it can help benefit them. He has greatly impacted these Soldiers, and leaves them with the motivation to be a better Soldier every day. We look forward to having him as our guest speaker for as many graduations as we can.”
