

Q1.

Question Number	Answer	Additional guidance	Mark
<b>(i)</b>	Geiger (Müller counter) (1)	GM {tube/meter} or other appropriate detector e.g. dosimeter, film badge, scintillation counter  accept incorrect spellings such as "giga"  ignore radioactive counter	<b>(1)</b>

Question Number	Answer	Additional guidance	Mark
(ii)	<p>any <b>two</b> acceptable sources from :</p> <p><b>cosmic</b> (rays) (1)</p> <p>Sun (1)</p> <p>rocks / ground (1)</p> <p>{nuclear / atomic} tests / nuclear waste (1)</p> <p>(nuclear) power stations (1)</p> <p>plant (sources) (1)</p> <p>buildings (1)</p> <p>food (1)</p> <p>water (1)</p> <p>medical (1)</p> <p>radon (1)</p>	<p>cosmic microwave background radiation (CMBR)</p> <p>accept nuclear accidents (Chernobyl, Fukushima etc)</p> <p>accept named foods</p> <p>accept X-rays, radiotherapy</p> <p>ignore alpha, beta, gamma</p>	(2)

**Q2.**

Question Number	Answer	Acceptable answers	Mark
	<p>An explanation linking any three from</p> <ul style="list-style-type: none"> <li>• Radon is radioactive (1)</li> <li>• Radon can escape from rocks and buildings (1)</li> <li>• Radon can be inhaled (1)</li> <li>• Radiation (from radon) can cause cancer (1)</li> <li>• Radon emits alpha (1)</li> </ul>	<p>Ignore radiation from rocks themselves</p> <p>Radon enters/gets trapped in buildings/homes / increases background radiation</p> <p>(breathed into) lungs</p> <p>(DNA) mutation / cell damage</p> <p>(Highly) ionising radiation</p>	<b>(3)</b>

**Q3.**

	Answer	Acceptable answers	Mark
<b>(i)</b>	any one of X-ray (machines) / smoke alarms/ nuclear/ radioactive waste (1)	nuclear weapons (tests) nuclear power plants (medical) tracers/technetium	<b>(1)</b>
<b>(ii)</b>	an explanation linking: comes from granite / rocks (1) none/ less of these (rocks) in some areas (1)	in some areas/Cornwall/Aber deen the second mark is dependent on the first.	<b>(2)</b>

Q4.

Question number	Answer	Mark
(i)	434	(1)

Question number	Answer	Additional guidance	Mark
(ii)	34	allow 29 to 39	(1)

Question number	Answer	Additional guidance	Mark
(iii)	Radioactive decay is a random process	allow because background count changes every time	(1)

Q5.

Question number	Answer	Additional guidance	Mark
	Substitution and rearrangement to find $k$ (1) $k = 85000 \times 0.70^2$  Substitution to find new count rate (1) count rate = $\frac{85000 \times 0.70^2}{1.3^2}$  Answer (1) 25000 (counts per minute)	41650       24645 (counts per minute)	(3)

Q6.

Question number	Answer	Additional guidance	Mark
(i)	an explanation linking any <b>two</b> from  readings fall (to almost zero) (1)  radiation is (all) absorbed (1)  after a few cm (of air) (1)	accept graph / activity / measurements for readings  stopped by air  in a short distance (in air)  reverse arguments must include beta <b>and</b> gamma	<b>2</b> <b>AO2.1</b>

Question number	Answer	Additional guidance	Mark
(ii)	background radiation (1)	or words to that effect accept named examples  ignore reference to original alpha source	<b>1</b> <b>AO2.1</b>

Q7.

Question number	Answer	Additional guidance	Mark
(i) <b>CS2</b>	An explanation to include;  there is no aluminium to absorb $\beta$ particles (1)  (therefore) more $\beta$ particles reach the G-M tube (1)	aluminium absorbs/stops/blocks beta particles  accept reverse arguments  accept radiation for beta particles	(2) AO2

Question number	Answer	Additional guidance	Mark
(ii) <b>CS2</b>	(idea of) background radiation	a named source of background radiation	(1) AO3

Question number	Answer	Additional guidance	Mark
(iii) <b>CS2</b>	becquerel	accept Bq accept close spelling	(1) AO1

Q8.

Question	Answer	Additional guidance	Mark
	<p>an explanation linking three from</p> <p>use of G-M tube (with counter) (1)</p> <p>no (obvious) radioactive sources present (1)</p> <p>measure (number of) counts in a given time (1)</p> <p>divide number of counts by time (1)</p> <p>repeat readings (1)</p> <p>calculate the average value (1)</p>	<p>allow Geiger counter / rate meter</p> <p>allow measure count rate / activity if rate meter used</p> <p>take readings in different positions in laboratory</p>	<p><b>3</b></p> <p><b>A03.3</b></p>

Q9.

Question Number	Answer	Additional guidance	Mark
	<p>a description to include:</p> <ol style="list-style-type: none"><li>1. put rock(s) in front of/near tube (1)</li><li>2. measure (count rate) separately for the two different rocks (1)</li><li>3. measure each count for the same time period (1)</li><li>4. keep source-detector distance the same for both rocks (1)</li><li>5. take (into account)/measure background count (1)</li><li>6. repeat readings and take average(s) (1)</li></ol>	<p>not 'in' tube</p> <p>keep rocks apart</p>	<p><b>(4)</b></p> <p>AO 2 2</p>

## Q10.

Question number	Answer	Additional guidance	Mark
(i)	Geiger-Müller tube	accept Geiger (counter) geiger (counter) GM (tube) gm(tube) accept any recognisable (phonetic) spelling	(1)

Question number	Answer	Additional guidance	Mark
(iii)	<p>a description to include four from:</p> <p>take measurement without source (1)</p> <p>place source in front of/near/close to detector (1)</p> <p>increase the distance (between source and detector) (1)</p> <p>measure distance (from source to detector) (1)</p> <p>take reading from the screen/counter (1)</p> <p>until reading gets to background value /constant value (1)</p> <p>use same time for each count (1)</p> <p>repeat / check when down to low values (1)</p>	<p>measure/account for background (count)</p> <p>DO NOT allow 'inside'</p> <p>allow reverse argument by starting with detector long way away from source</p> <p>allow zero as constant value</p> <p>mention of (count) <u>rate</u></p>	(4)

## Q11.

Question number	Answer	Additional guidance	Mark
(i)	<p>use of gradient on graph (1)</p> $= \frac{1480}{97}$ <p>evaluation (1) 15.3 (counts /s)</p>	<p>look for a triangle / line going up</p> <p>allow <math>\frac{1480}{100}</math></p> <p>accept other data from the graph</p> <p>allow numbers between 12.0 and 16.0</p> <p>award full marks for answers in the correct range without working</p>	(2)

Question number	Answer	Additional guidance	Mark
(ii)	<p>explanation</p> <p>the process (of radioactive decay) is unpredictable / (occurs) random(ly) (1)</p> <p>so the count rate would not be constant / there will be variations with each reading (1)</p>	<p>do not allow 'difficult to predict'</p> <p>ignore background</p> <p>results (expected to) scatter</p>	(2)
