

Partner Program

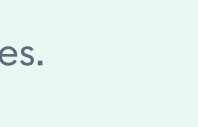

Lead the future of construction and field services with AI takeoffs, estimates, and BIM management.

About Attentive.ai

With AI-based takeoffs, estimates, bid management, and human-vetted, multi-trade BIM, Attentive.ai transforms how construction and field services teams work.

Beam AI

AI takeoffs & estimates

Powered by Attentive.ai

Bid 3X more with 99%+ accurate, done-for-you takeoffs and estimates in 24-72 hours for construction & field services, or get instant AI takeoffs for faster budgeting and estimates.

BIM CoPilot

BIM management solution

Powered by Attentive.ai

Human-vetted, multi-trade building information modeling (BIM) solutions for accurate quantities, clash-free models, and build-ready outputs.

Why partner with Attentive.ai

Get in front of our customer base

Connect with 1,200+ contractors and suppliers already using Attentive.ai. Gain exposure through direct introductions, co-marketing, and our upcoming partner marketplace.

Drive real revenue as a category leader

Help your network bid more, win more, and work faster while generating revenue through referrals and strategic partnerships.

Early access to events & sponsorships

Be among the first to hear about Convergence and other customer events. Get early access to sponsorship and speaking opportunities before public announcements.

Work directly with our team

Get a dedicated point of contact and direct access to our customer-facing teams. Eligible technology partners can apply for developer API access.

Join our network

Choose the partnership model that works for you

Referral & network partners

Introduce Beam AI and BIM CoPilot to your network through referrals, content, or co-marketing. Earn rewards when those introductions lead to new business.

Technology & integration partners

Integrate Beam AI and BIM CoPilot into your platform to bring AI-based blueprints, aerial takeoffs, estimating, and BIM solutions across project workflows.

Consulting & advisory partners

Advise and guide your clients through modern construction and BIM workflows using Beam AI and BIM CoPilot as part of your toolkit.

Our growing partner network

Where estimating workflows fall short today

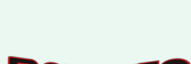

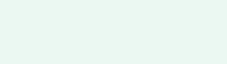

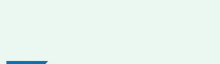

- Manual and semi-automated takeoffs can consume 10 to 40+ hours per project.
- Limited capacity and tight deadlines leave valuable opportunities unbid.
- Estimators spend less time on pricing, value engineering, and risk review.
- Large plan sets and frequent addenda increase the risk of errors and rework.
- Without BIM coordination, design conflicts often go unnoticed until they cause delays and rework on site.

How Attentive.ai helps

BEAM

Powered by Attentive.ai

AI-based blueprint and aerial takeoffs for construction and field services teams. Choose 99%+ accurate, QA-checked, Done For You takeoffs and estimates across 15+ trades or instant Do It Yourself AI takeoffs for HVAC, plumbing, and steel. Get aerial measurements for landscaping, paving, snow removal, and facilities in 2 to 10 hours.

BIM CoPilot

Powered by Attentive.ai

Human-vetted, multi-trade BIM management solutions delivered by an expert team that works as an extension of yours. Get coordinated models, clash-free documentation, and construction-ready outputs across MEP, architectural, and structural trades.

Our awards & global recognition

Attentive.ai by the numbers

1200 +
Contractors & suppliers trust us across US & Canada

500K +
Takeoffs completed to date

20M +
Hours of manual work saved

3 X
Increase in bid capacity for our clients

99 %+
Accuracy delivered on takeoffs & estimates
