

## Verified: Sub-Processor Site

Last updated: July 14, 2025

To support delivery of our Services, Verified engages certain Sub-Processors to Process Personal Data in accordance with the terms and conditions of our Data Processing Addendum (DPA).

This Verified Sub-Processor Site contains important information about such SubProcessors engaged by us from time to time to Process Personal Data, including their functions and locations.

Verified notifies all customers of any changes to this list of Sub-Processors and updates the Sub-Processor Site.

Sub-Processor	Function	Location
Amazon Web Services, Inc.	Cloud computing services for all core functionalities of the Services	United States
New Relic	Logging of API events for the Services	United States
Sentry	Bug reports for the Services	United States
Slack	Customer service and internal analysis as required for the Services	United States
Google Workspace	Secure file storage for certain elements of the Services	United States
1Password	Secure file storage for certain elements of the Services	United States
Data Providers	User data and metadata sourcing for Services	United States

Unless expressly stated otherwise, capitalized terms used on this page have the meanings set out in the DPA.
